RE: VPDES Permit VA0088650

Dear Ms. Austin:

Please find enclosed the FY17 VPDES Annual Report for the City of Norfolk, submitted in accordance with Part I.E of the above referenced MS4 Phase I permit.

If you have any questions or need additional information, please do not hesitate to contact June Whitehurst, Environmental Programs Manager of Environmental Storm Water Management, at (757) 823 – 4010.

Sincerely,

Richard Broad, PE
Director of Public Works

Enclosures

CERTIFICATION STATEMENT AND SIGNATORY REQUIREMENTS FOR MS4 PERMIT APPLICATIONS AND REPORTS

As required by 9VAC25-870-370 B, all reports required by state permits, and other information requested by the board shall, be signed by a responsible official or by a duly authorized representative of that person. A responsible official is:

1. For a corporation: by a responsible corporate officer. For the purpose of this section, a responsible corporate officer means: (i) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy-making or decision-making functions for the corporation, or (ii) the manager of one or more manufacturing, production, or operating facilities, provided the manager is authorized to make management decisions that govern the operation of the regulated facility, including having the explicit or implicit duty of making major capital investment recommendations, and initiating and directing other comprehensive measures to assure long-term environmental compliance with environmental laws and regulations; the manager can ensure that the necessary systems are established or actions taken to gather complete and accurate information for state permit application requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;
2. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or
3. For a municipality, state, federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a federal agency includes (i) the chief executive officer of the agency, or (ii) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency.

A person is a duly authorized representative only if:

1. The authorization is made in writing by a person described above;
2. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity such as the position of plant manager, operator of a well or a well field, superintendent, position of equivalent responsibility, or an individual or position having overall responsibility for environmental matters for the company. A duly authorized representative may thus be either a named individual or any individual occupying a named position; and
3. The written authorization is submitted to the department.

CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

RE: City of Norfolk, Duly Authorized Representative

Dear Mr. Nicol:

As the principal executive officer, I am approving Mr. Richard Broad, Director of Public Works to be designated as a "Duly Authorized Representative" for the City of Norfolk. This authorization will allow him to certify environmental regulatory correspondence such as reports, plans, permit applications and other supporting documentation on behalf of the City of Norfolk with regard to environmental compliance.

If you have any questions or need additional information, please do not hesitate to contact June Whitehurst, Environmental Programs Manager of Environmental Storm Water Management, at (757) 823 – 4005.

Sincerely,

Douglas L. Smith
City Manager

City of Norfolk Phase I MS4 Annual Report - Fiscal Year 2017
VA0088650

Permit Section	Specific Reporting Requirement and Result
Part I.A.2 (Permittee Responsibilities)	Each annual report shall include a current list of roles and responsibilities. • See MS4 Program Plan (approved via letter dated August 28, 2017) for a full list of roles and responsibilities. https://www.norfolk.gov/documentcenter/view/31602
	Each annual report shall include a list of those circumstances of non-compliance outside of the permittee's control. • NA – None during FY2017.
Part I.A.4 (MS4 Program Resources)	A copy of the fiscal year's budget including its proposed capital and operation and maintenance expenditures necessary to accomplish the activities required by this state permit shall be submitted with each annual report. • See Appendix 1 for all budget information.
Part I.A.6 (MS4 Program Plan)	Utilizing the last annual report prior to this state permit effective date as a baseline, no later than 12 months after the permit effective date, the permittee shall submit to the Department for review and approval an updated MS4 Program Plan to describe implementation of this MS4 Program and meet the conditions described in this section. • MS4 Program Plan was submitted to DEQ June 28, 2017 and approved via letter dated August 28, 2017. https://www.norfolk.gov/documentcenter/view/31602
	Upon development, the most recent MS4 Program Plan shall be posted on the permittee's website, and/or provided in another location easily accessible to the public. • https://www.norfolk.gov/documentcenter/view/31602
Part I.A.7.b (MS4 Program Updates Requested by the Department)	All modifications and proposed modifications shall be reported in accordance with this section of the permit. • No modifications at this time. MS4 Program Plan approved via letter dated August 28, 2017.
Part I.B.1 (Planning)	No later than 12 months after the permit effective date, the permittee shall provide the stormwater management project summary sheet. At a minimum, the permittee shall include the following for each project in the summary: type of project or BMP, number of acres which the BMP treats, impervious and pervious acreage treated by the potential project, condition of the downstream channel, amount of total pollutant reduction, feasibility for implementation, and estimated cost of implementation. The summary shall include a prioritized list of the identified projects for consideration of implementation. • Project summary sheet was submitted to DEQ for review 6/28/2017.
	Each annual report shall include an updated project summary sheet. • See Appendix 2.
	Each annual report shall include a current web link to the project status page. • https://www.norfolk.gov/DocumentCenter/View/27619
	Each annual report shall include a status update for those water quality projects for which implementation or construction occurred during the reporting year. • See Appendix 2. https://www.norfolk.gov/DocumentCenter/View/27619
Part I.B.2.a (Construction Site Runoff & Post Construction from Areas of New	Each annual report shall contain the number of regulated land disturbing activities approved and the total number of acres disturbed. • A total of 82 land disturbing activities were approved, for a total of 167.9 disturbed acres.
	Each annual report shall contain the number of land disturbing activity inspections conducted and the number and type of each enforcement action taken.

<table>
<tr><th>Permit Section</th><th>Specific Reporting Requirement and Result</th></tr>
<tr><td rowspan="3">Development & Development on Prior Developed Lands)</td><td>• A total of 4115 Erosion & Sediment Control inspections were conducted, resulting in 58 written Notices of Violation.</td></tr>
<tr><td>Each annual report shall include a list of land disturbing projects that qualify under the “Grandfathering” provision of the VSMP regulations that receive coverage under the General VPDES Permit for Discharges of Stormwater from Construction Activities during the reporting period.
• 09-0020 - Norfolk International Airport Garage D Improvements
10-0018 - Norfolk Consolidated Courts Complex</td></tr>
<tr><td>Each annual report shall include a summary of actions taken by the permittee to implement a local E&SC program consistent with the VESC Law and regulations, and a SWM program consistent with VSWM Act and regulations. The permittee shall identify in the MS4 Program Plan all legal authorities for ESC and SWM that are more stringent than required.
• See MS4 Program Plan (https://www.norfolk.gov/documentcenter/view/31602) and City’s Design & Construction Manual (https://www.norfolk.gov/DocumentCenter/View/21350) for details.</td></tr>
<tr><td rowspan="2">Part I.B.2.b (Retrofitting on Prior Developed Lands)</td><td>Each annual report shall include a status update for those projects for which implementation began during the reporting period.
• See Appendix 2. https://www.norfolk.gov/DocumentCenter/View/27619</td></tr>
<tr><td>For retrofit projects that do not serve to meet the requirements of Part I.D, the permittee shall submit a summary of projects implemented during the reporting period with each annual report including type of land use being retrofitted, retrofit performed, completion date or anticipated completion date, total acreage retrofitted, total impervious and pervious acreage, and location by latitude and longitude (in decimal degrees).
• NA – All retrofit projects serve to assist in meeting the requirements of Part I.D (TMDL Action Plans and implementation) of the MS4 permit.</td></tr>
<tr><td rowspan="2">Part I.B.2.c (Roadways)</td><td>No later than 24-months after the effective date of this state permit, the permittee shall develop and maintain an accurate list of permittee maintained roads and streets, that includes the street name, the miles of roadway not treated by BMP’s, and miles of roadway treated with BMP’s.
• Due June 2018.</td></tr>
<tr><td>No later than 36-months after the effective date of this state permit, the permittee shall develop and implement written protocols for permittee maintained road, street, and parking lot maintenance designed to minimize pollutant discharge. The permittee shall include a copy of the written protocols…with the next annual report that is due after development of the protocols.
• Due October 1, 2019.</td></tr>
<tr><td>Part I.B.2.d (Pesticide, Herbicide, and Fertilizer Application)</td><td>The annual report due October 1, 2017 shall contain a list of all permittee lands and applicable acreage on which nutrients are applied to more than one contiguous acre.

</td></tr>
<tr><td></td><td>Each annual report shall report on compliance with the turf and landscape nutrient management plan implementation schedule and include a list of the permittee’s properties for which turf and landscape nutrient management plans have been implemented during the reporting year and the cumulative total of acreage under turf and landscape management plans.
Due October 1, 2018 – Not less than 15% of all identified acres will be covered by turf and landscape management plans.
Due October 1, 2019 – Not less than 40% of all identified acres will be covered by turf and landscape management plans.
Due October 1, 2020 – Not less than 75% of all identified acres will be covered by turf and landscape management plans.</td></tr>
<tr><td></td><td>Each annual report shall include the number of acres managed under Integrated Pest Management Plans.
The Norfolk Department of Public Health manages and tracks the permittee lands managed under Integrated Pest Management (IPM) Plans. The City utilizes IPM to manage the mosquito and rodent populations City-wide, for a total of 66 square miles, or 42,240 acres.</td></tr>
<tr><td>Part I.B.2.e (Illicit Discharges and Improper Disposal)</td><td>Each annual report shall include a list of illicit discharges identified, the source, a description of follow-up activities and whether the illicit discharge has been eliminated.
See Appendix 3 for copies of all illicit discharge 5-day letters submitted to DEQ during FY17, as well as a list of sanitary sewer overflows reported to SSORS by Public Utilities.</td></tr>
<tr><td></td><td>Each annual report shall include the amount of linear feet of sanitary sewer (a minimum of 724,000 linear feet annually) inspected during the reporting year.
The City inspected 854,150 linear feet of sanitary sewer during FY17.</td></tr>
<tr><td></td><td>The annual report due October 1, 2017 shall include a description of the procedures the permittee will implement to reduce floatables…including procedures to determine the floatables reduction program effectiveness.
This criterion is accomplished through participation in the International Coastal Cleanup. The International Coastal Cleanup takes place September 1st through October 31st encouraging the removal of trash from our beaches and waterways around the world. This cleanup is fueled by volunteer organizations and individuals as a means to change behavior toward cleaner, healthier waterways. In 2016, Keep Norfolk Beautiful supported this initiative throughout the months of September and October. Trash was collected and recorded from various sites across Norfolk. In 2017, Keep Norfolk Beautiful will be hosting ICC again. The 2016 results will be the baseline of comparison for 2017 to determine the effectiveness of reducing floatables. Specific data from 2016 International Coastal Cleanup Event is listed below.
PDF of ICC (more information); https://oceanconservancy.org/wp-content/uploads/2017/06/International-Coastal-Cleanup_2017-Report.pdf</td></tr>
</table>

Permit Section	Specific Reporting Requirement and Result
	• Participation in International Coastal Cleanup is conducted by registration through Virginia Clean Waterways. • See Appendix 4 for event flyers.
	Each annual report after program development shall include a list of sites surveyed for floatables, a summary of observations at each site, and a determination as to the effectiveness of the floatables program. • International Coastal Cleanup Data o 152 volunteers total o Collected 3989lbs of trash o At each site, volunteers mark their findings including cigarette butts, food wrappers (candy, chips, etc.), Take out/away containers (plastic), Take out/away containers (foam), bottle caps (plastic), bottle caps (metal), lids (plastic), straws/stirrers, forks/knives/spoons, beverage bottles (plastic), beverage bottles (glass), beverage cans, grocery bags (plastic), other plastic bags, paper bags, cups/plates (paper), cups/plates (plastic), cups/plates (foam), fishing buoys/pots/traps, fishing net and pieces, fishing line, rope, fishing gear, 6-pack holders, other plastic/foam packaging, plastic bottles (oil and bleach), strapping bands, tobacco packaging/wrap, other packaging, appliances, balloons, cigar tips, cigarette lighters, construction materials, fireworks, tires, toys, other trash, condoms, diapers, syringes, tampons, personal hygiene items, foam pieces, glass pieces, plastic pieces. o List of sites: ▪ Ocean View Beach Park ▪ East Ocean View Community Beach Park ▪ Bay Dunes Drive ▪ Ocean view Pier ▪ Community Beach Park ▪ Willoughby Spit ▪ 25th Street and Bowdens Ferry Road ▪ Cottage Place Beach ▪ Wetland: Pope and Somme ▪ 1800 E Ocean View – 1300 E Ocean View ▪ Sarah Constance Beach Park ▪ Tidewater from Little Creek to Bayview ▪ E Princess Anne Road from Park Ave to Ballentine Blvd ▪ Curlew Drive from Feeder Road to Light Rail Station ▪ Spot: Military Garden ▪ Beach – 21st Bay Street Down to 30th Bay Street ▪ Admiral Taussig Blvd from Granby Street to E. Little Creek Blvd. • See Appendix 4 for data excel spreadsheet.
	The permittee shall ensure the implementation of programs to collect used motor vehicle fluids (such as oil and antifreeze) and HHW waste materials for recycling, reuse, or proper disposal. Such programs shall be readily available to all private residents and shall be publicized and promoted on a regular basis not less than twice per year. • Keep Norfolk Beautiful hosts two recycling drives every year for Norfolk citizens to easily and safely recycle HHW waste materials at no charge. • Norfolk residents are invited to participate in the fall America Recycles Day event and the spring Norfolk Recycles Day event, each year. This event is open to the public, and is an electronics, recycling, and household hazardous waste (HHW) event, at the City's Waste Management Facility, located at 1176 Pineridge Road. In partnership with Goodwill

Permit Section	Specific Reporting Requirement and Result

	Industries and TFC Recycling, the event offers Norfolk residents a one-stop location to drop unwanted items such as acceptable recyclable items, household hazardous waste, electronics, unwanted household items, and used clothing.
	• Data
	  o Fall 2016 Event – America Recycles Day
	  ▪ 309 Participants
	  ▪ 6 partners involved (City of Norfolk Waste Management, Goodwill, TFC Recycling, Iron Mountain Shredding, Recycling Perks, Bay Star Homes)
	  ▪ 360 lbs general recyclables collected
	  ▪ 2,630 lbs of paper shredded and recycled
	  ▪ 6 lbs of plastic film/bags recycled
	  ▪ 5,240 lbs of electronics recycled
	  ▪ 2, 120 lbs of clothing/textiles recycled
	  ▪ See Appendix 4 for HHW detailed items list
	  o Spring 2017 Event – Norfolk Recycles Day
	  ▪ 230 Participants
	  ▪ 6 partners involved (City of Norfolk Waste Management, Goodwill, TFC Recycling, Iron Mountain Shredding, Recycling Perks, Southeastern Food Bank)
	  ▪ 480 lbs general recyclables collected
	  ▪ 5,705 lbs of paper shredded and recycled
	  ▪ 2 lbs of plastic film/bags recycled
	  ▪ 2,630 lbs of electronics recycled
	  ▪ 3,585 lbs of clothing/textiles recycled
	  ▪ See Appendix 4 for HHW detailed items list
	• Promotion
	  o Social Media – both Keep Norfolk Beautiful and City of Norfolk
	  ▪ Instagram, Twitter, Facebook
	  o Flyers in libraries, rec centers, downtown, local events, Keep Norfolk Beautiful Office, Waste Management Office
	  o Compass ad
	  o Recycling Perks newsletter
	  o Volunteer Newsletter
	  o City of Norfolk Website – front page and Keep Norfolk Beautiful page
	  o Next Door
	  o Notice to Neighborhood Specialists
	  o Notice to Civic Leagues
	  o Library electronic kiosk
	• In addition, the City operates a HHW collection service that is free for Norfolk residents. Proof of residency is required, and the site is located at the Division of Waste Management at 1176 Pineridge Road. The site is operated Monday – Saturday from 10am – 2pm.
	• See Appendix 4 for event flyers and lists of items collected, as well as a list of items accepted at the City's HHW collection site and a spreadsheet documenting items collected during FY17.

Part I.B.2.f (Spill Prevention and Response)	Each annual report shall include a list of spills, that qualify for immediate reporting as required…of this state permit, the source (identified to the best of the permittee's ability), and a description of follow-up activities taken. • See Appendix 3 for copies of all illicit discharge 5-day letters submitted to DEQ during FY17, as well as a list of sanitary sewer overflows reported to SSORS by Public Utilities.

Permit Section	Specific Reporting Requirement and Result
Part I.B.2.g (Industrial & High Risk Runoff)	The annual report due October 1, 2017 shall include a list of all known industrial and high risk dischargers including any non-VPDES regulated industrial and commercial stormwater dischargers determined by the permittee as contributing a significant pollutant load and that discharge to the MS4 system, and a schedule of inspections and procedures for inspecting outfalls. • See Appendix 5 for High-Risk Commercial and Industrial Outfall Inspection Program SOP.
	Each annual report shall report on implementation of the inspection schedule and include a list of the facilities and/or facility outfalls inspected during the reporting period. • See Appendix 5 for a list of facility outfalls inspected during FY17.
	Each annual report shall include a list of referrals to the Department, including: The permittee shall maintain a list of any industrial and/or commercial stormwater dischargers not regulated under the Virginia State Water Control Law that it determines may be contributing a significant pollutant loading to the MS4, report those facilities to the Department, and include the facilities outfall in the prioritized inspection schedule. • NA – None in FY17 The permittee shall refer facilities and operations having non-stormwater discharges that do not have coverage under an existing VPDES permit. • NA – None in FY17 The permittee shall refer facilities and operations identified…with manufacturing, processing, or raw material storage outside that do not have coverage under an existing VPDES industrial stormwater permit. • NA – None in FY17 The permittee shall refer any VPDES industrial stormwater permit facility where there is evidence of significant pollutant loadings to the MS4. • See Appendix 5 for facilities list. The permittee shall refer facilities that do not submit signed copies of DMR's to the permittee as required under a VPDES industrial stormwater permit. • See Appendix 5 for facilities list.
Part I.B.2.h (Stormwater Infrastructure Management)	The permittee shall submit with the annual report due October 1, 2017 the written inspection and maintenance procedures. • See Appendix 6 for Storm Water Infrastructure Inspection Program SOP. Also see Section 2.8 in the City's MS4 Program Plan (https://www.norfolk.gov/documentcenter/view/31602).
	Each annual report shall include a summary of activities performed in support of the inspections and maintenance program….The summary shall include the total number of drainage structures operated by the permittee; the total length of open conveyance that is part of the permittee's MS4; the total number of the drainage structures inspected (at least 4,060) and the total length of open conveyances inspected (at least 35,460). In addition, the permittee shall maintain records documenting the inspection of drainage structures and open conveyances to include a list of drainage structures inspected, the date inspected, the type of structures, the location, and identified maintenance needs and when the maintenance was performed. • Total # Drainage Structures – 27,065 Total Length of Open Conveyance – 237,600 linear feet Total # Drainage Structures Inspected (at least 4,060) – 8,406 Total Length of Open Conveyances Inspected (at least 35,460 linear ft) – 145,753 linear ft
	The annual report due October 1, 2017 shall include the permittee's strategy to address maintenance of stormwater management controls that are designed to treat stormwater runoff solely from the individual residential lot on which they are located.

Permit Section	Specific Reporting Requirement and Result
	• See Section 2.8 in the City's MS4 Program Plan (https://www.norfolk.gov/documentcenter/view/31602).
	Each annual report shall provide a summary of actions taken by the permittee to address failure of privately maintained SWM facilities owners to abide by maintenance agreements. • See Appendix 7 for Storm Water Best Management Practice Inspections SOP. Also see section 2.8 in the City's MS4 Program Plan.
	Each annual report shall include a list of activities including inspections performed and notifications of needed maintenance and repair of stormwater facilities not operated by the permittee as required…. • See Appendix 7 for Storm Water Best Management Practice Inspections SOP and a comprehensive list of private and public SWMF inspections and reinspections conducted during FY17. Also see section 2.8 in the City's MS4 Program Plan.
	The MS4 service area map including outfalls and information included in Part I.B.2.h)3) shall be submitted no later than 18 months after the effective date of this state permit. • Due January 1, 2018.
	The annual report due October 1, 2018 submitted under this state permit shall include the information included in Part I.B.2.h)4). • Due October 1, 2018.
	The annual report due October 1, 2021 shall include as updated list of all information requested in Part I.B.2.h)5). • Due October 1, 2021.
Part I.B.2.i (City Facilities)	The annual report due October 1, 2017 shall include a list of all high priority municipal facilities. • See Appendix 8.
	The permittee shall develop and/or update and implement individual SWPPP's for each high-priority municipal facility…no later than 36-months after the effective date of this state permit. • See Appendix 8.
	No later than the expiration date of this state permit, the permittee shall install and maintain markings on all stormwater inlets located on high-priority municipal facilities…and on permittee properties with greater than 2-acres of impervious area. • Due June 2021.
Part I.B.2.j (Public Education & Participation)	Each annual report shall include a list of permittee public outreach and education activities and the estimated number of individuals reached through the activities. An evaluation of program effectiveness, as outlined in the MS4 Program Plan with recommendations for future changes shall also be included. • In May 2017, letters were sent to the 3 City owned golf courses in Norfolk (Lamberts Point, Sewells Point, and Ocean View) encouraging the implementation of integrated management practice plans and techniques to reduce runoff of fertilizer, pesticides, and other pollutants to the City's storm water system. See Appendix 9 for a copy of the letter. • The City also has a program that requires all residents applying for a business license for a mobile car wash to sign an application with the Division of Environmental Storm Water management. The application provides explanation of the City's code and offers options to not discharging wash water into the City's storm water system. A total of 6 business owners signed the application in FY17. See Appendix 9 for a copy of the application. • For the past few years, there has been an emphasis on educating the pet care facilities via site visits and the distribution of educational information. The focus during FY17 was on doggie day care facilities, groomers, boarders, and kennels. During FY17 a total of 11 businesses were visited by staff. • See Appendix 9 for a list of additional presentations, workshops, cleanups, beautification events, and other activities conducted by both Keep Norfolk Beautiful and the Division of

<tr><td>Part I.B.2.m (Infrastructure Coordination)</td><td>The permittee shall coordinate with the Virginia Department of Transportation (VDOT) regarding issues of MS4 physical-interconnectivity. As part of its Annual Report, the permittee shall document coordination efforts with VDOT that occurred during the reporting year regarding: mapping, Chesapeake Bay TMDL Action Plans, other TMDL Action Plans, credit for TMDL implementation, IDDE, and water quality monitoring.</td></tr>
</table>

Permit Section	Specific Reporting Requirement and Result
	• A VDOT MS4 Coordination Meeting was held May 9, 2017. See Appendix 12 for a detailed copy of the meeting minutes.
Part I.C.1 (In-System/Wet Weather Monitoring)	The annual report due October 1, 2017 shall include the list of sites to be monitored during the term of the state permit and monitoring protocols. • See Appendix 13 for a copy of the Annual Report for the Regional In-system Wet Weather Stormwater Monitoring Program.
	Each annual report shall include a summary of the monitoring results and analyses and an interpretation of that data. • See Appendix 13 for a copy of the Annual Report for the Regional In-system Wet Weather Stormwater Monitoring Program.
Part I.C.2 (Street Sweeping Program Monitoring)	No later than twelve (12) months after permit effective date, the permittee shall submit to the Department the list of sites to be monitored, the methodology and the monitoring protocols. The monitoring protocols shall be incorporated into the MS4 Program Plan. • Street Sweeping Monitoring Plan submitted to DEQ June 28, 2017.
	Each subsequent annual report shall include a summary of the monitoring results and analyses and an interpretation of that data with respect to long-term patterns/trends. • Due October 1, 2018.
	Final results and analyses shall be submitted with the permit application for the reissuance of this state permit due 180 days prior to the permit's expiration date. • Due December 30, 2020.
Part I.C.3 (Structural and Source Controls Compliance Monitoring and Tracking)	The permittee shall maintain an updated electronic database of all known permittee and privately maintained stormwater management (SWM) facilities. Each annual report shall include a copy of the updated database in electronic format of all SWM facilities brought online during each reporting year. • See Appendix 7 for a list of all SWM facilities brought online during FY17.
	Each annual report shall include a summary of actions taken by the permittee to ensure maintenance of private stormwater management facilities. • See Appendix 7 for Storm Water Best Management Practice Inspections SOP and a comprehensive list of private and public SWMF inspections and reinspections conducted during FY17. Also see section 2.8 in the City's MS4 Program Plan.
	Each annual report shall include a summary of the program to ensure maintenance of stormwater management facilities maintained by the permittee. • See Appendix 7 for Storm Water Best Management Practice Inspections SOP and a comprehensive list of private and public SWMF inspections and reinspections conducted during FY17. Also see section 2.8 in the City's MS4 Program Plan.
Part I.D.1.b) & d) (Chesapeake Bay Watershed TMDL Planning & Annual Reporting Requirements)	No later than 24- months after the effective date of this state permit, the permittee shall develop and submit to the Department for its review and approval a phased Chesapeake Bay TMDL Action Plan. • Due June 2018.
	Each subsequent annual report shall include a list of control measures implemented during the reporting period and the cumulative progress toward meeting the compliance targets for TN, TP, and TSS. • Due starting October 1, 2019.
	Each subsequent annual report shall include a list of control measures that were implemented during the reporting cycle and the estimated reduction achieved by the control. For stormwater management controls, the report shall include…whether an existing stormwater management control was retrofitted, and if so, the existing stormwater management control type retrofit used. • Due starting October 1, 2019.

Permit Section	Specific Reporting Requirement and Result
	Each annual report shall include a list of control measures that are expected to be implemented during the next reporting period and the expected progress toward meeting the compliance targets for TN, TP, and TSS. • Due starting October 1, 2019.
	The permittee shall include the following as part of its reapplication package: (a) documentation that sufficient control measures have been implemented (or documentation detailing that implementation will be complete by the expiration date of this state permit) to meet the compliance target identified in this Special Condition, and (b) a draft second phase Chesapeake Bay TMDL Action Plan. • Due December 30, 2020.
Part I.D.2 (TMDL Action Plans other than the Chesapeake Bay TMDL)	No later than 24 months after the effective date of this state permit, the permittee shall submit to the Department TMDL Action Plans to address any new or modified requirements established under this Special Condition for pollutants identified in TMDL wasteload allocations approved prior to the effective date of this permit. • Due June 2018.
	The permittee shall submit the required TMDL Action Plans to the Department for review and acceptance with the appropriate annual report associated schedule identified in this permit. • Due starting October 1, 2019.
	The permittee shall report on the implementation of the TMDL Action Plans and associated evaluation including the results of any monitoring conducted as part of the evaluation. • Due starting October 1, 2019.
	The permittee shall identify the best management practices and other steps that will be implemented during the next permit term as part of the permittee's reapplication for coverage as required. The permittee shall also evaluate and modify the estimated end date for achieving the applicable wasteload based on information acquired during the permit cycle. • Due December 30, 2020.

Project Description

Provide funds to create a citywide flooding reserve to prepare for the larger citywide flooding control projects. This project is funded by the $1.00 Storm Water fee increase approved in FY 2013. Funding will be dedicated to support the city's efforts in flood mitigation.

Project Description

Provide funds to continue best practices used to reduce storm water related pollutants entering local waterways, rivers, and the Chesapeake Bay. Planned work includes the continuation of the wetlands restoration initiative, led by the Army Corps of Engineers, and a systematic program for dredging of silted-in and obstructed storm water outfalls around the city. The increase in funding will ensure storm water compliance with regulatory standards are met by 2030.

Storm Water Management

Mission Statement

As part of Public Works Operations, Storm Water Management strives to improve the quality of life of Norfolk's residents, business owners, and visitors by improving the environment through reducing pollutants in storm water discharges. Storm Water Management also mitigates flooding thereby reducing property damage and threats to life, health, and inconveniences.

Department Overview

The Division of Storm Water Management focuses on five prominent categories of work: environmental permit management and regulatory compliance, Capital Improvement Program (CIP) and debt service, flood reduction, system operation and maintenance, and street sweeping. Staff is comprised of professional engineers, environmentalists, and operations personnel that coordinate to meet the division's goals of reducing flooding and preventing pollution. The Division of Storm Water Management receives oversight from the Department of Public Works.

Actions to Achieve Long-Term Goals and Short-Term Objectives

Ongoing Actions	Status
Implement a wide variety of projects and programs to mitigate impacts from coastal and precipitation flooding by addressing preventable contributors	Ongoing

Performance Measures

Priority: Environmental Sustainability					
Goal					
Enhance efficient use and protection of natural resources					
Objective					
Prevent pollutants and debris from entering the storm water system					
Measure	**FY 2015 Actual**	**FY 2016 Actual**	**FY 2017 Adopted**	**FY 2018 Adopted**	**Change**
Miles of curb cleaned through street sweeping	41,098	53,755	50,000	50,000	0
Number of tons of debris removed by street sweeping	7,602	7,967	7,000	7,000	0

Priority: Environmental Sustainability					
Goal					
Reduce the negative impacts of flooding					
Objective					
Keep Norfolk's drain/storm water structures clean and free from debris					
Measure	**FY 2015 Actual**	**FY 2016 Actual**	**FY 2017 Adopted**	**FY 2018 Adopted**	**Change**
Number of drain structures cleaned annually	7,027	6,231	7,000	7,000	0

Revenue Summary

	FY 2015 Actual	FY 2016 Actual	FY 2017 Adopted	FY 2018 Adopted
Use of Money and Property	$7,781	$7,789	$565	$565
Charges for Services	$15,139,017	$15,556,193	$16,410,285	$16,422,016
Miscellaneous Revenue	$151,937	$88,515	$112,000	$45,000
Other Sources and Transfers In	$0	$0	$6,116	$6,116
Federal Aid	$13,063	$0	$0	$0
Total	$15,311,798	$15,652,497	$16,528,966	$16,473,697

Actual amounts represent collections, not appropriation authority.

Expenditure Summary

	FY 2015 Actual	FY 2016 Actual	FY 2017 Adopted	FY 2018 Adopted
Personnel Services	$4,915,999	$5,480,030	$5,710,046	$5,877,611
Materials, Supplies and Repairs	$2,302,862	$2,378,593	$3,819,961	$3,801,543

Equipment	$1,263,860	$453,528	$474,725	$789,225
Department Specific Appropriation	($35,749)	$7,437	$0	$0
Debt Service/Transfers to CIP	$4,598,837	$4,414,018	$4,728,370	$4,728,370
Total	$15,049,766	$15,518,605	$16,528,966	$16,473,697

Estimated Appropriation for Special Revenue Summary

The following special revenue summary includes additional funds received by the department through grants, donations, and dedicated state and federal appropriations. Funds are generally multi-year appropriations and may continue from one fiscal year to another. Monies are dedicated to specific activities and/or functions and are nontransferable. Grants are not guaranteed annually. Amounts represented were available as of March 2017.

	Dollars	Source	Pos #
Special Revenue (for example: Grants, Revenue Sharing, Donations)	$5,400,987	National Fish & Wildlife Foundation Grants	0
		Stormwater Local Assistance Fund Grants	

Adopted FY 2018 Budget Actions

- **Implement Phase IV of ARMD Compensation Strategy** **FY 2018 $40,740** **FTE: 0**

  Implement Phase IV of the compensation strategy as part of the Attraction, Retention, Motivation, and Development (ARMD) initiative. FY 2018 includes: a two percent salary increase for general and constitutional officer employees; a step increase for sworn employees; an increase to the permanent employee living wage; and salary range adjustments to the city's most regionally out of market positions. All actions will be effective January 2018.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Add Equipment Operator II position** **FY 2018 $31,992** **FTE: 1**

  Provide funds for an Equipment Operator II position to operate a mini street sweeper and leaf-vacuum to sweep bike lanes and other city-owned properties in addition to cleaning curb lines and ditches.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Add Construction Inspector II position** **FY 2018 $67,400** **FTE: 1**

  Provide funds for a Total Maximum Daily Load (TMDL) Construction Inspector II position and vehicle to oversee construction of water quality and flood reduction projects. New regulatory water quality mandates increase the amount of inspections and oversight of the city's construction projects. The current staffing of two Civil Engineers is not sufficient to sustain the existing work load and fulfill the enhanced requirements.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Add Senior Design Construction Project Manager** **FY 2018 $69,948** **FTE: 1**

  Provide funds for a Senior Design Construction Project Manager position. This position will oversee storm water general operations.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Adjust operational expenses** **FY 2018 ($390,379)** **FTE: 0**

  Technical adjustment to adjust funds for operational expenses which occurs annually. These expenses include vehicle maintenance, fuel, indirect costs, and materials and supplies for operations.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Remove one-time funds for time and attendance software costs** **FY 2018 ($10,871) FTE: 0**

  Technical adjustment to remove one-time funds provided in FY 2017 for the enhancements related to the Time and Labor and Absence Management modules of the city's personnel system. This adjustment supports the final four months of the contract and the purchase of required biometric timekeeping devices. FY 2017 completed the three-year implementation timeline.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Remove one-time funds for vehicle purchase** **FY 2018 ($23,000) FTE: 0**

  Technical adjustment to remove one-time funds provided in FY 2017 for the purchase of a pick-up truck

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Remove one-time funds for Storm Water rod machine** **FY 2018 ($40,000) FTE: 0**

  Technical adjustment to remove one-time funds provided in FY 2017 for a rod machine to clean out storm water pipes.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Remove one-time funds for Storm Water trailer** **FY 2018 ($3,000) FTE: 0**

  Technical adjustment to remove one-time funds provided in FY 2017 to purchase a trailer to prevent fluid spills into the drainage system.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Adjust costs for Fleet expenditures** **FY 2018 $16,257 FTE: 0**

  Technical adjustment to update the funding needed to support Fleet expenditures based on an annual cost revision calculation. Fleet provides maintenance, fuel, and the management of vehicles for essential operations of the department. This is a routine adjustment which occurs each budget cycle.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Annualize Phase III of ARMD Compensation Strategy** **FY 2018 $60,079 FTE: 0**

  Technical adjustment to annualize ARMD Phase III compensation actions that occurred in January 2017. The Adopted FY 2017 Budget included funds for: a two percent salary increase for general and constitutional officer employees; a $50 increase to the permanent employee living wage; and salary range adjustments to the city's most regionally out of market positions.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Adjust required contribution to the city's retirement system** **FY 2018 $75,005 FTE: 0**

  Adjust the annual required contribution to the Norfolk Employee's Retirement System (NERS). Retirement contributions are based on a formula that calculates the funds needed to meet present and future retirement payments. The contribution amount for the city will increase from 17.79 percent to 18.53 percent in FY 2018. Costs are distributed to departments based on each department's NERS eligible payroll.

  Priority Area(s) Met: Safe, Healthy, and Inclusive Communities

- **Update personnel expenditures** **FY 2018 $50,560 FTE: 0**

  Technical adjustment to update department costs for personnel services. Changes include updates to staffing due to administrative actions, consolidations, or reorganization efforts and the funds needed in FY 2018 for these actions. The adjustment also reflects updated healthcare costs for an overall citywide premium increase of seven percent based on enrollment. These are routine actions which occur at the beginning of the budget cycle.

Storm Water Management **Total: ($55,269) FTE: 3**

					TOTAL	**$ 641,012.88**

Capital Improvement Projects (CIP) Funded by Storm Water Utility Funds

The City of Norfolk continues to make significant upgrades to the storm water infrastructure to fulfill our two-pronged mission of reducing storm water flooding and improving storm water quality. The City uses three main funding avenues to support these improvements:

- Direct storm water capital improvements supported by the storm water utility
- General capital improvements funded through the City's capital improvement program supported by general tax sources and
- Annual operations funds from the storm water utility.

Additional projects may be completed by developers and turned over to the City to become part of the storm water infrastructure.

The storm water capital improvement fund is further divided into four major categories:

- Neighborhood Flood Reduction
- Water Quality Improvement
- Storm Water Facilities Improvements
- Storm Water Waterfront Facilities

The total annual investment in storm water capital improvements has been $3.5 million per fiscal year. However, due to project timing the annual expenditures can sometimes be substantially higher and/or lower than the appropriated amounts.

Neighborhood Flood Reduction

Neighborhood Flood Reduction projects are major repairs and upgrades to the storm water infrastructure that result in the extension of the storm water collection and conveyance systems or substantially extend the life of the existing systems. Projects under taken include sliplining, master plan studies, system replacements and upgrades. Sliplining means to slip a plastic liner in existing pipe that is no longer serviceable. The new liner extends the service life of the pipe without having to dig up and replace the existing pipe. Capacity is not diminished due to the liner smoothness. Master plan studies allow the City to determine the condition and capacity of the existing pipe systems and plan upgrades. Studies of the existing inventory allow for planning and may be used by developers to determine the necessary upgrades for planned redevelopment. Replacement and extensions of storm water infrastructure allows for upgrades of non-serviceable sections of the collection and conveyance system where required to reduce flooding.

Water Quality Improvements

Water Quality Improvement projects improve the quality of storm water runoff. Projects in this category include construction of best management practices (BMPs), wetlands restoration and similar projects. BMP projects include construction of detention and retention ponds, as well as major BMP maintenance, such as dredging and installation of aeration systems. Wetlands restoration projects have the potential to significantly improve storm water runoff and are being reviewed and planned throughout the City. Water quality efforts are currently focused on retrofitting existing BMP's to achieve improved pollution reduction.

Storm Water Facilities Improvements

Storm Water Facilities include improvements to flood control and underpass pumping stations throughout the City. Substantial investments have been made due to years of deferred maintenance. In FY17, funds were primarily allocated for the design and rehabilitation for Pump Station #5 (Brambleton Avenue) and Pump Station #9 (Virginia Beach Boulevard).

Storm Water Waterfront Facilities

Storm Water Waterfront facilities provide funding for projects to improve shoreline bulkheads, floodwalls, floodgates, outfalls and other similar facilities for the City. These projects reduce erosion that is caused by non-serviceable infrastructure and protect public and private property against coastal flooding.

Funding of the CIP is by fiscal year. Storm Water CIP funding is expected to continue for the foreseeable future. Projects utilizing and/or having funds allocated in FY17 are listed in the following Table.

PROJECTS	PROJECT COSTS	BUDGET AMOUNT
Neighborhood Flood Reduction		**$1,450,000**
W.23rd Street and Colonial Avenue Improvements (Extending to Gosnold Ave. & W. 25th Street)	$300,000	
Kennebeck Rd. & Azalea Garden Rd. Improvements	$950,000	
Storm System Repairs/Replacement/Sliplining	$200,000	
	$1,450,000	
Storm Water Quality Improvement		**$950,000**
Jeff Robertson Park Stormwater Wetland		
Parkdale Channel Improvements		
Ballentine Elementary School WQ Retrofit		
Norfolk Juvenile Detention Center WQ Retrofit		
Anne Outten Pond Retrofit		
Lake Modoc Retrofit		
Lake Taylor Retrofit		
Dune Street Stormwater Wetland		
Templar Channel Stabilization		
Central Business Park Pond Retrofit		
Roberts Road Pond Retrofit		
Hague Stormwater Wetland		
	$950,000	
Storm Water Facility Improvement		**$600,000**
Pump Station #5 and Pump Station #9 Design and Rehabilitation	$600,000	
	$600,000	
Storm Water Waterfront Structures		**$500,000**
Outfall Extensions and Rehab (Beach Nourishment Project) & Sturgis Street Outfall Extension	$500,000	
	$500,000	
		$3,500,000

City's General CIP and Other Major City Project Financing

The second main source to fund storm water improvements is through the City's general CIP. These funds are used to develop projects that serve a specific need or are directed to specific development, redevelopment or similar projects. Projects funded by general CIP are generally flood reduction projects that will upgrade or expand the storm water system to address certain neighborhood flooding. Other projects funded through general CIP are designed to support a large scale development project. These projects tend mostly to reduce storm water flooding, though may also include water quality projects on a more regional basis.

Address Street Flooding Citywide

FY17	$1,500,000

On-Going and Planned Projects to be completed with the above funds

East Ocean View Drainage Improvements	$400,000
Spartan Village Acquisition	$200,000
Standing Water and Minor Flooding Fund	$150,000
VDOT Revenue Projects	$750,000

Street Sweeping Signage

Beyond sliplining projects, the operations component of the storm water utility fund financed the installations of new signage for the new once-a-month street sweeping program. In FY08, all regulatory no parking signs associated with street sweeping were replaced and the program is still ongoing. Where regulatory signs are not appropriate, advisory signs will be installed. These signs will inevitably make the monthly street sweeping program more effective by educating residents to move their automobiles during scheduled street sweeping. This will improve storm water quality by reducing the pollutants available to be washed in the waterways.

MS4 Program Plan - Section 2.2 - Planning and Retrofitting Storm Water Quality Projects

Project	Status	Project Type	Treatment Area (ac)	Impervious Treatment Area (ac)	Pervious Treatment Area (ac)	Condition of Downstream Channel	Nitrogen Reduction (lbs/yr)	Phosphorous Reduction (lbs/yr)	TSS Reduction (lbs/yr)	Feasability of Implementation	Estimated Cost

Stormwater Water Quality Projects

Stormwater runoff often carries pollutants such as nitrogen, phosphorous, and sediment which can cause increased algae blooms, low oxygen, fish kills and other problems in local waterways. The US Environmental Protection Agency's Chesapeake Bay TMDL targets these pollutants for reduction across various sectors. In large urban cities like Norfolk, requirements for these Bay TMDL reductions are managed through the City's MS4 permit.

To ensure compliance with expected and now approved additions to the MS4 permit, since 2012 the Department of Public Works has expanded efforts to identify, design, and construct water quality improvement projects. Improvements such as upgrades of existing ponds, creation of new stormwater features, and restoration of streams and shorelines all help to trap, filter, or remove pollutants.

In addition to efforts by other City departments, local partner organizations, and regulated development activity, completion of the following projects will provide adequate credit to ensure the City achieves completion of it's required pollution reduction in the first permit cycle, from 2016-2021. Each project has been funded through City Council approved capital funds and over $7 million in awarded grant funds. Design and implementation of additional improvements will continue through this current permit cycle and in future permit cycles, with increased focus on flood management, coastal resiliency and other co-benefits that can be achieved.

Greenway Park Retention Pond

Project Narrative: The project constructed a stormwater retention pond in a frequently flooded park open space. Wetland benches, buffer plantings, access paths, and a floating wetland were included.

PROJECT STATUS: Complete

PROJECT SCHEDULE:

Design Completion: Winter 2014
Construction Start: Spring 2014
Construction Completion: Spring 2015

RE: VPDES Permit No. VA0088650
Ref. ID #69275

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of waste oil on 8/1/2016 at 1:00PM at 3536 E. Little Creek Road in Norfolk, VA. The description of the incident is as follows:

Approximately 3000 gallons of waste oil from a UST on the property was released during a heavy rain/flooding event. It appears that most of the product was released into Little Creek during the storm. PetroChem was hired to clean the streets and storm drains, and also to pump any remaining product from the UST's onsite. The Fire Marshal's Office is requiring the proper closure of the UST's.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 8/1/2016 at 1:00PM, and again 8/2/2016 at 8:45AM.

Please let me know if you have any questions regarding this incident.

Sincerely,

Casey Magruder

RE: VPDES Permit No. VA0088650
Ref. ID #70334

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of gasoline on 8/9/2016 at 6:00PM at the intersection of Park Avenue and Brambleton Avenue in Norfolk, VA. The description of the incident is as follows:

Approximately 25 gallons of gasoline was released into the street after a citizen's vehicle gas line ruptured. The local Fire Department was able to contain the spill from the slow leak, and PetroChem was hired to recover the product and clean the street. No storm drains or waterways were affected.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 8/10/2016 at 1:50PM.

Please let me know if you have any questions regarding this incident.

Sincerely,

Casey Magruder

Re: VPDES Permit No. VA0088650
IR 72156

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of waste motor oil on 8/24/2016 11:30:00 AM (36.888335125438, -76.30192895312). The description of the incident is as follows:

I went to inspect the stormwater BMP (a Filterra unit) at the Miller Neighborhood Market at 4900 Hampton Boulevard. When I arrived I noticed the asphalt was stained from the back of the building leading to the Filterra unit. A waste oil aboveground storage tank (AST) is located on the backside of the building behind the University Car Care shop, and it was the source of the release. It appears that the spilled waste oil flowed across the parking lot and into the Filterra unit. I talked to the manager of University Car Care (Josh Wese 757-423-1323). Mr. Wese said the spill occurred over the weekend and they cleaned it up as best they could with oil dry.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 8/25/2016 9:30:00 AM.

Please let me know if you have any questions regarding this incident.

Respectfully,

Kyle Quick, P.G.

RESPONSIBLE PARTY: ADDRESS& PHONE:	**University Car Care 4900-B Hampton Boulevard, Norfolk, VA 23508 (757) 423-1323**
DATE OF DISCHARGE:	**8/24/2016 11:30:00 AM**
DATE/TIME REPORTED:	**8/25/2016 9:30:00 AM**
REPORTED TO DEQ BY:	**Kyle Quick**
REPORTED TO:	**Online PREP**
DESCRIPTION OF DISCHARGE:	**I went to inspect the stormwater BMP (a Filterra unit) at the Miller Neighborhood Market at 4900 Hampton Boulevard. When I arrived I noticed the asphalt was stained from the back of the building leading to the Filterra unit. A waste oil aboveground storage tank (AST) is located on the backside of the building behind the University Car Care shop, and it was the source of the release. It appears that the spilled waste oil flowed across the parking lot and into the Filterra unit. I talked to the manager of University Car Care (Josh Wese 757-423-1323). Mr. Wese said the spill occurred over the weekend and they cleaned it up as best they could with oil dry.**
CORRECTIVE ACTION:	**Mr. Wese with University Car Care said the spill occurred over the weekend and they cleaned it up as best they could with oil dry. I also spoke with the manager of the Miller Neighborhood Market Store (responsible for maintaining the Filterra unit) about it and sent them a letter stating the oil-contaminated filter media within the Filterra unit needs to the removed, properly disposed of, and replaced.**

IMPACT TO STATE WATERS: **unlikely**

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system of those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. Re: VPDES Permit No. VA0088650
IR 73056

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of Cooking Oil and Grease on 9/1/2016, 1:25:00 PM (36.954860811534, -76.25417222161). The description of the incident is as follows:

Received notification from a City of Norfolk Depart of Utilities inspector about grease coming out of a roof drain behind the Osaka Express Hibachi restaurant at 191 W. Ocean View Ave. in Norfolk, Virginia. The restaurant is located within a strip mall. I spoke with the property manager (Mr. John Shourdes of S.L. Nausbaum) and he said they have a grease trap on the roof that collects grease from the hood ventilation system over the cooking range. Upon inspection the grease trap was damaged (quarter-size hole in base of trap) and was leaking oil and grease onto the roof, into the roof gutter, down the downspout, and into the parking lot behind the restaurant. The Norfolk Fire Marshall's Office also inspected the incident and "red tagged" their cooking equipment (meaning they cannot cook) until the issues were addressed since it is not only an illicit discharge but also a fire hazard. The store manager is required to clean and repair the ventilation system and grease trap, and clean the oil and grease from the roof, gutter, downspout, and parking lot.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 9/2/2016, 8:15:00 AM.

Please let me know if you have any questions regarding this incident.

Respectfully,

Kyle B Quick

Re: VPDES Permit No. VA0088650
IR 75527

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of soil on 9/22/2016, at 1:30:00 PM (36.890134303018, -76.23603512425). The description of the incident is as follows:

I noticed a soil stockpile located along the eastern edge of the property at 1231 Norview Avenue. The site is a Shell Gas Station and according to the owner (Ralph Ferraro with Miller Oil Co.) the underground storage tanks USTs were removed from the station a couple of days prior. Reportedly the stockpile is material brought in to backfill the top few inches of the excavation before repaving the area. Twelve inches or more of rain had fallen over the prior 2 days and it was evident that soil had washed off the site from the stockpile and/or excavation onto Humboldt Street and into a storm drain (structure # J103333).

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 9/2/2016, 8:15:00 AM.

Please let me know if you have any questions regarding this incident.

Respectfully,

Kyle B Quick

Re: VPDES Permit No. VA0088650
IR 77163

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of #2 fuel oil on 10/9/2016 at 11:45:00 AM (36.942897517238, -76.25558842797). The description of the incident is as follows:

A reportedly emptied residential #2 fuel oil underground storage tank overflowed oil into the yard at 242 E. Randall Avenue in Norfolk, Virginia. A terra cotta pipe that drains the roof downspout to Hammett Avenue was broken and drained the overflowed oil to Hammett Avenue and to the storm drain located at the northwest corner of the intersection of Hammett Avenue and Randall Avenue. Absorbents were placed around the storm drain, inlet and outlet of terra cotta pipe, and UST source to prevent the spread of the oil release. A cleanup contractor was reportedly contacted by the property owner.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 10/9/2016 3:30:00 PM.

Please let me know if you have any questions regarding this incident.

Re: VPDES Permit No. VA0088650
IR 77164

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of #2 fuel oil on 10/9/2016 at 1:00:00 PM (36.88155492974, -76.24829818387). The description of the incident is as follows:

A reportedly emptied residential #2 fuel oil underground storage tank overflowed oil into the yard at 3564 Buckingham Street due to excessive rain from Hurricane Matthew. Oil flowed out of the yard, into Buckingham Avenue, and east along Buckingham Avenue to the nearest storm drain located approximately 250 feet west of 3564 Buckingham Street. The homeowner recovered approximately 1-2 gallons of fuel oil using a shop vacuum, and tried to mitigate the spread of the oil using dirt. Upon responding, absorbents were placed along the curb line to catch the residual oil flowing down the curb line of Buckingham Avenue. A cleanup contractor arrived onsite at approximately 4:30 pm to cleanup the residual oil in the yard, along the curb line, and the residual oil pooled at 3544 Buckingham Avenue.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 10/9/2016 4:00:00 PM.

Please let me know if you have any questions regarding this incident.

Respectfully,

Re: VPDES Permit No. VA0088650
IR 77481

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of motor oil on 10/12/2016 at 12:30 PM. The description of the incident is as follows:

VDOT recently purchased the property at 1401 N. Military HWY in Norfolk, VA. Construction crews noticed a sheen in the ditch and traced the source to a maintenance repair shop. Behind the shop was an open barrel of oil filters and other evidence of oil leaks/spills. Absorbent booms were placed in the ditch at a downstream culvert, and a contractor has been hired to remediate the spill and clean the area behind the maintenance building.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 10/12/2016 at 3:00 PM.

Please let me know if you have any questions regarding this incident.

Re: VPDES Permit No. VA0088650
IR 77654

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of #2 fuel oil assumingly on 10/8/2016 at 318 W. 28th Street, in Norfolk Virginia (36.873963161103, -76.2871338882). The description of the incident is as follows:

A home-heating oil underground storage tank (UST) overflow occurred at 316 W. 28th Street in Norfolk, Virginia. The released oil ran out of the backyard, down the driveway, west along 28th Street, and north along DeBree Avenue until draining into the stormdrain at the intersection of DeBree Avenue and 30th Street. The incident was discovered on 10/13/2016 at approximately 13:00. The date the incident occurred is unknown, but is assumed to have happened this past Saturday (10/8/2016) during Hurricane Matthew. The property owner (Mr. Joseph Lee) was notified on 10/13/2016 that he needs to remove any residual oil and oily water from the UST and to clean the contaminated areas. Mr. Lee stated he would be hiring a cleanup contractor to complete the needed work.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 10/13/2016 14:46:00 PM.

Please let me know if you have any questions regarding this incident.

Re: VPDES Permit No. VA0088650
Reference ID #78201

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of hydraulic fluid on 10/19/2016 at 8:15 AM. The description of the incident is as follows:

A City trash truck blew a hydraulic line and spilled approximately 60 gallons of hydraulic fluid into the street. Approximately 15 gallons entered the storm drain, but due to a blocked storm drain, the product was contained and able to be recovered. A contractor was hired to clean the product from the street and pump out the storm drain. No waterways were affected.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 10/19/2016 at 8:30 AM.

Please let me know if you have any questions regarding this incident.

Respectfully,

Casey Magruder

Re: VPDES Permit No. VA0088650
IR 79782

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of hydraulic fluid on 11/1/2016 at approximately 11:00:00 AM (36.842420669325, -76.28075291295). The description of the incident is as follows:

A small tractor leaked hydraulic fluid from Harbor Park Stadium parking lot to the City maintenance yard located at 140 East Street in Norfolk Virginia. The quantity of hydraulic oil released is estimated to be between 5-10 gallons.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 11/1/2016 2:45:00 PM.

Please let me know if you have any questions regarding this incident.

Respectfully,

Re: VPDES Permit No. VA0088650
IR 79782

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of a mixture of chlorine bleach and water used for pressure washing on 11/1/2016 at approximately 9:00:00 AM (36.868423709769, -76.29775275369). The description of the incident is as follows:

The manager of the Ynot Italian restaurant stated they had the patio and sidewalk pressure washed that morning by Marc's Pressure & Rook Cleaning Inc. A solution of chlorine bleach and water was used to pressure wash the sidewalk based on the odor present when the incident was investigated at 12:30 pm. I notified the manager of Ynot that the waste water present in the street needs to be recovered. The pressure-washing waste water that was left along the street was mostly recovered that evening by Marc's Pressure & Rook Cleaning Inc. using a wet/dry vacuum. Both Ynot and Marc's Pressure & Rook Cleaning Inc. were notified that it is a violation of the city's MS4 permit for the pressure washing wastewater to be allowed to enter the stormwater system, and it must be recovered during cleaning operations.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 11/1/2016 3:00:00 PM.

Please let me know if you have any questions regarding this incident.

Respectfully,

Re: VPDES Permit No. VA0088650
Reference ID #80781

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of diesel on 11/10/2016 at 10:00 AM. The description of the incident is as follows:

A City dump truck was hit by another City vehicle, puncturing the fuel tank and spilling approximately 50 gallons of diesel into the yard. City forces blocked the storm drains and cleaned up the spill with sand and oil-dri. No product entered the storm drains, and no waterways were affected.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 11/10/2016 at 12:15 PM.

Please let me know if you have any questions regarding this incident.

Re: VPDES Permit No. VA0088650
IR 83566

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of latex paint on 12/12/2016 at 12:00:00 PM (36.874810678504, -76.25317712207). The description of the incident is as follows:

A 1-gallon paint can (presumably fell/thrown out of a vehicle) busted on the driveway apron of 3038 Ballentine Boulevard, and spilled paint along the road and driveway. Some of the spilled paint mixed with standing water from a rain earlier that morning and ran into an adjacent stormdrain.

The spill was temporarily stabilized with sand and a cleanup contractor (Petrochem) was contracted. Petrochem cleaned up the spill on the roadway and driveway apron, and recovered paint-contaminated water from the stormwater drain with a vacuum truck. The cleanup was completed by approximately 3:15 pm.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 12/12/2016 2:00:00 PM.

Please let me know if you have any questions regarding this incident.

Re: VPDES Permit No. VA0088650
IR 85583

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of latex paint-contaminated water on 1/4/2017 at approximately 12:56 PM (36.918329659764, -76.22924645324). The description of the incident is as follows:

A complaint called into the Norfolk Cares Call Center reported painters cleaning their paint brushes and supplies into a stormwater ditch along Meadow Creek Road at the Walmart located at 1720 East Little Creek Road in Norfolk, Virginia. The painting company, Personal Touch Enterprises, was indeed washing their painting equipment into the stormwater ditch. The company owner, Mr. Thomas Michael Neal, was issued a Notice of Violation (NOV) for pollution of the stormwater system. It was estimated that approximately 25 gallons of latex-paint contaminated water was present in the ditch during the initial response.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 1/4/2017, at approximately 3:00 PM.

Please let me know if you have any questions regarding this incident.

Re: VPDES Permit No. VA0088650
IR 90207

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of vehicle wash water on 2/13/2017 at 2:38pm (36.862274311153, -76.24317516465). The description of the incident is as follows:

During the inspection of a grass swale stormwater BMP at 1384 Ingleside Dr. the business (Elite Auto Body) was discovered to be allowing their rinse water from vehicle washing to drain into the onsite storm drains, which are directly connected to the City stormwater system. A wash bay with a drain connected to the sanitary sewer system is located onsite, but the business owner, Mr. Chris Bucci, said the drain was clogged. Mr. Bucci was notified that this was an illicit discharge, but upon re-inspection 2/15/17, the illicit discharge had not ceased, a Notice of Violation was issued. On 2/16/17 a plumber was on-site repairing the site. Later in the day vehicles were observed being washed in the bays and the illicit discharge had ceased.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 2/14/2017, at approximately 11:50am.

Please let me know if you have any questions regarding this incident.

Respectfully,

Casey Magruder
Environmental Program Administrator

Re: VPDES Permit No. VA0088650
IR 90865

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of used motor oil on 2/17/2017 at 12:15 pm (36.876689259351, -76.30503763337). The description of the incident is as follows:

Used motor oil was discovered in a dry stormwater ditch along Bowdens Ferry Road, near its intersection with 25th Street (Norfolk ID #C12118) on 2/17/2017, at approximately 12:15 pm. The oil was discovered by a City ditch maintenance crew. The date and time of the dumping, and the responsible party are unknown. The affected ditch connects to a larger drainage ditch with flowing water, but a sheen was not present on the water in the larger ditch. The dumped oil appeared to be limited to the dry ditch, and it is estimated that 7 gallons of motor oil was dumped into the ditch based on an empty 5-gallon and 2 empty 1-gallon motor oil containers within the ditch.

Absorbents were used to mitigate the spread of the oil, and the following day a contractor, PetroChem, recovered the residual oil and excavated oil-contaminated soil from the ditch for proper disposal.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 2/17/2017 at 3:15 pm.

Please let me know if you have any questions regarding this incident.

Respectfully,

Re: VPDES Permit No. VA0088650
IR 91267

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of used cooking oil discovered on February 27, 2016, at approximately 12:00 pm (36.914807786447, -76.25412125964). The description of the incident is as follows:

Used cooking oil and grease was discovered to have been dumped into the paved alley behind the Wing Stop restaurant at 7750-305 Tidewater Drive, Norfolk, Virginia. Used cooking oil was present in the storm drain approximately 10 feet west of the back door of the restaurant, and was also present in the downgradient storm drain located approximately 150 feet north of the first storm drain. The cooking oil entered the City of Norfolk stormwater system from this second storm drain. The volume of used cooking oil dumped into the alley is unknown.

The store owner, Mr. Sanjay Patel, was issued a summons for pollution of the stormwater system (Norfolk Ordinance 41.1-4), and requested to clean up the oil in grease in the alley behind the restaurant, and in the two affected storm drains and connecting stormwater pipe. Upon reinspection of the site on March 1, 2017, Mr. Patel's contractor had cleaned up the affected areas and storm drains, as requested.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on February 27, 2017, at approximately 4:00 pm.

Please let me know if you have any questions regarding this incident.

Respectfully,

Kyle Quick, P.G.

INCIDENT NO:	**91267**
REPORT DATE:	**3/6/2017 7:57:17 AM**
ESTIMATED QUANTITY:	**unknown**
TYPE OF DISCHARGE:	**used cooking oil**
LOCATION:	**ILLICIT DISCHARGE - Wing Stop 2017-2-27** **7750 TIDEWATER DRIVE** **36.914807786447, -76.25412125964**
RESPONSIBLE PARTY: **ADDRESS& PHONE:**	**Sanjay Patel** **4005 N. Witchduck Rd., Virginia Beach, VA 23455** **(757) 576-4771**
DATE OF DISCHARGE:	**2/27/2017 12:00:00 PM**
DATE/TIME REPORTED:	**2/27/2017 4:00:00 PM**
REPORTED TO DEQ BY:	**Kyle Quick**
REPORTED TO:	**Online PREP**
DESCRIPTION OF DISCHARGE:	**Used cooking oil and grease was discovered to have been dumped into the paved alley behind the Wing Stop restaurant at 7750-305 Tidewater Drive, Norfolk, Virginia. Used cooking oil was present in the storm drain approximately 10 feet west of the back door of the restaurant, and was also present in the downgradient storm drain located approximately 150 feet north of the first storm drain. The cooking oil entered the City of Norfolk stormwater system from this second storm drain.**
CORRECTIVE ACTION:	**The store owner, Mr. Sanjay Patel, was issued a summons for pollution of the stormwater system (Norfolk Ordinance 41.1-4), and requested to clean up the oil in grease in the alley behind the restaurant, and in the two affected stormdrains and connecting stormwater pipe. Upon reinspection of the site on 3/1/2017, Mr. Patel's contractor had cleaned up the affected areas and storm drains, as requested.**
IMPACT TO STATE WATERS:	**unknown**

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system of those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment for knowing violations.

Re: VPDES Permit No. VA0088650
Reference ID #92348

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of hydraulic fluid on 3/14/2017 at 2:50pm. The description of the incident is as follows:

A TFC Recycling truck blew a hydraulic line and discharged over 25 gallons of product into the street throughout the entire Campostella Heights neighborhood. TFC crews used oil-dri throughout the neighborhood, as well as their own street sweeper to clean up the spill. No product entered the storm drains, and no waterways were affected.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 3/14/2017 at 3:53 PM.

Please let me know if you have any questions regarding this incident.

Respectfully,

Casey Magruder

Re: VPDES Permit No. VA0088650
IR 92505

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of sewage discovered on 3/14/2017 at approximately 3:00 pm (36.845593030735, -76.28099967618). The description of the incident is as follows:

A City of Norfolk, Public Works, Stormwater vactor truck operator discovered a residential sanitary sewer cleanout at 1100 East City Hall Avenue overflowing into the yard and draining to a City of Norfolk stormwater drop inlet structure. The vactor truck operator built a soil berm around the drop inlet to prevent additional sewage from entering the stormwater system. The property owner, Norfolk Redevelopment and Housing Authority, was notified and they sent a crew out to clear the blockage and clean up and sterilize the affected area. Also, the City of Norfolk, Department of Utilities was notified, and they verified that there was not a blockage in the City's sanitary sewer line.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 3/16/2017 at approximately 1:00 pm.

Please let me know if you have any questions regarding this incident.

Re: VPDES Permit No. VA0088650
IR 93387

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of concrete wash water on 3/27/2017 at 10:46 am (36.94741559133, -76.26178701301). The description of the incident is as follows:

A concrete patio was poured at 9287 Marlow Avenue, Norfolk, Virginia, and apparently, the equipment was cleaned between the sidewalk and Marlow Avenue. The wash water and residual concrete drained south along Marlow Avenue and entered the stormdrain in front of 9281 Marlow Avenue. It appears only a small amount of wash water entered the storm drain (~1 gallon) and all the residual concrete settled out along the gutter of Marlow Ave.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 3/27/2017, at 1:03 pm.

Please let me know if you have any questions regarding this incident.

Respectfully,

DATE/TIME REPORTED:	3/27/2017 1:03:00 PM
REPORTED TO DEQ/DCR BY:	K. Quick
REPORTED TO:	Online PREP
DESCRIPTION OF DISCHARGE:	A concrete patio was poured at 9287 Marlow Avenue, Norfolk, Virginia, and apparently, the equipment was cleaned between the sidewalk and Marlow Avenue. The wash water and residual concrete drained south along Marlow Avenue and entered the stormdrain in front of 9281 Marlow Avenue. It appears only a small amount of wash water entered the storm drain (~1 gallon) and all the residual concrete settled out along the gutter of Marlow Ave.
CORRECTIVE ACTION:	No one was home at 9287 Marlow Ave. during my initial visit on 3/27/2017. I spoke with the residents of 9281 Marlow Ave. and left a flyer at 9287 Marlow Ave. notifying them that it is a violation to discharge concrete wash water into the stormwater system and that they need to clean up all the residual concrete within the gutter along Marlow Ave. I reinspected the incident the next day, 3/28/2017, and the residual concrete in gutter had been removed and the gutter had been swept clean.

IMPACT TO STATE WATERS: **unknown**

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Re: VPDES Permit No. VA0088650
IR 97708

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of oil and grease from used truck parts discovered on May 12, 2017, at approximately 1:45 pm (36.914807786447, -76.25412125964). The description of the incident is as follows:

A sheen of oil was seen on the runoff coming off of the Norfolk Truck Center property at 736 Tidewater Drive, Norfolk, Virginia. The main source of the sheen was discovered to be an open dumpster containing used truck parts that was leaking rain water that had been in contact with the used truck parts.

Norfolk Truck Center was issued a Notice of Violation for Pollution of the Stormwater System (Norfolk City Code 41.1-4). Norfolk Truck Center immediately installed oil booms and other absorbents to contain the oil sheen. The following Monday (5/15/2017) the dumpster was moved into a warehouse building so that the used truck parts will not contaminate stormwater runoff.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on May 12, 2017, at approximately 3:30 pm.

Please let me know if you have any questions regarding this incident.

Respectfully,

Re: VPDES Permit No. VA0088650
Reference ID #102331

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of heating oil on 6/26/2017 at 1:00pm. The description of the incident is as follows:

A sump pump operating from the basement of a HUD property at 528 Redgate Ave. discharged water from a pipe under the driveway, into the gutter, and into the storm drain in front of the house next door. There was algae accumulating in the gutter in this area. In the past there had been a leak in the basement from a heating oil tank. The basin was blocked, so all product was contained to the structure, and no waterways were affected. City crews were able to remove all product from structure with absorbents. City Codes staff are currently working with HUD staff regarding several violations at the property.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on 6/26/2017 at 3:25 PM.

Please let me know if you have any questions regarding this incident.

Re: VPDES Permit No. VA0088650
IR 102667

Dear Sir or Madam:

In accordance with the reporting requirements for the referenced permit, be advised that there was an illicit discharge of powder activated carbon on June 28th, 2017, at approximately 3:00 pm (36.879320011037, -76.31131400247). The description of the incident is as follows:

The City of Norfolk's 37th Street Water Treatment Plant (WTP) had an overflow of wet powder activated carbon. The material flowed off the property and onto the 1700 block of 38th Street. None of the material reached the stormdrains along 38th Street during the overflow. The powder activated carbon was allowed to dry then all recoverable material was swept up just a few hours after the release and disposed of into the treatment sludge that is disposed of through Hampton Roads Sanitation District.

The enclosed documents outline the relevant information. The discharge was reported to the DEQ Tidewater Regional Office on June 28, 2017, at approximately 4:30 pm.

Please let me know if you have any questions regarding this incident.

DEPARTMENT OF PUBLIC WORKS
OPERATIONS
HIGH-RISK COMMERCIAL AND INDUSTRIAL OUTFALL INSPECTION PROGRAM

DATE WRITTEN:	May 13, 2014
DATE REVISED:	June 28, 2017
PREPARED BY:	June Whitehurst, Environmental Program Manager; Casey Magruder, Environmental Program Administrator
REVIEWED BY:	Peter Garner, Operations Engineering Manager
FILE PATH:	K:\0000 - PW\Admin\SOPs\0600 - Comb Ops\Operations SOPs\SOP 627 High-Risk Outfall Inspection Program
REFERENCE:	MS4 Permit; City Ordinances; SOP628, Storm Water Infrastructure Inspection Program
DISTRIBUTION:	Management Services; Operations

PURPOSE/OBJECTIVE:

To meet regulatory requirements outlined in Part I.A.2.g of the MS4 permit.

To define guidelines, protocols, and procedures for the high-risk Commercial and Industrial "outfall" Inspection Program. The purpose of this program is to identify and control pollutants in storm water discharges from commercial and industrial facilities that have been identified in the MS4 permit as high risk of discharging pollutants to the City's MS4.

This SOP is to be used by Public Works Operations staff to assist with the implementation of the program.

BACKGROUND:

The City of Norfolk is mandated by federal and state law, as well as the City's MS4 VPDES Permit, VA0088650, to monitor and control pollutants in storm water discharges from the City storm water conveyances. One component of the program is the detection and elimination of illicit discharges into the City's MS4 system.

Facilities operating under a VPDES permit issued by DEQ are required to meet certain effluent standards and implement best management practices depending upon the nature of the activity undertaken at the facility, and are inspected by the State.

The focus of the City's program will be on those high-risk commercial and industrial sites which have a point source outfall from the facility directly into City's MS4 system.

DEFINITIONS:

Best Management Practices (BMP's) – Schedules of activities, practices (and prohibitions of practices), structures, vegetation, maintenance procedures, and other management practices to prevent or reduce the discharge of pollutants to surface waters. BMP's also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage.

SOP 627

DEPARTMENT OF PUBLIC WORKS OPERATIONS HIGH-RISK COMMERCIAL AND INDUSTRIAL OUTFALL INSPECTION PROGRAM

High-risk Facilities – Any industrial or commercial facility that discharges to the MS4 that has been determined to contribute a significant pollutant loading (e.g. municipal landfills, TSD facilities, hazardous waste TSD facilities, facilities subject to EPCRA Title III, Section 313, facilities with VPDES industrial permits etc.).

Illicit Discharge – Discharge to the storm water system that is not comprised entirely of rain water or an authorized discharge. Illicit discharges are often, but not limited to, petroleum products (i.e., motor oil, antifreeze, hydraulic oil, transmission fluid, etc.), paint and solid waste.

MS4 VPDES Permit – Municipal Separate Storm Sewer System Virginia Pollution Discharge Elimination System is a permit issued to the City of Norfolk by the state of Virginia authorizing, under prescribed conditions, the potential or actual discharge of pollutants from a point source to surface waters. Best management practices and good housekeeping practices must be implemented and maintained to the maximum extent practicable to reduce the pollutants from discharging to natural waterways of the US.

RESPONSIBILITIES:

Department of Public Works Operations is the administrator of the MS4 VPDES Permit, VA0088650. Environmental staff ensures compliance with the VPDES permit associated with illicit discharges to the storm water system.

Public Works Environmental Staff develop and maintain a list of high priority commercial and industrial facilities. This list is reviewed and updated annually. Staff conduct the outfall inspection at these industrial and commercial high-risk facilities.

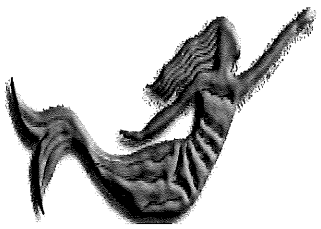

PROCEDURES:

1) Identify known industrial and commercial high-risk facilities:

The City obtains a list of current VPDES industrial storm water permit holders in the City of Norfolk from the DEQ Comprehensive Environmental Database System (CEDS). The CEDS data can be accessed via the following link: http://www.deq.virginia.gov/programs/water/permittingcompliance/pollutiondischargeelimination/permitsfees.aspx

No exposure certifications issued by DEQ exclude a facility from requiring a permit for storm water discharges associated with industrial activity. These certifications only apply to industrial facilities when all industrial materials and activities are protected by a storm-resistant shelter to prevent exposure to rain, snow, snowmelt, and/or runoff. A list of facilities in the City of Norfolk that hold no exposure certifications is also requested annually.

A list of business licenses in the City of Norfolk will be requested and received from the Commissioner of the Revenue's office annually. From this information, a prioritized inventory of high-risk commercial and industrial businesses is developed. City staff cross reference the business licenses with DEQ VPDES Industrial permitted facilities and no-exposure facilities. Facilities operating under a no exposure certification issued by DEQ are excluded from this

DEPARTMENT OF PUBLIC WORKS
OPERATIONS
HIGH-RISK COMMERCIAL AND INDUSTRIAL OUTFALL INSPECTION PROGRAM

inspection program. Additionally, facilities that sheet flow or discharge directly to state waters will be also excluded from the City's inspection program.

The list of high-risk facilities will be refined throughout the permit cycle. Industrial and commercial properties removed from the inspection program will be documented with justification.

2) Prioritize high-risk facilities:

Currently, the City prioritizes facility outfall inspections by concentrating on those commercial and industrial entities that have been identified as high-risk facilities in the MS4 permit. This prioritized inventory of target businesses includes:

High-risk Facilities:

- VPDES Industrial sites
- High-priority City municipal facilities
- Car wash/auto detailing facilities (including new/used car dealerships and rental facilities)
- Junk dealers
- Auto repair shops (mechanical and body)
- Transportation services (tow truck, taxi)
- Gas/service stations
- Nurseries
- Marinas
- Pet care facilities (kennels, day care)
- Waste Management Solid Waste Collection Sites / Material Recovery Facilities

The list of high-risk facilities is attached as Appendix A of this SOP. Prioritization is established through the Storm Water Infrastructure Inspection Program.

The Department of Fire-Rescue permits and inspects commercial and industrial facilities subject to Section 313 of SARA Title III. The Department of Fire-Rescue also permits and monitors demolition certificates, fireworks performances, hazardous materials storage, underground fuel tanks filling or removal, and welding or cutting metal. These facilities will also be excluded from the Commercial/Industrial Inspection Outfall Program inspection inventory.

3) VDPES Industrial Facility DMR Review

On an annual basis, the City will track submittals of all discharge monitoring reports (DMR's) by current VPDES industrial permit holders in the City of Norfolk. These documents will be used to identify and investigate facilities contributing significant pollutant loadings to the environment. Facilities that have not submitted a copy of their DMR to the City by June 30th of each year will be reported to DEQ by the annual report process.

4) Develop and implement a standard high-risk outfall inspection program:

The high-risk facilities outfall/tie-in inspections occur during the standard storm water preventative maintenance inspection program. This program consists of visual inspections of the storm water infrastructure including catch basins, manholes or drop inlets. The Inspector observes the structure for dry weather or illicit discharges from the facilities; if discovered the source is identified and eliminated. Details of the inspection program can be found in SOP628.

DEPARTMENT OF PUBLIC WORKS
OPERATIONS
HIGH-RISK COMMERCIAL AND INDUSTRIAL OUTFALL INSPECTION PROGRAM

Upon discovery of an unauthorized discharge, the inspector will refer facilities to the DEQ TRO for the following:

- Facilities that have non-stormwater discharges that do not currently have coverage under and existing VPDES industrial permit,
- Facilities that do not have coverage under an existing VPDES industrial permit and have been identified as required to obtain VPDES industrial permit coverage, and
- VPDES permit facilities that have evidence of significant pollutant loading.

5) Prepare reports to document inspection activities:

Standard high-risk facility outfall/tie-in inspections are documented and tracked by the preventative maintenance inspector. Documentation of the high-risk facilities completed will be reported to DEQ in the annual report.

Facilities that are referred to DEQ will also be tracked and reported in the City's annual report.

6) Analyze trends and modify/improve the program as necessary:

The overall success of the high-risk Commercial and Industrial Outfall Inspection Program will be measured through the successful implementation of outfall inspections as part of the program. Success will also be measured by the number of inspections conducted, and the number of problems discovered and resolved.

Program assessment will be submitted with each annual report discussing the activities completed for the previous program year. This will include a report on inventory, including the type and total number of facilities inspected.

Due to the ever-evolving nature of the program the inventory will be evaluated and updated. The program will exclude those properties that do not have a point source discharge directly to the City's MS4 or do not have the potential to pollute the MS4.

APPROVED:

Peter S. Garner, P.E.
Operations Engineering Manager
Public Works Operations

SOP 628

DEPARTMENT OF PUBLIC WORKS OPERATIONS STORM WATER INFRASTRUCTURE INSPECTION PROGRAM

DATE WRITTEN:	May 8, 2017
DATE REVISED:	
PREPARED BY:	June Whitehurst, Environmental Program Manager; Chris Siemering, Engineering Technician
REVIEWED BY:	Peter Garner, Operations Engineering Manager
FILE PATH:	
REFERENCE:	MS4 Permit; City Ordinances
DISTRIBUTION:	Management Services; Operations

PURPOSE/OBJECTIVE:

To define guidelines, protocols, and procedures for the Storm Water Infrastructure Inspection Program. The purpose of this program is to identify and control pollutants in storm water discharges.

BACKGROUND:

The City of Norfolk is mandated by federal and state law, as well as the City's MS4 VPDES Permit, VA0088650, to monitor and control pollutants in storm water discharges from the City storm water conveyances. One component of the program is the detection and elimination of illicit discharges into the City's MS4 system.

Prior to 2017, the storm water maintenance program was predominately complaint based. In 2017, the City initiated a strategic preventative inspection program to identify system maintenance problems, identify and eliminate illicit discharges through dry weather monitoring, and update the GIS mapping system.

DEFINITIONS:

Illicit Discharge – Discharge to the storm water system that is not comprised entirely of rain water or an authorized discharge. Illicit discharges are often, but not limited to, petroleum products (i.e., motor oil, antifreeze, hydraulic oil, transmission fluid, etc.), paint and solid waste.

MS4 VPDES Permit – Municipal Separate Storm Sewer System Virginia Pollution Discharge Elimination System is a permit issued to the City of Norfolk by the state of Virginia authorizing, under prescribed conditions, the potential or actual discharge of pollutants from a point source to surface waters. Best management practices and good housekeeping practices must be implemented and maintained to the maximum extent practicable to reduce the pollutants from discharging to natural waterways of the US.

RESPONSIBILITIES:

Department of Public Works Operations is the administrator of the MS4 VPDES Permit, VA0088650. Environmental staff ensures compliance with the VPDES permit associated with illicit discharges to the storm water system.

Storm Water Engineering Technician Staff implement the inspection program.

Storm Water Operational Staff complete any necessary maintenance work on the storm water infrastructure including system cleaning and system repair.

SOP 628

DEPARTMENT OF PUBLIC WORKS
OPERATIONS
STORM WATER INFRASTRUCTURE
INSPECTION PROGRAM

Storm Water GIS Technician staff update the storm water GIS mapping system.

PROCEDURES:

1) Prioritized Inspection Schedule:

The inspection program is prioritized based on (1) the 90 City Planning Districts, (2) high-risk commercial and industrial sites identified in SOP#627, and (3) system cleaning work zones. These three prioritization areas were overlaid in the GIS mapping system to assist with establishing a strategic storm water inspection program that not only addressed maintenance, but permit compliance as well.

As part of the Commercial and Industrial Outfall Inspection Program for permit compliance, the inspection areas have been prioritized utilizing the high-risk commercial and industrial sites as the highest priority. The Planning Districts with the most number of high-risk commercial and industrial sites are inspected sooner in the permit cycle. Those planning districts with 31-60 or 21-30 high-risk sites are first on the inspection schedule. Those planning districts that show zero high-risk facilities are listed last on the inspection schedule.

Identifying and scheduling preventative maintenance is secondary to the inspection program. Therefore, where scheduling would allow, the prioritization rotated between the three system cleaning zones to evenly distribute the work load among the three maintenance crews.

There are approximately 28,000 structures to be inspected City-wide. The initial schedule assumes approximately 560 structures per month to be inspected over the 5-year permit cycle (ending June 30, 2021). Attachment A is a map of the high-priority commercial and industrial distribution by planning district. Attachment B is the Inspection schedule.

2) Storm Water Inspection Criteria:

The inspection criteria are outlined in the Storm Water Preventative Inspection Field Sheet, Attachment C of this SOP. This program consists of visual inspections of the storm water infrastructure including catch basins, manholes or drop inlets.

Background Data - The background data includes the date and time of the inspection, inspector information, and structure identification based on the City's GIS nomenclature. This information is provided to track structures that have been inspected for tracking purposes.

Structure Description - The structure description section is designed to assist with the update of the GIS database. This portion of the report is only applicable if the GIS information is outdated or non-existent. The inspector will complete this section including the pertinent information for each structure including structure type, material, dimensions, etc. If the system needs to be updated, the technician will report back to the GIS Technician to ensure that any necessary updates to the GIS layers have been completed.

Quantitative Characterization – The quantitative characterization identifies if dry weather flow is present. If there is no flow present, the inspector will move on to Inspection of the system. If flow if present, the inspector will coordinate with the Environmental Staff, where necessary, to complete field monitoring analysis to identify the source of any potential illicit discharges. Generally, flow should not be present 48-hours following a rain event. However, in Norfolk, tidal

DEPARTMENT OF PUBLIC WORKS
OPERATIONS
STORM WATER INFRASTRUCTURE
INSPECTION PROGRAM

flow may be present since approximately 60% of the City's storm water system is inundated with tidal waters during a normal cycle.

Physical Indicators – The physical indicators are field tests that are performed on flowing water within the storm water system, where no flow should be occurring, to identify and eliminate potential illicit discharges. These tests are simple field analysis utilizing visual indicators and simple chemical analysis.

Inspection for Structure Maintenance – The inspector will also identify maintenance problems with the structure. These inspections are primarily based on what the inspector can see from the street level. The inspector is not authorized to enter a basin or other confined space to inspect the system without prior authorization, proper training, and proper equipment. A pole camera or CCTV camera may be utilized, when available, for advanced inspection of pipes. If the inspector identifies structural damage or cleaning requirements, he will submit a service request for the Operational crews to complete the maintenance work. Pictures will be taken, when necessary, to clearly identify the maintenance problems.

3) Analyze and Modify the Inspection Program:

The goal of the initial schedule is to complete inspection of the entire City within the 5-year MS4 permit cycle (by June 30, 2021). The schedule will be evaluated after year 1 (January 2018) to determine if the schedule is too ambitious and re-evaluate the prioritization schedule at that time.

Due to the ever-evolving nature of the program the inventory of high-risk facilities may be evaluated and updated; this may modify the schedule.

The number of inspections conducted, and the number of problems discovered and resolved will be documented.

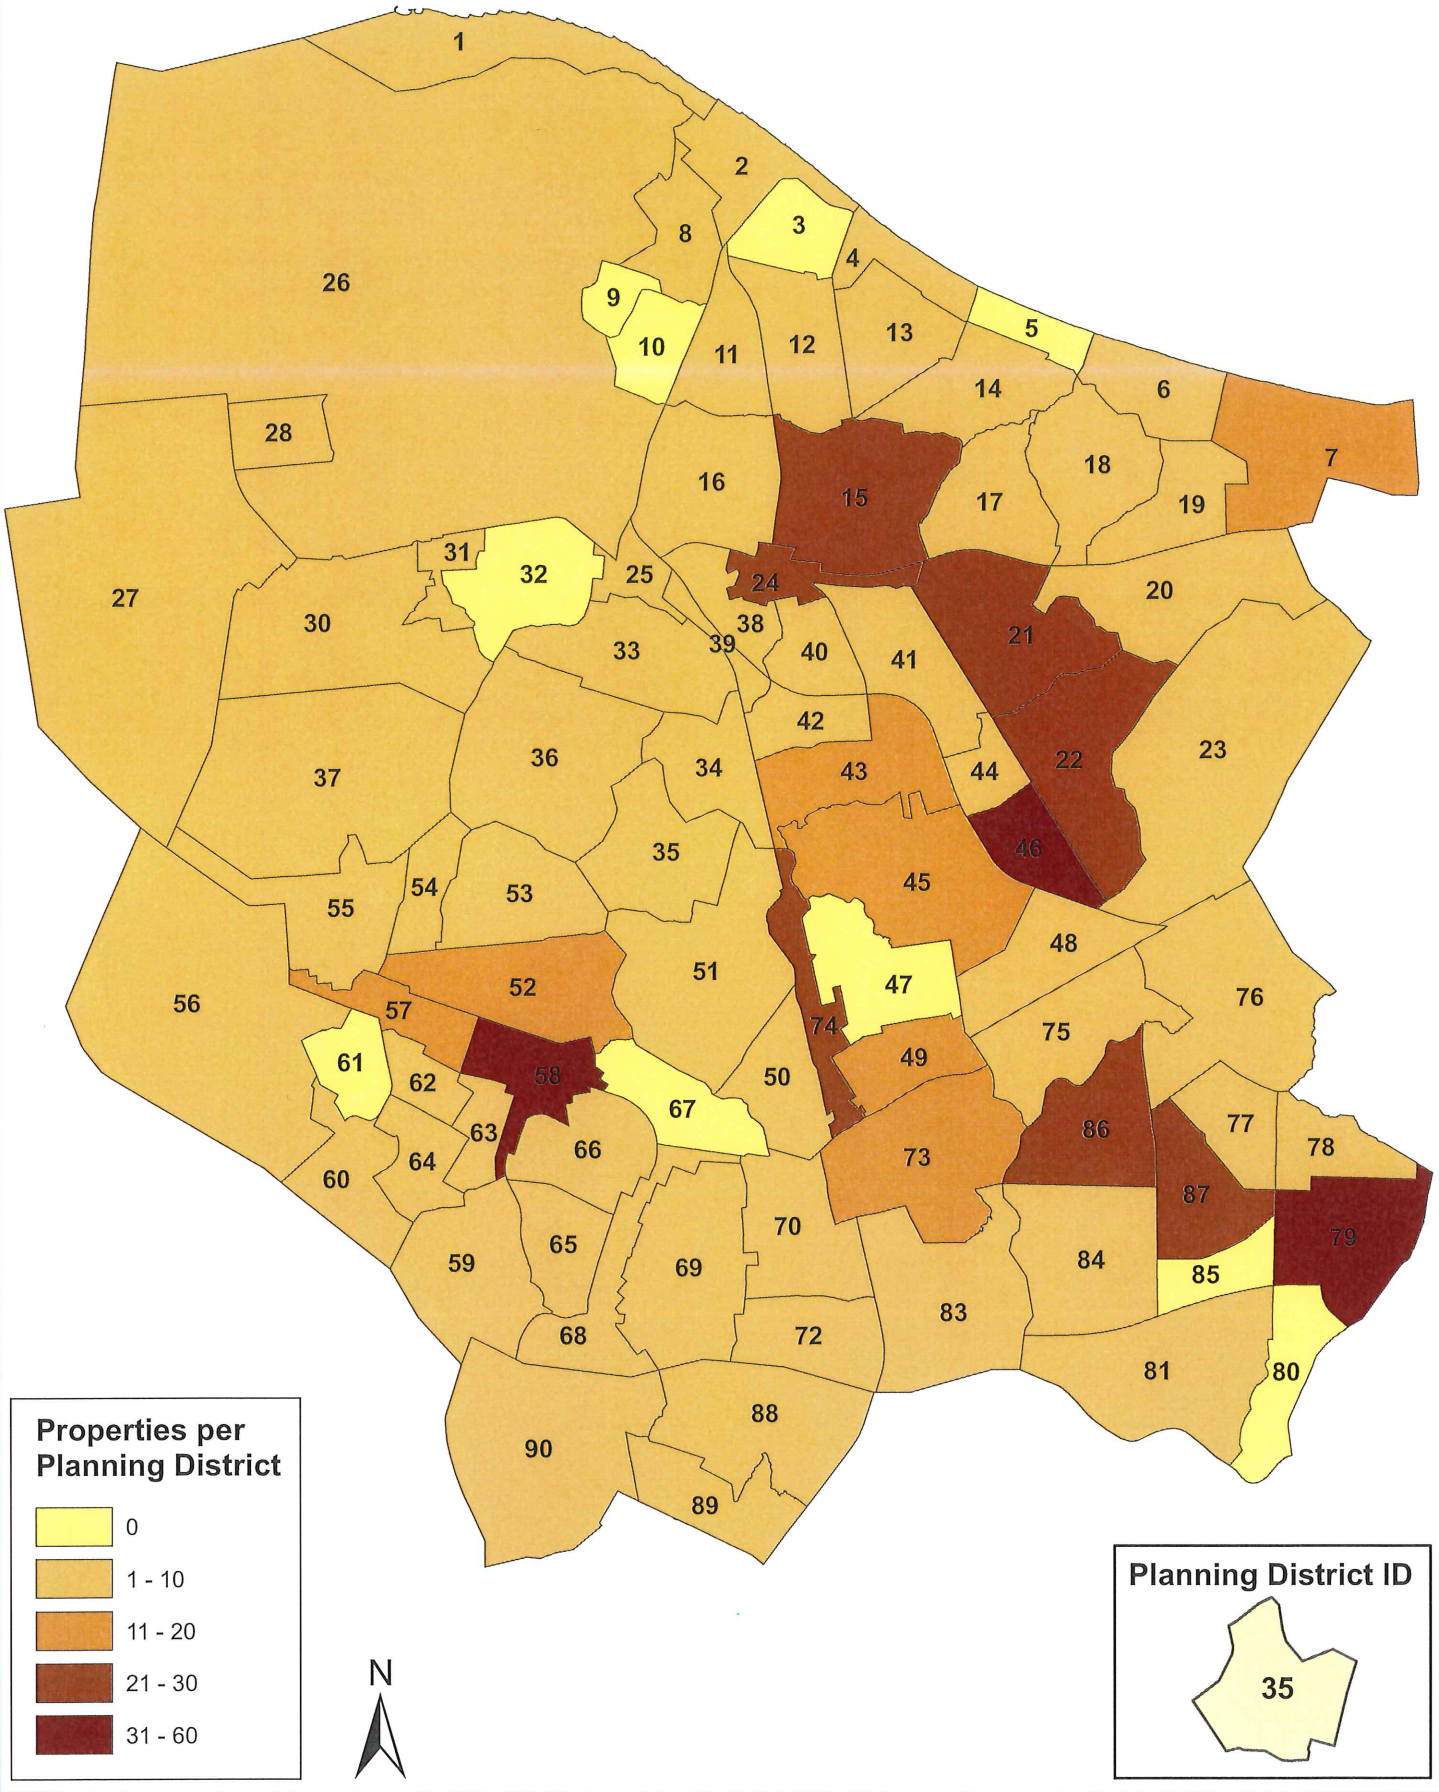

Program assessment will be submitted with each annual report discussing the activities completed for the previous program year. This will include a report on inventory, including the type and total number of structures inspected.

APPROVED:

Peter S. Garner, P.E.
Operations Engineering Manager
Public Works Operations

Notes:
1. Approximately 560 Structures Per Month scheduled to be inspected to complete by end of permit cycle.
2. MS4 Permit cycle ends June 30, 2021.
3. Program Evaluated in January 2018 to determine if the inspection program is on schedule.
4. Priority is based on # of High Priority Industrial & Commercial properties located within each PD.
5. Developed May 2017

DEPARTMENT OF PUBLIC WORKS
OPERATIONS
Storm Water Best Management Practice Inspections

DATE WRITTEN: March 8, 2005
DATE REVISED: June 28, 2017
PREPARED BY: Kyle Quick, Environmental Specialist; June Whitehurst, Environmental Programs Manager
REVIEWED BY: Peter Garner, Operations Engineering Manager
FILE PATH: K:\0000 - PW\Admin\SOPs\0600 - Comb Ops\Operations SOPs\SOP 624 Storm Water Best Management Practice Inspections
DISTRIBUTION: Operations Personnel

PURPOSE / OBJECTIVE:

To define guidelines for the inspection and enforcement for the installation and maintenance of all private and city-owned storm water structural best management practices (BMPs). BMPs reduce the flow of water and remove unwanted contaminants from the storm water prior to it entering the City MS4 system and local waterways. BMPs are regularly inspected to ensure they are working as designed and maintained in such a manner to not cause flooding, become a nuisance, or impose a threat to health and safety.

RESPONSIBILITIES:

Public Works Operations must abide by the Virginia Pollution Discharge Elimination System (VPDES) Permit, VA0088650. Storm water BMPs are required by state law to be inspected at least once every 5 years.

OTHER:

BMPs are used to reduce pollution in and/or volume of storm water runoff, thereby protecting area waterways. Some examples of structural storm water BMPs include infiltration trenches, grass swales, detention basins, retention ponds, oil/grit separators, bioretention basins, manufactured BMPs, etc.

REQUIREMENTS:

1. BMPs are approved for installation after an extensive site plan review by a designated Operations engineer. All pertinent information pertaining to the BMPs are entered into the current BMP tracking database.

2. As part of the site plan approval process, a Declaration of Covenants for Storm and Surface Water Facility and System Maintenance (BMP Maintenance Agreement) should be signed and notarized by the owner or responsible party of the private property being developed to maintain the BMP after construction. That party will remain responsible for all maintenance until the property is sold; at which time the new owner is responsible for maintaining the BMP. A copy of the agreement is filed with the clerk of the court by the owner or responsible party. A copy of the agreement is also maintained in the site plan file at the Division.

3. Storm water management (SWM) facilities, including BMPs, are required to be installed in accordance with the approved plans, and manufacturers' specifications where applicable. The City of Norfolk Planning Department, Building Safety Bureau will inspect the installation of onsite stormwater piping and structures. The Department of Public Works, Environmental Storm Water Management staff will inspect the installation of BMPs. Additionally, they also inspect stormwater piping and structures within the City Right-of-Way and piping that ties into the City's MS4 system. During construction, environmental staff will have completed the following procedures:

DEPARTMENT OF PUBLIC WORKS
OPERATIONS
Storm Water Best Management Practice Inspections

a. A pre-construction meeting will be scheduled to go over expectations. Pre-construction meetings will be documented.

b. Follow up inspections with the contractor will occur throughout the construction process to verify that the BMPs are installed in accordance with the approved plans. These inspections should take place before any backfilling occurs and should include pictures for documentation. If there is a tie-in to the city system, a storm water inspector will inspect the tie-in.

c. A construction record drawing ("As-built" submission) signed and sealed by a professional registered in Virginia will be reviewed by a storm water engineer or their designee to verify the SWM facilities have been installed per the approved plan.

d. A final inspection will be performed by the environmental staff to ensure that the BMP and contributing drainage areas are stabilized. The inspector will also ensure that the site is free of excessive litter or debris, sediment build up, or erosion, and no deviations from the approved construction record drawing.

e. Upon approval of the construction record drawing and the final inspection, the environmental specialist will approve the release of the Certificate of Occupancy (if required) and approval to terminate bonds for stormwater improvements.

4. All privately-owned and city-owned BMP inspections are tracked in the current BMP tracking database. The database enables Public Works Operations to maintain inspection data and to ensure inspections are completed on a routine schedule.

5. When an inspection is conducted, the following items are checked to ensure that the BMP will consistently perform its water quality improvement and/or runoff reduction functions.

a. *Sediment Buildup*: Sediment buildup can reduce the effectiveness of the BMP by blocking inlets and outlets, reducing infiltration rates, and reducing effectiveness of pretreatment practices.

b. *Erosion*: Erosion can lead to reduced volume of the BMP and/or structural failure. Erosion is a common problem around inlets and outlets of BMPs, and may also be caused by roots of woody vegetation and animal burrows.

c. *Debris and Litter Removal*: Regular removal of litter and debris is essential to ensure the BMP is working properly. The BMP must be free from all debris or litter in or around the BMP structure.

d. *Vegetation*: Vegetation must be established and maintained to guard against erosion and sediment buildup, and to maintain designed pollutant removal rates where applicable. Excessive vegetation clippings must be removed from the BMP and disposed of properly.

e. *Deviation from the Construction Record Drawing*: Verify a property owner, tenant, or other responsible party has not modified a post-construction BMP without written approval from the City of Norfolk Department of Public Works storm water engineer, or their designee.

f. *Manufactured BMPs*: The owner or responsible party are required to maintain manufactured BMPs in accordance with the manufacturer's specifications, and to provide evidence of continued maintenance by copies of maintenance records and/or photographic proof.

DEPARTMENT OF PUBLIC WORKS
OPERATIONS
Storm Water Best Management Practice Inspections

g. *Other Maintenance Concerns:* Refer to the Virginia Department of Environmental Quality Stormwater Design Specifications for other evident BMP maintenance concerns

6. The environmental staff will complete a "BMP Inspection Report", and track inspections in the current BMP tracking database. The responsible party will either be sent an email or a letter that lists the BMP maintenance discrepancies and includes a copy of the inspection report, if necessary. The responsible party will have a specified time-period to complete the maintenance after the report has been sent. A re-inspection will occur after the allotted time-period to ensure all corrections have been made. If the corrections have not been made, a second email or letter will be sent with an updated timeframe for corrections. If the inspector has had no contact from the property owner, if letters have been returned, or if the discrepancies have not been addressed after the second letter was sent, then a Notice of Violation (NOV) will be sent or issued. If no progress occurs after the NOV has been issued, legal actions should be taken. The City also holds the right to conduct the corrections after proper warning, and then charge the responsible party for any financial obligations. If the BMP is working properly and does not appear to have any maintenance discrepancies, a note will be made in the file and no report will be sent to the responsible party.

7. Routine maintenance for any City-owned BMP is conducted by Public Works Operations which is submitted in a service request and put into the Hansen tracking system. The City-owned BMPs must also follow all the guidelines established above.

8. The Norfolk Public Schools BMPs are inspected by the environmental staff, however, the school board facilities manager is the main point of contact for any discrepancies regarding BMP maintenance at school facilities. The school board is responsible for maintaining the BMPs and if major work is required beyond the capabilities of facilities personnel, then they will hire a contractor.

Approved:

Peter S. Garner, P.E.
Operations Engineering Manager
Public Works Operations

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
17th Bay Street Duplexes	14-0092.1	Ok for release of CO.	4/18/2017	No	Dry Swale 2	0

17th Bay Street Duplexes	14-0092.3	Ok for release of CO.	4/18/2017	No	Dry Swale 2	0	
17th Bay Street Duplexes	14-0092.4	Ok to release CO	4/18/2017	No	Rooftop (Impervious Surface) Disconnection	0	
22nd St. Parking Lot	00-4320.1	U/G Infiltration Trench. Minor sediment accumulation in "box", infiltration lines seem clear - Ok	10/31/2016	No	General Infiltration Practices	0	
2542 E Ocean View Ave	03-0304.1	U/G Infiltration Trench - Ok	11/18/2016	No	General Infiltration Practices	0	
2nd Patrol Division	S53.1	Pervious Pavers. Ok	10/13/2016	No	General Infiltration Practices	0	
2nd Patrol Division	S53.2	Ok. Same as retention pond from 99-3931 - Central Business Park (99-3931.1)	10/13/2016	No	Extended Detention Basin	0	
3350 E. Princess Anne Rd. Walmart-Wawa	13-0074.1	Ok	7/22/2016	No	Bioretention Basins	0	
3350 E. Princess Anne Rd. Walmart-Wawa	13-0074.2	Ok	7/22/2016	No	Bioretention Basins	0	
3608 Sewells Point Rd. Duplex	06-0128.1	Please replace/repair broken PVC cap for observation well.	9/29/2016	Yes	General Infiltration Practices	1	1/17/2017
4206 Pretty Lake two family	08-0073.1	Pavers where infiltration basin is located (see J. Lippencott's notes from 2/20/2014) - Ok	12/1/2016	No	General Infiltration Practices	0	
7-Eleven	13-0031.1	Please maintain the Contech Stormfilter in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	3/21/2017	Yes	Manufactured BMP Systems	1	
71 Unit Multifamily	12-0083.1	Water elevation in unit appears to be high indicating an excessive buildup of sediment and debris in the CDS unit. Please maintain the manufactured BMP (CDS unit) in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	8/31/2016	Yes	Manufactured BMP Systems	1	3/27/2017
711	T161.1	Please replace the broken PVC cleanout caps and the broken PVC cleanout pipe.	8/2/2016	Yes	General Infiltration Practices	1	9/23/2016
8570 Chesapeake Blvd. (18 unit apartments)	T275.1	Please clear accumulated sediment and debris from drop-inlet structure that drains to the infiltration BMP.	4/10/2017	Yes	General Infiltration Practices	1	5/23/2017
8570 Chesapeake Blvd. (18 unit apartments)	T275.2	U/G Infiltration Trench - covered with grass, Ok	4/10/2017	No	General Infiltration Practices	0	
8th Bay Street	03-147.1	Detention Basin is Ok - but investigate possible illicit discharge from neighbor. Hose coming from 9570 7th Bay St. was run through the fence to the drop inlet within the detention basin.	11/18/2016	No	Extended Detention Basin	0	
AAAA Self Storage	01-0166.1	Ok.	8/23/2016	No	Detention Basin	0	
AAAA Self Storage Facility	05-0149.1	Standing water is present within the drop inlets and the infiltration pipes are ~half-full of stormwater and it had not rained in approximately 1 week. Please jet/vactor accumulated sediment within the underground infiltration pipes and clear the accumulated sediment from the drop inlet structures.	11/3/2016	Yes	General Infiltration Practices	2	1/26/2017
Affordable Towing and Recovery	02-0117.1	Ok	8/25/2016	No	Detention Basin	0	
Agent Wall Systems	04-0031.1	Please install swale and route roof drainage from building addition to swale and infiltration BMP (stone filled trench) as shown on plans.	1/11/2017	Yes	General Infiltration Practices	3	8/28/2017

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Allied Systems	T178.1	Please clear overgrown vegetation and debris from the detention basin and the outlet swale.	11/28/2016	Yes	Extended Detention Basin	1	1/31/2017
AllSafe Self Storage	03-101.1	Ok	1/5/2017	No	Extended Detention Basin	0	
AllSafe Self Storage	03-101.2	Ok	1/5/2017	No	Extended Detention Basin	0	
Amelia Building at Koger Center	T591.1	Ok	1/17/2017	No	Retention Basin	0	
Anne Outten Pond	S1.1	Aerator not working, and minor amount of trash along waters edge. Allow contractor to remove trash for upcoming pond retrofit under 16-0014	7/28/2016	No	Retention Basin	0	
Anne Outten Pond	S1.1	Excessive amount of trash within pond along northern, southern, and western banks needs to be removed. Aerator not working. Need to cut back woody vegetation growing water's edge around pond. Scheduled for monthly removal of trash and checking inlets and outlets, and biannual (May & September) trimming of trees and shrubs around pond. Last serviced on 6/1/2016 according to Hansen. Contract work to dredge pond and plant along shorelines to begin in the next month or 2, so work order not placed.	5/3/2017	No	Retention Basin	0	
Apartment / Garage	03-0273.1	U/G Infiltration Trench at manhole in grass - minor sediment accumulation in infiltration pipes but good drainage (heavy storm within past 24 hrs and little to no standing water) - Ok	4/7/2017	No	General Infiltration Practices	0	
Apartments	01-0223.1	U/G Infiltration Trench at DI in driveway - minor sediment accumulation in infiltration pipes but drains well (heavy storm within past 24 hrs and no standing water) - Ok	4/7/2017	No	General Infiltration Practices	0	
Applebee's - Janaf Shopping Center	T64	Ok - minor amount of trash present	3/10/2017	No	Detention Basin	0	
Arby's Restaurant	03-0041.1	Ok	1/13/2017	No	Bioretention Basins	0	
Arcet Equipment Co.	T769.1	OWS - last serviced in July 2015. Branch manager, Mr. Steve Beauregard provided the 2015 maintenance record and is scheduling another maintenance for 2017 - Ok	3/28/2017	No	Manufactured BMP Systems	0	
Arcet Equipment Co.	T769.2	Minor amount of trash present. Owner has a landscaping company maintain the area and they regularly clean up the trash as part of their landscaping - Ok	3/28/2017	No	Grassed Swale	0	
Archers Green Apartments	91067.006.1	Please clear sediment and debris out of the underground infiltration pipes and adjacent stormwater structures.	8/4/2016	Yes	General Infiltration Practices	2	2/24/2017
Archers Green Apartments	91067.006.2	Please clear sediment and debris out of the underground infiltration pipes and adjacent stormwater structures.	8/4/2016	Yes	General Infiltration Practices	1	1/25/2017
Atlas Masters Company	06-0078.1	Ok - talked with manger (Matt) about ongoing maintenance.	2/3/2017	No	Detention Basin	0	
Autumn Care	T23.1	Ok	3/10/2017	No	Detention Basin	0	
Auxiliary Systems	T309.1	Please remove equipment from the swale, clear vegetation and debris from the swale and trench drain, and regrade the swale per the approved plans.	5/5/2017	Yes	Grassed Swale	1	7/24/2017
Azalea Super Service	92067.087.1	Please clear fine sediment out of the stone infiltration area along the western side of the driveway entrance.	1/19/2017	Yes	General Infiltration Practices	1	3/6/2017

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
B'nai Israel Congregation	00-4301.1	Trench A on Plans. Ok	11/1/2016	No	General Infiltration Practices	0	
B'nai Israel Congregation	00-4301.2	Trench B on plans. Ok	11/1/2016	No	General Infiltration Practices	0	
BAE Systems Parking Lot improvements	11-0072	Please maintain the 3 Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	11/22/2016	Yes	Manufactured BMP Systems	1	1/17/2017
Balance Builders	12-0033.1	Ok	8/19/2016	No	Bioretention Basins	0	
Ballentine Elementary School Lake	S2.1	Ok. Last serviced on 8/24/2016 by SW BMP Maintenance crew. Currently scheduled for monthly trash pickup and April/August trimming of shrubs and trees.	9/15/2016	No	Retention Basin	0	
Ballentine Home	99-4169.1	Ok	8/8/2016	No	General Infiltration Practices	0	
Barraud Park	S-07-0086.1	The observation well and upgradient groundwater discharge swale are not present. Please remove accumulated sediment along curb lines and the curb cut inlet	7/15/2016	Yes	General Infiltration Practices	1	
Barraud Park	S-07-0086.1	Need to remove accumulated sediment along curb lines and from within the curb-cut inlet. The swale and infiltration basin are good, but missing the observation well and groundwater discharge swale. This BMP is not on the maintenance schedule at this time.	5/3/2017	No	General Infiltration Practices	0	
Barry's Performance Car Shop	T93.1	Infiltration trenches - Ok, standing water but inspected during a rain event.	5/5/2017	No	General Infiltration Practices	0	
Barry's Performance Car Shop	T93.2	Infiltration trenches - Ok, standing water but inspected during a rain event.	5/5/2017	No	General Infiltration Practices	0	
Bay Disposal	02-0012.1	Please remove accumulated debris from the outlet control structure.	11/28/2016	Yes	Extended Detention Basin	1	1/31/2017
Bay Disposal	07-0027.1	Ok	12/2/2016	No	Retention Basin	0	
Bay Disposal Material Recovery Facility	14-0001.1	Please stabilize the southern bank of the detention basin, and clear away debris and sediment from the orifice on the outlet structure. Also, please maintain preventative measures to ensure illicit discharges are not impacting the detention basin.	11/28/2016	Yes	Detention Basin	1	1/31/2017
Bay Oaks Place Extension	01-0026.1	U/G Infiltration. 3-4 inches of accumulated sediment in some of the curb inlet structures and adjoining infiltration pipes. Please clean out accumulated sediment within the infiltration pipes and adjoining curb inlet structures.	10/31/2016	No	General Infiltration Practices	0	
Bayview Elementary School Addition / Renovation	NPS06.1	Ok	7/5/2016	No	General Infiltration Practices	0	
Bayview Elementary School Addition / Renovation	NPS06.1	Grass swale/infiltration basin with curb-cut inlets from parking lot - Ok	4/11/2017	No	General Infiltration Practices	0	
Bayview Estates Subdivision	00-4449.1	Please remove riprap and sediment accumulated in the flared-end inlet pipe in the detention basin.	7/7/2016	Yes	Detention Basin	1	12/13/2016
Bayview Recreation Center	S25.1	Ok	7/5/2016	No	General Infiltration Practices	0	
Bayview Recreation Center	S25.1	Grass swale/infiltration basin with curb-cut inlets - Ok, not on BMP maintenance crew's schedule at this time. Rec. Center staff mowing grass within the BMP.	4/11/2017	No	General Infiltration Practices	0	
Baywalk Townhouses	04-0133.1	Ok	11/17/2016	No	General Infiltration Practices	0	
Baywalk Townhouses	04-0133.2	Ok	11/17/2016	No	General Infiltration Practices	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Bazemore's	T705.1	Ok - Vortechnics unit, 38" to top of water, 83" to top of sediment pile.	1/23/2017	No	Manufactured BMP Systems	0

Bolling Square Apartments Phase I	03-0280.2	Ok	8/18/2016	No	Bioretention Basins	0	
Bolling Square Apartments Phase I	03-0280.3	Ok	8/18/2016	No	Grassed Swale	0	
Bolling Square Phase 2	13-0090	Please clear vegetation and accumulated sediment and debris from curb-cut inlets. Please clear mulch and other debris from the top of the drop-inlet structure within the bioretention area.	8/18/2016	Yes	Bioretention 1	1	1/25/2017
Boush Street Garage	S40.1	Vortech. Depth to water = 43", Depth to Top of Sediment Pile = 85". Some floatable trash present. Last serviced (vactored) on 11/17/2015 and next service scheduled for 11/2016. Ok.	9/16/2016	No	Manufactured BMP Systems	0	
Bradco Supply Corporation Parking Lot Addition	04-0127.1	Ok - some trash present, talked with manager about ongoing maintenance of the BMP.	2/14/2017	No	Extended Detention Basin	0	
Brittany Apartments (6 units)	07-0125.1	Ok	9/29/2016	No	General Infiltration Practices	0	
Broad Creek Villas	08-0042.1	Ok	7/13/2016	No	Extended Detention Basin	0	
Broad Creek Villas	08-0042.2	Ok	7/13/2016	No	Extended Detention Basin	0	
Bruce's Park Pump Station #152	13-0009.1	Ok	5/10/2017	No	Dry Swale 1	0	
Building Addition - Baker and Company	03-0267.1	Originally visited on 8/26/2016 but area overgrown. Mr. Baker had vegetation cut back and BMP was inspected on 10/5/2016. Some algae in pond, but otherwise OK.	10/5/2016	No	Extended Detention Basin	0	
Bus Transfer Station	13-0085.1	Warranty service request emailed to Contech on 9/1/2016.	8/31/2016	Yes	Manufactured BMP Systems	1	9/1/2016
Bus Transfer Station	13-0085.3	Warranty service request emailed to Contech on 9/1/2016.	8/31/2016	Yes	Manufactured BMP Systems	1	9/1/2016

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Bus Transfer Station	13-0085.2	CDS Unit, maintained by Norfolk-PW. Maintenance scheduled for November. Looked okay, no obvious issues or accumulated trash in unit, so no expedited service requested.	8/31/2016	No	Manufactured BMP Systems	0	
Calvary Presbyterian	03-317.1	Ok for now. No check dams present, swales there but barely noticable, large shipping containers sitting in swales, construction going on around tower for 64.	2/10/2017	No	Grassed Swale	0	
Calvary Presbyterian Church	06-0091.1	Ok	3/2/2017	No	Grassed Swale	0	
Calvert Square Community Center Improvements	T540.1	U/G Infiltration Trench - Ok, U/G perforated pipe clear, HVAC condensate drain line draining to BMP's upgradient DI, removed trash from downgradient DI.	5/16/2017	No	General Infiltration Practices	0	
Calvert Square Site Improvements	T663.1	U/G Infiltration Trench - Ok, U/G perforated pipe clear, minor amount of mulch and debris in DI on upgradient side of BMP.	5/16/2017	No	General Infiltration Practices	0	
Campostella Heights Seventh Day Adventist Church	05-0110.1	Please repair the broken observation well, cut back the bushes along the eastern end of the underground infiltration trench, and remove sediment and debris beneath the bushes along the eastern side of the infiltration trench to allow for better drainage from the parking lot.	12/6/2016	Yes	General Infiltration Practices	1	
Capitol Group Mail Center	08-0086.1	Ok. Please follow the maintenance schedule that accompanies the site plan.	9/27/2016	No	Detention Basin	0	
Cedar Grove Parking Lot	S33.1	Please pick up trash, remove underbrush and dead vegetation from retention basin, and clear leaves and debris from inlets and outlet structures. Last serviced on 4/26/2016 according to Hansen. Scheduled for monthly trash pickup and inlet and outlet clearing, and biannual (April/August) trimming of shrubs and trees.	9/16/2016	Yes	Detention Basin	1	
Central Brambleton	S30.1	Ok.	7/28/2016	No	Retention Basin	0	
Central Brambleton	S30.1	Ok - Inlets and outlets clear and minimal trash present, but woody vegetation around pond needs to be cut. Scheduled for monthly trash pickup and checking inlets and outlets, and trimming of shrubs and trees in June & October. Last serviced on 11/1/2016 per Hansen, tasks completed include cut grass, clear and clean debris, check for excessive erosion around bulkhead and inspect plants. Ok, need to aggressively cut back trees and woody vegetation around pond this coming June.	5/1/2017	No	Retention Basin	0	
Central Business Park	99-3931.1	Ok. Removed plastic bin from outfall. Scheduled for monthly maintenance. Last maintained on 5/31/2016 per Hansen.	10/11/2016	No	Retention Basin	0	
Central Business Park	99-3931.2	Pallets in basin. Talked with BCT Manager Ms. Tiffany Coffman to remove their pallets from the retention basin. I removed part of 1 pallet obstructing the outfall structure. Mr. Coffman said she would do it right away.	10/11/2016	Yes	Retention Basin	1	12/1/2016

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Central Business Park	99-3931.3	Flared-end inlet pipe has accumulated sediment with small trees growing in the sediment in it. Obstructions need to be removed.	10/11/2016	Yes	Grassed Swale	1	12/1/2016
Centura College	99-4224.1	Please remove accumulated fine sediment within the bottom of the detention basin, and remove leaf litter and debris within and around curb-inlet stormwater structures.	11/21/2016	Yes	Detention Basin	1	2/28/2017
Checker Taxi Parking Lot	00-4278.1	Some leaf litter present in infiltration basin. ~1" of water in bottom of observation well. Ok.	10/7/2016	No	General Infiltration Practices	0	
Checkered Flag Honda	T26.1	Ok	3/10/2017	No	Detention Basin	0	
Chesterfield Elementary Parking Lot	NPS18.1	Please remove vegetation within the stones from the bottom of the infiltration basin, and remove debris from the curb-cut inlets.	7/25/2016	Yes	General Infiltration Practices	1	
Chesterfield Elementary Parking Lot	NPS18.1	Infiltration basin - Ok, standing water in infiltration basin but rained within last 48 hours, minor sediment accumulation in curb-cut inlets, watch but Ok for now.	5/3/2017	No	General Infiltration Practices	0	
Chesterfield Heights WW Pump Station	S55.1	Ok	7/15/2016	No	Bioretention Basins	0	
Chesterfield Heights WW Pump Station	S55.1	Ok - bioretention basin clear and gravel pretreatment filter strip in good condition. Scheduled for service annually in March. Last serviced on 4/4/2016 according to Hansen.	5/3/2017	No	Bioretention Basins	0	
Chick-Fil-A (Store #03189)	13-0020.1	Filterra Unit. Please maintain the manufactured BMP (Filterra unit) in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	8/31/2016	Yes	Manufactured BMP Systems	1	11/22/2016
Chick-Fil-A (Store #03189)	13-0020.2	Contech Steel Catchbasin 2-Cartridge Stormfilter (F2 on plans). Please maintain the manufactured BMP in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	8/31/2016	Yes	Manufactured BMP Systems	3	2/13/2017
Chick-Fil-A (Store #03189)	13-0020.3	Contech 48" Manhole Stormfilter (F3 on plans). Please maintain the manufactured BMP in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	8/31/2016	Yes	Manufactured BMP Systems	3	2/14/2017
CHKD Parking Lot	05-0169.1	Some minor amounts of vegetation beginning to grow in pavers, but otherwise ok.	8/22/2016	No	General Infiltration Practices	0	
Christ the King Catholic School	03-0034.1	Infiltration basin located at southeast corner of building. Holding water and does not drain. Met with Mr. Bruce Agresto and Dr. Gagne about the infiltration basin not draining. Mr. Agresto said he has to regularly pump out the standing water within the basin. We discussed excavating/digging out the basin to remove any debris that may be inhibiting the infiltration of water and to make sure the bottom of the basin is excavated to a sufficient depth to intercept a sandy soil to help increase the infiltration capacity of the basin.	9/12/2016	Yes	General Infiltration Practices	1	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Christ the King Catholic School	03-0034.2	Infiltration basin by school entrance and parking lot. Ok.	9/12/2016	No	General Infiltration Practices	0	
Christopher Court	S17.1	Detention basin is overgrown and needs service. BMP is scheduled for monthly maintenance, last serviced on 5/31/2016 according to Hansen. Don't see how the detention basin is accessed. Spoke with Lot 14 (5273 Iowa Ave.) owner Andria Bogan (757-408-9395) about accessing BMP through her lot. She said she would be happy to oblige. Need to meet with BMP maintenance crew about maintaining this BMP.	10/7/2016	Yes	Detention Basin	1	
Chrysler Museum - Gallery Project	T222.1	Ok I guess. Roof drain must come out into infiltration gallery/trench below grade because I cannot see it.	9/6/2016	No	General Infiltration Practices	0	
Chrysler Museum Expansion and Renovation	11-0057.1	Please maintain the Filterra units in accordance with the manufacturer's specifications, and please provide copies of the maintenance logs. Also, please replace tree if dead, as suggested by Filterra manufacturer.	9/6/2016	Yes	Manufactured BMP Systems	1	
Chrysler Museum Expansion and Renovation	11-0057.2	Please maintain the Filterra units in accordance with the manufacturer's specifications, and please provide copies of the maintenance logs.	9/6/2016	Yes	Manufactured BMP Systems	1	
CHURCH PARKING LOT	12-0015.1	Please clear trash and debris from the swale and inlet draining into the detention basin, and please remove trash and debris from the detention basin.	9/2/2016	Yes	Extended Detention Basin	1	10/5/2016
Church Street Executive Office Park	04-0112.1	Please remove trash and debris within and around the retention basin, and clear/thin vegetation around the inlets and outlet of the retention basin.	5/10/2017	Yes	Retention Basin	1	7/28/2017
Citgo	T101.1	Site being redeveloped into JANAF Wawa - Site plans 16-0010 & revision 16-0081. Site Plan T101 archived on 2/16/2017.	2/15/2017	No	Grassed Swale	0	
Claremont Commons	04-0045.1	Ok, but infiltration trench appears to be in back (southern side) of townhomes beneath driveway. Gutter downspouts connected to some U/G line, and no gutters are in the front of the building.	9/9/2016	No	General Infiltration Practices	0	
Claremont Commons	04-0045.2	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and please provide a copy of the maintenance record.	9/9/2016	Yes	Manufactured BMP Systems	2	3/17/2017
Coleman Place Elementary School	NPS17.1	Ok. Some erosion of banks, but currently stabilized with grass, keep check on possible future erosion.	10/14/2016	No	Retention Basin	0	
Colonial Chevrolet	04-0018.1	Met Mr. Thomas onsite. He is said they have the Baysaver pumped out every year, and he will email me the most recent maintenance record.	1/4/2017	Yes	Manufactured BMP Systems	1	1/20/2017
Colonnas Shipyard Super Building Phase I	04-0002.1	U/G Infiltration Trench - Ok	12/8/2016	No	General Infiltration Practices	0	
Commander Corporate Center	06-0040.1	Ok	2/8/2017	No	Retention Basin	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Commerce Bank	06-0146.1	Excessive amount of sediment and debris accumulated in Filterra inlet. Please maintain the Filterra BMP in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	6/1/2017	Yes	Manufactured BMP Systems	1	7/31/2017
Commonwealth Building Materials	T285.1	Please remove leaf litter and other debris from the stone-lined infiltration swale.	8/2/2016	Yes	General Infiltration Practices	1	8/26/2016
CON Small Brick Building	S65.1	Ok.	7/5/2016	No	General Infiltration Practices	0	
CON Small Brick Building	S65.1	Grass swale with curb-cut inlet - Ok	4/11/2017	No	General Infiltration Practices	0	
Condo	03-0322.1	Please maintain the Stormfilters in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	12/16/2016	Yes	Manufactured BMP Systems	1	
Condo	03-0322.2	Please maintain the Stormfilters in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	12/16/2016	Yes	Manufactured BMP Systems	1	
Condo	03-0322.3	Please maintain the Stormfilters in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	12/16/2016	Yes	Manufactured BMP Systems	1	
Condo	03-0322.4	Please maintain the Stormfilters in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	12/16/2016	Yes	Manufactured BMP Systems	1	
Condo	03-0322.5	Please maintain the Stormfilters in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	12/16/2016	Yes	Manufactured BMP Systems	1	
Condo	03-0322.6	Ok	12/16/2016	No	Grassed Swale	0	
Condo	03-0322.7	Ok	12/16/2016	No	General Infiltration Practices	0	
Condo	03-0322.8	Ok	12/16/2016	No	General Infiltration Practices	0	
Condo (24 units)	05-0132.1	Contech Stormfilter. Last serviced 1-2/2015 per City's records. Looks OK, no maintenance needed at this time per manufacturer's specs.	10/26/2016	No	Manufactured BMP Systems	0	
Condo Lots A, B & C	04-0094.1	Ok. Infiltration basins clear and trench drain clear.	10/26/2016	No	General Infiltration Practices	0	
Condominium	03-0307.1	Rear Duplex burned down in either late 2016 or early 2017. Does not appear that BMP was installed because cannot find manhole/DI structures for U/G infiltration pipe/trench. Site redeveloped in late 2016/ early 2017 and using 10% reduction from original conditions so no BMP needed (Site Plan 16-0073). Site Plan 03-0307 archived on 4/6/2017.	4/6/2017	No	General Infiltration Practices	0	
Condominium	03-0307.2	Rear Duplex burned down in either late 2016 or early 2017. Does not appear that BMP was installed because cannot find manhole/DI structures for U/G infiltration pipe/trench. Site redeveloped in late 2016/ early 2017 and using 10% reduction from original conditions so no BMP needed (Site Plan 16-0073). Site Plan 03-0307 archived on 4/6/2017.	4/6/2017	No	General Infiltration Practices	0

Cornick Place Condominiums	06-0086.3	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/3/2017	Yes	Manufactured BMP Systems	1	2/8/2017
Cornick Place Condominiums	06-0086.4	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/3/2017	Yes	Manufactured BMP Systems	1	2/8/2017
Costco Gas Station	T644	Oil-Water Seperator - received email with copy of last service record from 11/1/2016 - Ok	3/6/2017	No	Manufactured BMP Systems	0	
Covenant Presbyterian Church	T448.1	Detention basins - Please clear sediment and vegetation from curb-cut inlets and from the rip-rap in the inlets.	5/8/2017	Yes	Detention Basin	1	7/25/2017
Covenant Presbyterian Church	T448.2	Detention basins - Please clear sediment and vegetation from curb-cut inlets and from the rip-rap in the inlets.	5/8/2017	Yes	Detention Basin	1	7/25/2017
Crossroads Elementary Rebuild	NPS22.2	Ok	8/16/2016	No	Rainwater Harvesting	0	
Crossroads Elementary Rebuild	NPS22.1	Please maintain the permeable pavement by keeping it clear of sediment, mulch, and other debris	8/16/2016	Yes	Permeable Pavement 1	1	
Crossroads Elementary Rebuild	NPS22.1	Ok - Permeable pavement clear of sediment and debris. Improved since last inspection in 8/2016.	6/26/2017	No	Permeable Pavement 1	0	
Crossroads Elementary Rebuild	NPS22.2	Large diameter U/G stormwater pipe along Bus Loading Area. Only minor debris seen in DI structures - Ok	6/26/2017	No	Rainwater Harvesting	0	
Dale's Train Station	T400	Ok - sediment cleared from curb cut inlet recently and spread out along upper bank of detention basin.	3/7/2017	No	Detention Basin	0	
Davita Dialysis Center	T122.1	Ok	2/15/2017	No	General Infiltration Practices	0	
Dey Street and Texas Avenue Roadway Extention	07-0017.1	Ok. Added to Hansen Maintenance Schedule, but no scheduled PM at this time.	9/28/2016	No	General Infiltration Practices	0	
Division of Streets & Bridges	S28.1	U/G infiltration trench. No regular maintenance schedule at this time per Hansen Maintenance Schedule. OK	11/7/2016	No	General Infiltration Practices	0	
Downtown Pump Station (PS 145)	S51.2	No grass swale present. Entire area where grass swale is supposed to be according to 07-0088 plans is paved with concrete.	9/16/2016	No	Grassed Swale	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Downtown Pump Station (PS 145)	S51.1	No bioretention basin, entire area is paved with concrete. A Contech 2-cartridge Stormfilter is located where the DI overflow structure for the bioretention basin was proposed in the plans for 07-0088. Need to get the revised plans and stormwater calculations and update PARS.	9/16/2016	No	Manufactured BMP Systems	0	
Dunkin Donuts	08-0055.1	Please remove trash and accumulated sediment and debris from the bioretention basin, and its curb-cut inlets and outlet structure.	6/6/2017	No	Bioretention Basins	0	
Duplex	05-0090.1	Ok. Observation well is dry.	7/6/2016	No	General Infiltration Practices	0	
Duplex	05-0090.2	Ok, but observation well not present	7/6/2016	No	General Infiltration Practices	0	
Duplex	03-0315.1	Ok, downspouts connected	7/7/2016	No	General Infiltration Practices	0	
Duplex	03-0315.2	Ok, downspouts connected.	7/7/2016	No	General Infiltration Practices	0	
Duplex	03-0315.3	Ok, downspouts connected (except for northern downspout on southern house; sheet flows down driveway to infiltration trench).	7/7/2016	No	General Infiltration Practices	0	
Duplex	09-0040.1	Ok.	7/6/2016	No	General Infiltration Practices	0	
Duplex	09-0040.2	Please connect roof gutter downspouts to the 6" perforated underground pipes that convey stormwater to the infiltration BMP.	7/6/2016	Yes	General Infiltration Practices	1	12/21/2016
Duplex	01-0165.1	Ok. Observation wells are dry. Still no roof gutters or downspouts.	7/7/2016	No	General Infiltration Practices	0	
Duplex	01-0165.2	Observation well missing from front infiltration BMP. New raised plant bed is covering a portion of the front infiltration BMP. Please remove the portion of the raised plant bed covering the infiltration BMP and reinstall the observation well in the front infiltration BMP. Back infiltration BMP observation well is dry, and still no roof gutters or downspouts.	7/7/2016	Yes	General Infiltration Practices	1	
Duplex	07-0074.1	Ok	8/22/2016	No	Grassed Swale	0	
Duplex	04-0125.1	Please restore the infiltration BMP, including the drainage swale and drainage line, to their original condition as shown in the approved plans. The infiltration BMP has been paved over with concrete, and the drainage swale is no longer distinguishable.	8/22/2016	Yes	General Infiltration Practices	3	8/2/2017
Duplex	06-0045.2	Bioretention basins at 2617, 2613, 2609, & 2603 Minnesota Ave. (site plans 06-0045, 06-0087, 06-0088, & 06-0089). Ok.	9/29/2016	No	Bioretention Basins	0	
Duplex	06-0045.1	Filterra on west side of Minnesota Ave. Crepe myrtle is overgrown and roots are causing the curb inlet to be clogged. Tree needs to be replaced and excess sediment needs to be cleaned out during tree removal.	9/29/2016	Yes	Manufactured BMP Systems	1	
Duplex	06-0045.3	Filterra on east side of Minnesota Ave. Crepe myrtle is overgrown and roots are causing the curb inlet to be clogged. Tree needs to be replaced and excess sediment needs to be cleaned out during tree removal.	9/29/2016	No	Manufactured BMP Systems	0	
Duplex	04-0012.1	Unit B (northern) infiltration basin - Ok	10/26/2016	No	General Infiltration Practices	0	
Duplex	04-0012.2	Unit A (southern) infiltration basin - Ok	10/26/2016	No	General Infiltration Practices	0

Duplex	06-0014.1	Bioretention plant beds - Ok but little to no ponding depth (up to 3" shown on plans)	4/5/2017	No	Bioretention Basins	0	
Duplex	06-0014.2	Bioretention plant beds - Ok but little to no ponding depth (up to 3" shown on plans)	4/5/2017	No	Bioretention Basins	0	
Duplex	06-0056.1	U/G infiltration trench with settlement sumps (manholes) connected to downspouts - Ok	4/5/2017	No	General Infiltration Practices	0	
Duplex	06-0056.2	U/G infiltration trench with settlement sumps (manholes) connected to downspouts - Ok	4/5/2017	No	General Infiltration Practices	0	
Duplex	04-0013.1	Swales Ok, found inlet DI for U/G infiltration BMP but could not find outlet DI. U/G infiltration pipe clear and dry at inlet DI - Ok	4/5/2017	No	General Infiltration Practices	0	
Duplex	03-0323.1	Ok	4/6/2017	No	General Infiltration Practices	0	
Duplex	03-0323.2	Ok	4/6/2017	No	General Infiltration Practices	0	
Duplex	03-0272.1	Ok - infiltration trenches covered with grass	4/6/2017	No	General Infiltration Practices	0	
Duplex	03-0272.2	Ok - infiltration trenches covered with grass	4/6/2017	No	General Infiltration Practices	0	
Duplex	03-0325.1	Infiltration BMP in backyard - No one home but could see depression in backyard over fence - Ok	4/6/2017	No	General Infiltration Practices	0	
Duplex	03-0325.2	Infiltration basins beside driveway - Ok	4/6/2017	No	General Infiltration Practices	0	
Duplex	03-0325.3	Infiltration basins beside driveway - Ok	4/6/2017	No	General Infiltration Practices	0	
Duplex	03-287.1	Infiltration BMPs along driveway - covered with sand and vegetation - Ok	4/6/2017	No	General Infiltration Practices	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Duplex	03-287.2	Infiltration BMPs along driveway - covered with sand and vegetation - Ok	4/6/2017	No	General Infiltration Practices	0	
Duplex	03-287.3	Infiltration BMP along northern (beach-side) edge of property, could see some stone from infiltration BMP but mostly covered with sand - Ok	4/6/2017	No	General Infiltration Practices	0	
Duplex	01-0173.1	Infiltration basins beside driveway - Ok	4/7/2017	No	General Infiltration Practices	0	
Duplex	01-0173.2	Infiltration basins beside driveway - Ok	4/7/2017	No	General Infiltration Practices	0	
Duplex	03-139.1	Infiltration basins beside driveway - Ok	4/7/2017	No	General Infiltration Practices	0	
Duplex	03-139.2	Infiltration basins beside driveway - Ok	4/7/2017	No	General Infiltration Practices	0	
Duplex	01-0165.1	Ok. Observation wells are dry. Still no roof gutters or downspouts.	4/7/2017	No	General Infiltration Practices	0	
Duplex	01-0165.2	Observation well missing from front infiltration BMP. New raised plant bed is covering a portion of the front infiltration BMP. Please remove the portion of the raised plant bed covering the infiltration BMP and reinstall the observation well in the front infiltration BMP. Back infiltration BMP observation well is dry, and still no roof gutters or downspouts.	4/7/2017	Yes	General Infiltration Practices	1	
Duplex	06-0073.1	Ok	5/12/2017	No	Extended Detention Basin	0	
Duplex	06-0069.1	Ok - although swale connecting infiltration basins is barely distinguishable	6/5/2017	No	General Infiltration Practices	0	
Duplex	06-0069.2	Ok - but swale connecting infiltration basins is barely distinguishable.	6/5/2017	No	General Infiltration Practices	0	
Duplex	06-0070.1	Ok - minor amount of debris (tree limbs) in rear infiltration basin	6/5/2017	No	General Infiltration Practices	0	
Duplex	06-0070.2	OK - minor amount of tree limbs in rear infiltration basin	6/5/2017	No	General Infiltration Practices	0	
Duplex	03-0096.1	Gravel infiltration areas (4) along driveway - Ok	6/14/2017	No	General Infiltration Practices	0	
Duplex - 3 Story	01-0078.1	2 small infiltration basins in backyard of duplex, barely distinguishable and covered with grass - Ok	4/7/2017	No	General Infiltration Practices	0	
Duplex - Lot 5 blk 3	05-0061.1	Ok, but no observation wells present	7/6/2016	No	General Infiltration Practices	0	
Duplex - Lot 5 blk 3	05-0061.2	Ok, but no observation well present	7/6/2016	No	General Infiltration Practices	0	
Duplex - Lot 6 blk3	05-0062.1	Ok, but no observation well present	7/6/2016	No	General Infiltration Practices	0	
Duplex - Lot 6 blk3	05-0062.2	Ok, but observation well not present	7/6/2016	No	General Infiltration Practices	0	
Duplex - Lot 7 blk 3	05-0063.1	Ok, but no observation well present	7/6/2016	No	General Infiltration Practices	0	
Duplex - Lot 7 blk 3	05-0063.2	Ok, but no observation well present	7/6/2016	No	General Infiltration Practices	0	
Duplex - Residental houses	05-0100.1	Ok	12/13/2016	No	General Infiltration Practices	0	
Duplex - Residental houses	05-0100.2	Ok	12/13/2016	No	General Infiltration Practices	0	
Duplex - Willoughby	04-0062.1	Bioretention basin - Ok, just grass in bioretention basin BMP	4/5/2017	No	General Infiltration Practices	0	
Duplex 9610-9614	03-0105.1	No defined swale present but roof downspouts are draining into yard (rooftop disconnect), and stormwater appears to be infiltrating in yard - Ok.	10/27/2016	No	Grassed Swale	0	
Duplex Complex William Henry Taylors Tract	03-0026.1	2 Infiltration basins with contributing swales from cul-de-sac. Clear vegetation away from overflow structure within Basin #1 (behind 8133-A Redmon Rd.)	10/28/2016	Yes	General Infiltration Practices	1	4/18/2017
Duplex Lot "C"	06-0015.1	U/G infiltration trench connected to roof downspouts on west side of duplex - Ok	4/5/2017	No	General Infiltration Practices	0	
Duplex Lots 59 & 60	05-0049.1	Shallow (nearly indistinguishable) infiltration area, dry - Ok	11/10/2016	No	General Infiltration Practices	0	
Duplex Lots 61 & 62	05-0051.1	Shallow (nearly indistinguishable) infiltration area, dry - Ok	11/10/2016	No	General Infiltration Practices	0	
Duplex Site Plan for Li Shen	12-0050.1	Pervious pavers in driveway - Ok	11/8/2016	No	General Infiltration Practices	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
EA's Daycare	14-0026.1	No record of inspection during construction, preconstruction meeting held on 10/21/2014, and CO released in 12/2014. Looks Ok today.	3/23/2017	No	Permeable Pavement 2	0	
East Beach Marina	12-0036.1	U/G Detention System & Pervious Pavers. Pervious Pavers - OK, Inspections ports for U/G detention system are dry and drop inlets are clear - OK	10/18/2016	No	General Infiltration Practices	0	
East Coast Brake Rebuilders	T447.1	Please repair the erosion to the overflow between the retention basin and the flared-end outlet pipe near Curlew Drive.	3/6/2017	Yes	Detention Basin	1	5/30/2017
Eaton Office Park Phase III	07-0123.1	Please clear accumulated sediment and debris from the inlet pipes, and remove woody vegetation from the detention basin.	2/3/2017	Yes	Detention Basin	1	4/12/2017
EG Middleton Office Addition	06-0023.1	Ok	9/7/2016	No	General Infiltration Practices	0	
Electrical Equipment Company	T214.1	Ok	3/7/2017	No	Retention Basin	0	
Element on Ghent	13-0000.1	Ok. Maintenance not needed at this time per maintenance decision tree in manufacturer's specifications (see sheet C-17 of plans).	10/19/2016	No	Manufactured BMP Systems	0	
Elm Court Development	T153.1	Ok - some standing water within DI structure.	2/15/2017	No	Detention Basin	0	
Endtime United Chruch of Jesus Christ Apostolic	03-0312.1	Infiltration Area "A" and #1 on plans. Ok	10/5/2016	No	General Infiltration Practices	0	
Endtime United Chruch of Jesus Christ Apostolic	03.0312.2	Infiltration Area "B" and #2 on plans. Ok.	10/5/2016	No	General Infiltration Practices	0	
EVMS Parking Addition	07-0060.1	Ok	9/6/2016	No	Grassed Swale	0	
EVMS Parking Garage Addition	09-0050	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	8/8/2016	Yes	Manufactured BMP Systems	2	12/20/2016
EVMS Parking Lot	01-0176.1	U/G Infiltration System - Ok, minor amount of debris in DIs and some standing water, but below tops of pipes and rained ~1/2 inch yesterday (6/5).	6/6/2017	No	General Infiltration Practices	0	
EVMS roadway widening	07-0090.1	Ok	8/8/2016	No	Bioretention Basins	0	
Excel Paving Corporation	T770.1	Please repair silt fence around and within the detention basin, and keep detention basin and inlet grate within the detention basin clear of debris.	3/13/2017	Yes	Detention Basin	1	4/25/2017
Fairlawn Elementary School Parking Lot	NPS09.1	Cleaned inlets and outlet structure - Ok	1/11/2017	No	Grassed Swale	0	
Fairlawn Recreation Center Addition	S23.1	Need to regrade swale draining southwest portion of parking lot to detention basin (sending work order request to BMP maintenance crew), and repair fence around BMP (talk to Rick to get fence contractor to repair).	3/20/2017	No	Detention Basin	0	
Faith Deliverance Christian Center	02-0244.1	Detention basin with forebay - Ok, dry, minor sediment accumulation at inlet.	5/8/2017	No	Detention Basin	0	
Faith Wesleyan Church	99-4033.1	Ok - some standing water present	2/9/2017	No	Detention Basin	0	
Family Dollar	04-0140.1	Remove accumulated sediment and debris and overgrown vegetation within and around the curb-cut inlet, outfall structure, and within and around the detention basin.	1/12/2017	Yes	Detention Basin	1	3/28/2017
Fayton-Sutherlin Bldg	08-0089.1	Ok.	7/18/2016	No	Extended Detention Basin	0	
Fayton-Sutherlin Bldg	08-0089.2	Ok	7/18/2016	No	Extended Detention Basin	0	
Fayton-Sutherlin Bldg	08-0089.3	Ok	7/18/2016	No	Manufactured BMP Systems	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Fentress Court Subdivision	05-0175.1	Ok - PVC drain line in swale from neighboring property is a stormwater drainage line from low area in neighboring lot	4/5/2017	No	Grassed Swale	0	
Filterra	S59.1	Remove excess soil in Filterra, replace missing grate, and perform regular maintenance.	8/29/2016	Yes	Manufactured BMP Systems	1	
Filterra	S60.1	Filterra at 418 Virginia Ave. Trim lower growth on tree, unclog/remove dirt obstruction the curb inlet of the Filterra, replace missing grate, and perform regular maintenance.	8/29/2016	No	Manufactured BMP Systems	0	
Filterra	S61.1	Filterra at 400 W. 37th St. Remove dirt obstructing the curb inlet of the Filterra, replace missing grates, and perform regular maintenance.	8/29/2016	No	Manufactured BMP Systems	0	
Filterra	S62.1	Filterra at 325 W. 36th St. Replace missing grates and perform regular maintenance.	8/30/2016	No	Manufactured BMP Systems	0	
Filterra	S58.1	2 Filterras at 3988 Omohundro Ave. - both have excessive buildup of sediment and debris, plants need to be pruned, and replace missing grates on western Filterra unit. S58 Filterras scheduled for biannual maintenance in February and September. Last serviced on 2/22/2017 according to Hansen. Needs maintenance again before September. Work order request placed already based on Javier's inspections in April. Will follow up to make sure it is completed.	5/1/2017	No	Manufactured BMP Systems	0	
Filterra	S58.2	2 Filterras at 3988 Omohundro Ave. - both have excessive buildup of sediment and debris, plants need to be pruned, and replace missing grates on western Filterra unit. S58 Filterras scheduled for biannual maintenance in February and September. Last serviced on 2/22/2017 according to Hansen. Needs maintenance again before September. Work order request placed already based on Javier's inspections in April. Will follow up to make sure it is completed.	5/1/2017	No	Manufactured BMP Systems	0	
Fine Arts Center - Norfolk Collegiate	11-0002.1	Ok	8/15/2016	No	Permeable Pavement 1	0	
First Baptist Church of Bolling Brook	01-0057.1	U/G Infiltration System - Ok	6/14/2017	No	General Infiltration Practices	0	
First Church of God	07-0047.1	Ok	4/4/2017	No	General Infiltration Practices	0	
First Church of God	07-0047.2	Ok	4/4/2017	No	General Infiltration Practices	0	
First Presbyterian Church	06-0125.1	Ok	8/19/2016	No	General Infiltration Practices	0	
First Presbyterian Church	06-0125.2	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	8/19/2016	Yes	Manufactured BMP Systems	1	9/14/2016
Floor Busters	08-0047.1	Grass swale is not present in places, swale destroyed by equipment and dumpsters, and other areas of the swale are covered by debris. Also, missing check dams and rip rap. Please reconstruct/ regrade the grass swales and stabilize with grass seed and hay, or sod.	8/19/2016	Yes	Grassed Swale	1	10/5/2016

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Floor Busters	08-0047.2	Vegetated filter strip is covered with debris, which has subsequently killed some of the vegetation. Please remove the debris and reestablish vegetation in accordance with the approved site plan.	8/19/2016	Yes	Vegetated Filter Strip	1	10/5/2016
FOR Kids Residence	04-0120.1	Ok. Grass (infiltration) swale present. missing check dam and drain to street. Timbers along walk path serving as check dam?	8/23/2016	No	General Infiltration Practices	0	
Ford Motor Company Body Shop & Final Area Addition	T487.1	Please clear vegetation and debris away from inlets and outlet control structure.	11/28/2016	Yes	Detention Basin	1	12/1/2016
Forest Lawn Cemetary	S56.1	Ok. No regular PM scheduled in Hansen for BMP Maintenance Crew. Appears that the Cemetery maintenance staff are maintaining the BMP.	9/19/2016	No	General Infiltration Practices	0	
Freemason St. Baptist Church	07-0007.1	Pervious Pavers. A minor amount of vegetation present between pavers but it's evident that they are working to remove the vegetation from between the pavers.	9/2/2016	No	General Infiltration Practices	0	
Fresenius Medical Center Expansion	08-0050.1	Ok	9/2/2016	No	Bioretention Basins	0	
Fresenius Medical Center Expansion	08-0050.2	Ok	9/2/2016	No	Bioretention Basins	0	
Fresenius Medical Center Expansion	08-0050.3	Ok	9/2/2016	No	Bioretention Basins	0	
Fuel Express at Farm Fresh	02-0001.1	Ok - minor amount of sediment in curb-cut inlets	1/17/2017	No	Bioretention Basins	0	
GE Mobile	10-0045.1	Site runoff is either treated onsite and discharged via their VPDES permit, to goes to sanitary and treated by HRSD. Met site manager, Paul Benton, and he verified that this is still the case. Ok	2/14/2017	No	Other SWMF	0	
Gethsemane Community Fellowship Church	S-03-0065.1	Infiltration basin located south of gravel parking lot across Reservior Ave. from church. Holding water and wetlands vegetation indicate the infiltration basin is not draining properly and sediment and debris need to be cleaned out of the basin.	5/4/2017	Yes	General Infiltration Practices	1	8/24/2017
Gethsemane Community Fellowship Church	S-03-0065.2	Infiltration area along southwest side of church. Ok - downspouts connected to U/G infiltration lines.	5/4/2017	No	General Infiltration Practices	0	
Ghent Arms	03-0169.1	Please remove vegetation, leaf litter, and debris from the infiltration basin.	7/29/2016	Yes	General Infiltration Practices	2	2/27/2017
Ghent Elementary School Bus Loop	NPS16.1	U/G Infiltration. Please clean/vactor out accumulated sediment within the underground perforated stormwater infiltration pipes and adjoining drop-inlet structures.	11/3/2016	Yes	General Infiltration Practices	1	
Ghent Village	14-0096.1	Ok	8/15/2016	No	Grassed Swale	0	
Gifford Office	05-0023.1	Please maintain the 2 Contech CDS units per the manufacturer's specifications, and provide copies of the maintenance records.	11/17/2016	Yes	Manufactured BMP Systems	1	5/19/2017
Gifford Office	05.0023.2	Please clean/vactor out the 2 underground infiltration systems in order to properly maintain the BMPs.	11/17/2016	Yes	General Infiltration Practices	1	5/19/2017
Givens Enterprise	GIVENS.1	Ok.	9/14/2016	No	Grassed Swale	0	
Glad Tidings Church	T731.1	U/G infiltration trenches - ok	3/2/2017	No	General Infiltration Practices	0	
Granby High School Renovations	NPS05.1	Ok	8/16/2016	No	General Infiltration Practices	0	
Granby High School Renovations	NPS05.2	Please clear accumulated sediment and debris from inlet.	8/16/2016	Yes	General Infiltration Practices	1	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Granby High School Renovations	NPS05.3	Please clear accumulated sediment and debris from inlet.	8/16/2016	Yes	General Infiltration Practices	1	
Granby High School Renovations	NPS05.4	Please fill and compact the sinkhole/depression beside the drop inlet within the infiltration basin BMP, and stabilize the soil with grass seed and hay or sod.	8/16/2016	Yes	General Infiltration Practices	1	
Granby High School Renovations	NPS05.1	BMP Basin #1 (Northwest corner of school property with 2 PVC overflow pipes to Newport Ave) - Ok	6/26/2017	No	General Infiltration Practices	0	
Granby High School Renovations	NPS05.2	BMP Basin #2 (Smallest basin along Harvard St.) - Need to remove leaf litter from the infiltration basin	6/26/2017	No	General Infiltration Practices	0	
Granby High School Renovations	NPS05.3	BMP Basin #3 (north of parking lot on north side of school, past end of Harvard St.) - Need to clear accumulated sediment and debris from inlet flume and remove leaf litter from the infiltration basin.	6/26/2017	No	General Infiltration Practices	0	
Granby High School Renovations	NPS05.4	BMP Basin #4 (along south side to track) - Repair sink hole next to DI within the infiltration basin.	6/26/2017	No	General Infiltration Practices	0	
Granby Municipal Building Parking Lot	S20.1	Inspected with Charles Sharp and Bruce Thomas. The infiltration basins have apparently been filled in, and need to be excavated out, reshaped, and stabilized. We discussed doing the work in a month or so after the work on the adjacent lot (making a dog park I think) is completed.	9/14/2016	No	General Infiltration Practices	0	
Grandy Village	04-0119.1	Grass swale with concrete valley - Ok	5/19/2017	No	Grassed Swale	0	
Grandy Village Site Improvements	09-0049.1	Could not access due to construction/demolition. Need to see final plans for Grandy Village Phase VI (Site Plan #16-0034) once approved to see if the BMP will be modified for the new phase of work.	7/15/2016	No	Bioretention Basins	0	
Grandy Village Site Improvements	09-0049.1	Area under construction - BMP being used as sediment basin for construction of Grandy Village Phase 6 (16-0034) BMP will be reinstalled after construction.	5/19/2017	No	Bioretention Basins	0	
Grandy Village, Phase 1	01-0222.1	Please maintain the Vortechnics unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	5/19/2017	Yes	Manufactured BMP Systems	1	5/30/2017
Grandy Village-Phase V Site Improvements	12-0028.1	Ok	7/29/2016	No	Detention Basin	0	
Grandy Village-Phase V Site Improvements	12-0028.1	Ok, construction adjacent to BMP - Grandy Village Phase 6 - 16-0034	5/19/2017	No	Detention Basin	0	
Grantham Square	06-0117.1	Porous Concrete - Requires quarterly vacuum sweeping per typical maintenance activities specified on plans. Also a few small patches of the porous concrete completed with asphalt, which is not permitted.	6/5/2017	Yes	General Infiltration Practices	1	
Grantham Square	06-0117.2	Infiltration trenches - Ok	6/5/2017	No	General Infiltration Practices	0	
Greek Orthodox Church	T86.1	Ok	8/3/2016	No	Grassed Swale	0	
Greek Orthodox Church	91067.012.1	Please remove debris from drop inlets within the parking lot, and remove the sediment accumulated at the eastern end of the parking lot that impedes the flow of stormwater into the infiltration basin.	8/4/2016	Yes	General Infiltration Practices	1	2/9/2017

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Green Gifford / Wells Fargo Bank commercial center	03-0015.1	Please clear accumulated sediment and debris, and vegetation away from inlets and the outlet control structure, and remove woody vegetation from banks of the retention basin.	1/17/2017	Yes	Retention Basin	1	2/23/2017
Gutterman Iron Works	08-0075.1	Please maintain the manufactured BMP (10K Baysaver Separator) in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	7/22/2016	Yes	Manufactured BMP Systems	1	8/5/2016
Gypsum Plant Expansion	05-0075.1	Ok. Holding water, and minor amount of debris accumulated in one inlet pipe. Discussed ongoing maintenance with USG Engineering Manager, Mr. Collin Polleys.	12/6/2016	No	Extended Detention Basin	0	
H.B. Hunter Parking Lot	T614.1	Please remove accumulated sediment and debris along curb lines and from curb-cut inlets into the infiltration trenches.	9/14/2016	Yes	General Infiltration Practices	1	10/24/2016
H.B. Hunter Parking Lot	T614.2	Please remove accumulated sediment and debris along curb lines and from curb-cut inlets into the infiltration trenches.	9/14/2016	Yes	General Infiltration Practices	1	10/24/2016
H.B. Hunter Parking Lot	T614.3	Please remove accumulated sediment and debris along curb lines and from curb-cut inlets into the infiltration trenches.	9/14/2016	Yes	General Infiltration Practices	1	10/24/2016
Harbor Heights	05-0073.1	Please maintain the Contech Stormfilter BMP in accordance with the manufacturer's specifications, and provide a copy of the maintenance log.	9/12/2016	Yes	Manufactured BMP Systems	1	1/23/2017
Harbor Walk	02-0275.1	Underground Infiltration Trench. Please remove accumulated sediment and debris from infiltration BMP.	10/28/2016	Yes	General Infiltration Practices	1	1/3/2017
Harris Teeter Store 378	08-0072.1	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	10/19/2016	Yes	Manufactured BMP Systems	1	4/27/2017
Heco Slings Corporation Building Addition	HECO.1	Some cut branches piled up along backside of detention basin. Talked to and emailed site staff about maintenance issues.	2/13/2017	No	Detention Basin	0	
Helena Townhouses	T474.1	Ok from what I could see	8/4/2016	No	General Infiltration Practices	0	
Herald of His Comming Church	00-4505.1	Infiltration basin #1 - Ok, dry, minor sediment accumulation in concrete flume inlet. Infiltration basin #2 not installed. That part of site plan not completed?	5/8/2017	No	General Infiltration Practices	0	
Home Depot, Broad Creek Crossing	T548.1	Please remove trash and debris from around the retention basin, and repair the outfall structure (repair/replace the anti-vortex device).	2/10/2017	Yes	Retention Basin	1	4/13/2017
HRT Park and Ride	01-0197.1	Ok - inlet & outlet clear, heavily vegetated banks.	1/17/2017	No	Retention Basin	0	
HRT Station Wards Corner	T402.1	Please remove accumulated sediment and debris from inlets, please remove woody vegetation within the detention basin, please cut/mow vegetation within the detention basin and remove clippings, and please clear vegetation and debris away from outlet structure.	8/3/2016	Yes	Detention Basin	1	1/23/2017

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
HRT Transfer Military Circle	HRT Transfer Military Circle.1	Pervious Pavers - Ok, Very minor amount of sediment accumulation between pavers along northern end of Bus Stop paver area.	5/10/2017	No	General Infiltration Practices	0	
Huntersville II Townhomes	06-0123.1	Porous Pavement. Ok.	7/18/2016	No	General Infiltration Practices	0	
Infinitee Day School	00-4467.1	L-shaped Infiltration swale by playground area - Ok, minor sediment accumulation at northern edge of parking lot.	6/14/2017	No	General Infiltration Practices	0	
Ingleside Elementary School Gymnasium	NPS23.1	Ok - discussed ongoing maintenance with Mr. Roy Keys, school maintenance supervisor.	2/16/2017	No	Detention Basin	0	
Iron Mountain Management Inc.	01-0003.1	Ok	1/18/2017	No	Detention Basin	0	
Islamic Center	10-0050.1	Ok. Owner recently killed vegetation within the bioretention basin. Spoke to owner during inspection about removing dead vegetation and tilling the soil the bioretention basin to help improve infiltration capacity of the soil within the bioretention basin.	8/19/2016	No	Bioretention Basins	0	
Jack Rabbit Self-Storage	06-0115.1	Please maintain the Stormceptor in accordance with the manufacturer's specifications, and provide a copy of the inspection and maintenance record.	6/1/2017	Yes	Manufactured BMP Systems	1	8/17/2017
Jack Rabbit Self-Storage	06-0115.2	Ok - Minimal trash and minor amount of sediment accumulation and flared-end inlets.	6/1/2017	No	Grassed Swale	0	
Jack's Towing	01-0010.1	Please restore swale to the specifications shown on the 12/19/2000 plans for "Site Plan of Parcel 8-A, 9-A, Resubdivision of Lot 9 and the Southern 50 Feet of Lot 8, a Subdivision of Outten & Bell Property, and Part of Lot 10, a Subdivision of Outten & Bell Property, Norfolk, Virginia".	1/19/2017	Yes	Grassed Swale	1	3/13/2017
Jacox Elementary School Bus Loop	NPS14.1	Ok	7/22/2016	No	General Infiltration Practices	0	
Jacox Elementary School Bus Loop	NPS14.2	Ok	7/22/2016	No	General Infiltration Practices	0	
Jacox Elementary School Bus Loop	NPS14.1	Grass infiltration basins with curb-cut inlets - Ok	5/3/2017	No	General Infiltration Practices	0	
Jacox Elementary School Bus Loop	NPS14.2	Grass infiltration basins with curb-cut inlets - Ok	5/3/2017	No	General Infiltration Practices	0	
Janaf Shopping Center	05-0181.1	Ok - minor amount of leaf litter present in DI connected to underground infiltration trench.	2/8/2017	No	General Infiltration Practices	0	
Janaf Shopping Center	05-0181.2	Not a manufactured BMP (Stormceptor). Manhole structure with stone-filled opening in bottom (infiltration BMP as shown on As-Built drawing). Some standing water present but ok.	2/8/2017	No	General Infiltration Practices	0	
Jerusalem Apostolic Christian Church	11-0042.1	Please maintain the Stormfilter BMP in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	6/2/2017	Yes	Manufactured BMP Systems	1	7/27/2017
John's Brothers Inc. Parking Lot and Wash Building	BROTHERS.1	Grass swale - minor amount of trash present but Ok. Site is now an auto body shop and they are washing vehicles outside of the wash bay because the sanitary drain in the wash bay is clogged. Informed site owner that it is an illicit discharge for the car wash water to go into the stormdrains, and they need to fix the wash bay drain immediately.	2/13/2017	No	Grassed Swale	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Kramer Tire	T577.1	Please clear accumulated sediment and debris from the curb-cut inlets, cut vegetation within the detention basin and remove clippings, and remove debris within and around the 4-inch outlet pipes.	3/6/2017	Yes	Detention Basin	1	5/16/2017
L. Fisherman & Son Inc. Flooring Installation	T449.1	Ok	3/8/2017	No	Grassed Swale	0	
La Quinta Hotel	06-0030.1	Ok - minor amount of trash present	2/9/2017	No	Detention Basin	0	
Lake Liberty, NRHA	S12.1	Ok, minor amount of trash present in northern embayment.	7/28/2016	No	Retention Basin	0	
Lake Liberty, NRHA	S12.1	Ok - Inlets and outlets clear and minimal trash present, and aerators working, but woody vegetation around pond needs to be cut. Scheduled for monthly trash pickup and checking inlets and outlets, and trimming of shrubs and trees in April & August. Last serviced on 4/19/2016 per Hansen, tasks completed include cut grass, clear and clean debris, check for excessive erosion around bulkhead and inspect plants. Need to aggressively cut back trees and woody vegetation around pond.	5/1/2017	No	Retention Basin	0	
Lake Modoc	S6.1	Retention basin - Ok. No obvious erosion of banks and minimal trash on banks or in water. 2 trees down in water. River otter swimming around during inspection. Lake Modoc scheduled for monthly trash removal, and biannual trimming of trees and shrubs around the lake. Last maintenance event completed on 12/7/2016 per Hansen.	4/11/2017	No	Retention Basin	0	
Lake Scott	S8.1	Place service request for erosion issues at dual culvert pipe inlet/outlet. Last serviced on 7/18/2016 according to Hansen, scheduled for monthly trash removal and checking inlets & outlets.	2/16/2017	No	Retention Basin	0	
Lake Taylor High School Stadium	NPS04.1	Stormceptor manufactured BMPs at Lake Taylor Stadium and BT Washington Stadium. Both need annual maintenance (i.e. to be vactored out). It does not appear that the BMPs were cleaned out as requested per the last inspection on 6/14/2016.	3/21/2017	Yes	Manufactured BMP Systems	1	5/1/2017
Lake Wright Executive Center	98-3611.1	Ok - minor amount of trash present and minor erosion along banks.	2/2/2017	No	Retention Basin	0	
Lake Wright Executive Center	98-3611.2	Ok - minor amount of trash present	2/2/2017	No	Retention Basin	0	
Lake Wright Executive Center	98-3611.3	Ok	2/2/2017	No	Retention Basin	0	
Lambert's Point Rec Center Parking Addition	S57.1	Ok	8/19/2016	No	General Infiltration Practices	0	
Lamberts Point 26th St. Improvements	09-0072.1	Filterra at 1241 W. 26th St. Trim tree, replace missing grates, and perform regular maintenance.	8/29/2016	No	Manufactured BMP Systems	0	
Lamberts Point Community Center	08-0008.1	Please remove mulch from drop inlet structures, and remove weeds from bioretention basin.	8/19/2016	Yes	Bioretention Basins	1	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Lamberts Point Pond	13-0089	Excessive algae mainly in the western side of the retention basin. Excessive amounts of phragmites growing around the pond and clogging the inlets and spillway of the pond. Moderate to excessive amount of trash within pond and within the vegetation around the perimeter of the pond.	8/29/2016	Yes	Retention Basin	1	
Lamberts Point Townhouses	10-0051.1	Pervious concrete driveway around townhomes - Ok	2/10/2017	No	General Infiltration Practices	0	
Lamberts Point Townhouses	10-0051.2	Filterra unit along 26th Street. Archived on 2/10/2017. Filterra is city maintained and identified as SWMF ID S59.1.	2/10/2017	No	Manufactured BMP Systems	0	
Land "N" Sea	04-0095.2	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	1/6/2017	Yes	Manufactured BMP Systems	1	
Land "N" Sea	04-0095.1	Ok	1/6/2017	No	Retention Basin	0	
Land "N" Sea	04-0095.3	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	1/6/2017	Yes	Manufactured BMP Systems	1	
Land "N" Sea	04-0095.4	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	1/6/2017	Yes	Manufactured BMP Systems	1	
Land "N" Sea	04-0095.5	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	1/6/2017	Yes	Manufactured BMP Systems	1	
Land "N" Sea	04-0095.6	Please remove leaf litter and other debris from the grass swale located along the southern portion of the property.	1/6/2017	Yes	Grassed Swale	1	
Langley Federal Credit Union	T455.1	Please clear the mulch, leaf litter, and debris within the inlet grates and the infiltration pipes.	8/3/2016	Yes	General Infiltration Practices	1	11/23/2016
Larchmont Elementary School	14-0084.1	Ok to release CO. Dewatering structure still in retention basin flared-end outlet. Emailed request to remove dewatering structure after the Phase III (existing school demo to be completed in summer 2017) E&S controls are in place.	6/1/2017	No	Retention Basin	0	
Laundromat, Shops, Offices	05-0009.1	Ok	9/30/2016	No	General Infiltration Practices	0	
LIDL Grocery Store	15-0054.1	Extended detention basin - Ok, release CO but the contractor still needs to install rip rap outlet protection at RCP flared-end structure C0 in N. Military Hwy ROW.	6/30/2017	No	Extended Detention Pond 1	0	
Little Creek Retail Shops	06-0062.1	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	6/5/2017	Yes	Manufactured BMP Systems	1	7/31/2017
Little Creek Self Storage	05-0179.1	Grading of the bioretention does not match the plans and therefore the BMP is not able to treat the stormwater runoff as designed. Please regrade the bioretention according to the approved plans.	11/8/2016	Yes	Bioretention Basins	1	1/12/2017

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Little Creek Self Storage	05-0179.2	Grading of the bioretention basins does not match the plans and therefore the BMPs are not able to treat the stormwater runoff as designed. Please regrade the bioretention basins according to the approved plans.	11/8/2016	Yes	Bioretention Basins	1	1/12/2017
Lot 25 8033 Ransom Road	08-0062.1	Ok - received revised As Built, release CO on 5/23/2017	5/22/2017	No	Bioretention Basins	0	
Lot 27 8025 Ransom Road	08-0060.1	4 Bioretenion basins - OK. Observations wells are dry. Pervious Pavers (for reduction in impervious area) Ok.	10/24/2016	No	Bioretention Basins	0	
Lots 21 & 22	03-0162.1	Ok. Some sediment and debris in trench drain but seems to be working ok. No observation well seen.	10/28/2016	No	General Infiltration Practices	0	
Lowe's	99-4237.1	Ok - minor amount of trash present	2/10/2017	No	Retention Basin	0	
Lowe's Garden Expansion	06-0138.1	Ok	3/6/2017	No	Vegetated Filter Strip	0	
Lumber Liquidators	09-0002.1	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance logs	11/28/2016	Yes	Manufactured BMP Systems	1	11/29/2016
Lumber Liquidators	09-0002.2	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance logs	11/28/2016	Yes	Manufactured BMP Systems	1	11/29/2016
Lyon Shipyard	05-0190.1	An addition to the building was built over the grass swale BMP, and covered ~half of the BMP. A ductile iron pipe was laid into the swale where it was filled in and built over. According to pictometry images, the addition was built sometime between 1/8/2015 and 1/15/2016. Also, there is a flared-end inlet into the DI at the end of the swale that is not shown on the plans.	5/10/2017	No	Grassed Swale	0	
MacArthur Mall Museum Expansion	S64.1	Filterra unit for Roof Drainage Area located on east side of building. No recent service history shown in Hansen.	9/19/2016	Yes	Manufactured BMP Systems	1	
MacArthur Mall Museum Expansion	S64.2	The detention basin is an underground infiltration pipe between 2 DIs on the northern side of the Museum Expansion. Looks OK per inspection on 9/19/2016. Last serviced on 4/11/2016 per Hansen. However, the maintenance tasks need to be changed to reflect the BMP type (underground infiltration not aboveground detention basin) banks do not need to be mowed. For maintenance the infiltration pipe should be vactored periodically to remove debris and fine sediment that accumulates in the infiltration pipe.	9/19/2016	No	Detention Basin	0	
Macedonia Christian Church	T116.1	Detention basin is overgrown. Please cut back vegetation and clear the inlets and outlet of the detention basin.	5/5/2017	Yes	Detention Basin	1	7/25/2017
Magnolia Cove Regional BMP	MAGBMP.1	Ok	2/13/2017	No	Detention Basin	0	
Mallory Country Club	01-0019.1	U/G Infiltration Trench - Ok, unable to open DIs but no debris seen in them.	6/9/2017	No	General Infiltration Practices	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Marine Hydraulics Incorporated	06-0135.1	Met Environmental Manager, Mr. Gary Small, onsite. We discussed maintenance issues with the detention basin. Currently the detention basin is OK, and we discussed ongoing maintenance concerns with the detention basin.	12/2/2016	No	Extended Detention Basin	0	
Marine Hydraulics Incorporated	06-0135.2	Vortechnics Model 3000. Mr. Small emailed me the inspection/maintenance log for the Vortechnics on 12/5/2016 - OK	12/2/2016	No	Manufactured BMP Systems	0	
Mariner's Watch Apartments -Phase 1	T627.1	Please remove trash, debris, and sediment accumulated in drop inlet structures.	7/6/2016	Yes	General Infiltration Practices	1	11/23/2016
Mariner's Watch Apartments -Phase 1	T627.2	Please remove trash, debris, and sediment accumulated in drop inlet structures.	7/6/2016	Yes	General Infiltration Practices	1	11/23/2016
Mariner's Watch Apartments -Phase 1	T627.3	Please remove trash, debris, and sediment accumulated in drop inlet structures.	7/7/2016	Yes	General Infiltration Practices	1	11/23/2016
Matrix Technical Solutions, Inc.	00-4283.1	Please clear accumulated sediment and debris within the curb inlet within the parking lot, clear sediment and debris from where the pipe coming from curb inlet in parking lot discharges into the swale, and clear vegetation and debris from drop inlet within the swale.	10/6/2016	Yes	General Infiltration Practices	1	12/19/2016
McDonald's rebuild	07-0113.1	Please clean out accumulated sediment and debris within the underground infiltration trench and the curb-inlet structure.	12/1/2016	Yes	General Infiltration Practices	1	2/27/2017
McKann Ave Street Expansion	S44.1	Filterra to be serviced every April & November per Hansen Maintenance schedule. Last serviced on 4/25/2016, and maintenance due this month. Inlet is blocked with sediment. Will meet with BMP maintenance crew to go over Filterra maintenance.	11/8/2016	No	Manufactured BMP Systems	0	
McKann Ave Street Expansion	S44.2	Filterra to be serviced every April & November per Hansen Maintenance schedule. Last serviced on 4/25/2016, and maintenance due this month. Inlet is blocked with sediment. Will meet with BMP maintenance crew to go over Filterra maintenance.	11/8/2016	No	Manufactured BMP Systems	0	
McRae Commons Condo Units	05-0145.1	Some ivy growing around grate inlet along fence, otherwise ok.	9/9/2016	No	General Infiltration Practices	0	
Meadow Lake	S15.1	Place service request to have spillway cleared out. Invasive aquatic vegetation treated last year (2016) by Solitude Lake Management on 8/30/2016 & 11/1/2016. Last serviced on 11/17/2016 according to Hansen. Scheduled for monthly trash removal and check inlets & outlets, and semiannual trimming of shrubs & trees.	2/16/2017	No	Retention Basin	0	
Meadowood Apartments	10-0059.1	Ok	9/27/2016	No	Retention Basin	0	
Meadowood Apartments	10-0059.2	Underground chambered detention system. Ok. Possible illicit discharge noticed (foam in water) at the outlet orifice structure, but tested negative for detergents.	9/27/2016	No	Manufactured BMP Systems	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Medical Center	06-0092.1	Ok - behind fences behind (east side) of buildings.	6/5/2017	No	Bioretention Basins	0	
Medical Office Building	06-0042.1	Please remove trash and loose pieces of concrete from the detention basin, and repair areas of erosion around the inlets of the detention basin. It may be helpful to add additional erosion protection measures (such as stone) to the eroded areas to provide protection after the repairs are completed.	2/2/2017	Yes	Extended Detention Basin	1	2/8/2017
Metro Towing Company, Inc.	14-0094.1	Finished installation of permeable pavement (uncapped stone reservoir) - Ok, approve release of CO and bond on 3/20/2017	3/20/2017	No	Permeable Pavement 1	0	
Metropolitan Funeral Service	06-0134.1	Pervious pavement - OK	12/2/2016	No	General Infiltration Practices	0	
Miller Gas Station	04-0067.1	An oil spill occurred from a waste oil container behind the Miller Neighborhood Market and University Car Care shop, and the oil contaminated the filter media within the manufactured BMP (Filterra unit). Please remove and replace the contaminated media within the Filterra unit.	8/24/2016	Yes	Manufactured BMP Systems	1	10/6/2016
Milton Point at Kimball Terrace Shipyard	15-0046.1	All 3 Dry Swales in good condition. Approved for release of CO.	1/12/2017	No	Dry Swale 1	0	
Milton Point at Kimball Terrace Shipyard	15-0046.2	Ok - approve release of CO	1/12/2017	No	Dry Swale 1	0	
Milton Point at Kimball Terrace Shipyard	15-0046.3	Ok - approve release of CO	1/12/2017	No	Dry Swale 1	0	
Mission College Clubhouse	09-0014.1	Please remove accumulated sediment from the detention basin inlet.	7/18/2016	Yes	Detention Basin	1	8/5/2016
Mixed Use Development Church St.	14-0080.1	Final Inspection before releasing CO. Ok.	9/26/2016	No	Detention Basin	0	
Mixed Use Development Church St.	14-0080.2	Final Inspection before releasing CO. Ok	9/26/2016	No	Permeable Pavement 1	0	
Mixed Use Development Church St.	14-0080.1	Ok - minor amount of erosion at inlets	5/15/2017	No	Detention Basin	0	
Mixed Use Development Church St.	14-0080.2	Ok	5/15/2017	No	Permeable Pavement 1	0	
Moran Towing of Virginia, Inc.	T450.1	Ok, actually a concrete swale to gravel swale with gravel check dam - minor sediment accumulation in concrete swale.	5/10/2017	No	Grassed Swale	0	
Mount Pleasant Baptist Church Parking Lot	T593.1	Please remove the debris from the detention basin and the stormwater drop inlet in the parking lot.	8/4/2016	Yes	Detention Basin	1	1/25/2017
Mt. Gilead Baptist Church	00-4298.2	Please clear accumulated sediment and debris from curb cut inlets, and remove vegetation (grass and weeds) from the infiltration basins	10/7/2016	Yes	General Infiltration Practices	1	1/23/2017
Mt. Gilead Baptist Church	00-4298.1	Please clear accumulated sediment and debris from curb cut inlets, and remove vegetation (grass and weeds) from the infiltration basins	10/7/2016	Yes	General Infiltration Practices	1	1/23/2017
Mt. Gilead Chruch Addition	00-4540.1	U/G infiltration trench. ~1" of water in bottom of observation well. Ok.	10/7/2016	No	General Infiltration Practices	0	
Mulit-Family Housing Unit	08-0023.1	Ok - dry	12/22/2016	No	Bioretention Basins	0	
Mulit-Family Housing Unit	08-0023.2	Ok	12/22/2016	No	Grassed Swale	0	
Nash Warehouse	05-0165.1	Please maintain the Bay Saver Vault Systems in accordance with the manufacturer's specifications, and provide copies of the maintenance logs.	1/3/2017	Yes	Manufactured BMP Systems	1	
Nash Warehouse	05-0165.2	Please maintain the Bay Saver Vault Systems in accordance with the manufacturer's specifications, and provide copies of the maintenance logs.	1/3/2017	Yes	Manufactured BMP Systems	1	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Nash Warehouse	05-0165.3	Ok - Keep check on sediment accumulating in western inlet rip rap.	1/3/2017	No	Detention Basin	0	
Nauticus	S29.1	U/G chambered BMP. 3" to 10" of accumulated sediment in the chambers, but has not built up to the invert of the outlet pipe. Last serviced (vactored out) on 11/12/2015, and next service is scheduled for 11/2016.	9/12/2016	No	Manufactured BMP Systems	0	
New Hope Christian Community Church	T343.1	Ok. Minor amount of vegetation (grass) growing over stone infiltration areas. Spoke with Rev. Dr. Calvin Durham about maintaining the infiltration BMPs.	9/15/2016	No	General Infiltration Practices	0	
New Hope Christian Community Church	T343.2	Ok. Minor amount of vegetation (grass) growing over stone infiltration areas. Spoke with Rev. Dr. Calvin Durham about maintaining the infiltration BMPs.	9/15/2016	No	General Infiltration Practices	0	
New Hope United Church of Christ	06-0096.1	Ok	12/6/2016	No	Detention Basin	0	
New Life Christian Center	07-0065.1	Please clear the curb cut inlets to allow for better drainage of stormwater runoff into the bioretention basin.	9/29/2016	Yes	Bioretention Basins	1	2/24/2017
Norfolk Academy	T748.1	Ok	3/29/2017	No	Retention Basin	0	
Norfolk Academy Football Stadium	15-0059.1	2 Urban Bioretentions - Plan was modified during construction. The urban bioretentions were installed as 3-tier systems. Engineer and contractor supplied revised As-built drawings and the revised calculations after the final inspection - Ok, CO approved for release on 6/28/2017 following review of revised as built.	6/15/2017	No	Bioretention Urban	0	
Norfolk Academy Football Stadium	15-0059.2	Artificial turf areas with stone storage beneath between track and stands - Ok	6/15/2017	No	Permeable Pavement 1	0	
Norfolk Academy Football Stadium	15-0059.3	Grass channel behind stands - Ok	6/15/2017	No	Grass Channel	0	
Norfolk Academy Football Stadium	15-0059.4	Conservation area within landscaped area - Ok	6/15/2017	No	Rooftop (Impervious Surface) Disconnection	0	
Norfolk Apostolic Church Parking Lot	06-0026.1	Ok	9/30/2016	No	Bioretention Basins	0	
Norfolk Christian School	05-0153.1	Ok - minor amount of vegetation in stone-filled detention basin. Some water in observation well ~1 ft below top of casing. Underdrain draining (trickling) into DI. Did not see western inlet drain.	6/5/2017	No	Detention Basin	0	
Norfolk Christian Soccer Field	15-0058.1	Ok	5/12/2017	No	Grass Channel	0	
Norfolk Collegiate Lower School	T478.1	Please clear accumulated sediment and debris from the inlets and outlet, and remove fallen trees from the extended detention basin.	9/14/2016	Yes	Extended Detention Basin	1	1/23/2017
Norfolk Collegiate Middle School	03-0042.1	Gravel infiltration basin located along northeast side of parking lot off of Granby Park. Ok - minor amount of weed growth in stones and leaf litter in inlet swale. Also, storing some metal bleachers in BMP but not taking up much room.	6/7/2017	No	General Infiltration Practices	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Norfolk Collegiate Middle School	03-0042.2	U/G Infiltration system in parking lot along Suburban Pkwy. Ok - minor sediment accumulation in DIs. However, seems as though the site was redeveloped. the 2 southern most DIs that are part of the U/G infiltration system are now in the grass between the parking lot and new synthetic turf athletic field. Based on historical photography they were previously in the parking lot.	6/7/2017	No	General Infiltration Practices	0	
Norfolk Commerce Park	04-0066.1	Please clear accumulated debris and sediment from the drop inlet structure within the parking lot.	10/5/2016	Yes	General Infiltration Practices	1	11/3/2016
Norfolk Commerce Pond #1	S9.1	Ok. Not on Hansen Maintenance Schedule. Appears that the BMP is being maintained by Capitol Group.	9/27/2016	No	Retention Basin	0	
Norfolk Commerce Pond #2	S10.1	Ok. Not on Hansen Maintenance Schedule. Appears that the BMP is being maintained by Capitol Group.	9/27/2016	No	Retention Basin	0	
Norfolk Commerce Pond #3	S11.1	Ok. Minimal trash, inlets clear, and grass mowed within past few weeks. On schedule for monthly maintenance, but do not see when it was last serviced in Hansen (although the BMP appears to be being maintained on a regular basis).	10/7/2016	No	Detention Basin	0	
Norfolk Community Rowing Center	00-4300.1	Please remove the woody vegetation within the infiltration basin, and remove the leaf litter and other debris from the infiltration basin and rip rap spillway.	8/25/2016	Yes	General Infiltration Practices	2	7/24/2017
Norfolk Cruise Terminal	05-0060.1	Ok. Last serviced in November 2015 according to Hansen. Scheduled for next service (to be vactored out) in November of 2016. Yearly cleaning seems to be adequate based on measurements (depth to water of 62" and depth to top of sediment pile of 104") because the accumulated sediment does not seem to be exceeding the 75% capacity of the isolated sump.	9/12/2016	No	Manufactured BMP Systems	0	
Norfolk Cruise Terminal	05-0060.2	2nd CDS unit (structure #9 on storm structure schedule) is not where it was proposed on the plans. The CDS unit is located further west on the pier. Unit seems to be in good condition. Next maintenance event scheduled for November 2016.	9/12/2016	No	Manufactured BMP Systems	0	
Norfolk Fitness and Wellness Center	T217.1	Please remove the sediment accumulated at the end of the inlet pipe.	8/4/2016	Yes	Detention Basin	1	
Norfolk General New Pavilion & Parking	03-0327.1	Please clear vegetation and debris from inlets and outlets of the bioretention basin, remove the woody vegetation within the bioretention basin, and cut back the remaining vegetation within the bioretention basin.	8/25/2016	Yes	Bioretention Basins	1	11/22/2016
Norfolk General New Pavilion & Parking	03-0327.2	Please clear vegetation and debris from inlets and outlets of the bioretention basin, remove the woody vegetation within the bioretention basin, and cut back the remaining vegetation within the bioretention basin.	8/25/2016	Yes	Bioretention Basins	1	11/22/2016

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Norfolk General New Pavilion & Parking	03-0327.4	Please maintain the Stormceptor in accordance with the manufacturer's specifications, and provide a copy of the maintenance log.	8/25/2016	Yes	Manufactured BMP Systems	1	11/22/2016
Norfolk General New Pavilion & Parking	03-0327.3	Please maintain the Stormceptor in accordance with the manufacturer's specifications, and provide a copy of the maintenance log.	8/25/2016	Yes	Manufactured BMP Systems	1	11/22/2016
Norfolk Juvenile Detention Center	S26.1	Currently under construction, being converted to a larger retention basin.	3/15/2017	No	Detention Basin	0	
Norfolk Multi-Modal Transportation Center	S67.1	Filterra unit at parking lot entrance. Last serviced on 4/26/2016 per Hansen, and next maintenance event scheduled for 12/2016. Ok.	9/19/2016	No	Manufactured BMP Systems	0	
Norfolk Police Department Firearms Range	S49.1	Spoke with facility maintenance staff to remove the 4 55-gallons drums full of ash where they are burning targets for disposal.	2/21/2017	No	General Infiltration Practices	0	
Norfolk Public Health Center	S27.1	Ok. Curb inlet structure has a moderate amount of accumulated sediment within it but it has not yet built up to the invert of the pipe going to the U/G infiltration system.	9/15/2016	No	General Infiltration Practices	0	
Norfolk Public Schools Transportation Operations	NPS02.1	Please clear debris off of and away from the spillway drop inlet grate, and remove trash from the detention basin.	2/23/2017	No	Detention Basin	0	
Norfolk Tent Company	T229.1	Sediment cleared out of inlet pipe since last inspection - Ok	1/3/2017	No	Detention Basin	0	
Norfolk Yacht and Country Club	00-4333.1	Please inspect and maintain the Vortech unit in accordance with the manufacturer's specifications, and provide a copy of the inspection and maintenance records.	6/13/2017	Yes	Manufactured BMP Systems	1	
Northside Middle School Parking Lot	NPS21.1	Please remove debris from curb cut inlets, weeds from the bioretention basin, and accumulated mulch, sediment, and debris from the drop inlet structure within the bioretention basin.	7/5/2016	Yes	Bioretention Basins	1	
Northside Middle School Parking Lot	NPS21.1	Ok, some weed growth within bioretention basin but otherwise good.	4/4/2017	No	Bioretention Basins	0	
Norview Community Center	S48.1	Ok.	10/12/2016	No	Bioretention Basins	0	
Norview Community Center	S48.2	U/G Infiltration (Detention) System. Minor amounts of trash and sediment present. - OK. No PM schedule for this BMP for the maintenance crew at this time.	10/12/2016	No	General Infiltration Practices	0	
Norview High School	NPS11.1	A minimal amount of trash was present (was likely recently cleaned during tree cutting/pruning). A significant to excessive amount of algae is present in the pond. Please clear the vegetation and other debris around the flared-end inlet and outlet pipes.	8/16/2016	Yes	Retention Basin	1	
Norview Landings	00-4343.1	Ok	10/7/2016	No	Detention Basin	0	
NPD 2nd Prencinct Training Center	S45.1	Last maintained on 11/30/2017 per Hansen (trimmed trees and shrubs around pond). Minor amount of trash within and around pond, and need to clear vegetation and debris around inlets and outlets.	3/15/2017	No	Retention Basin	0	
NRHA Broad Creek Ph. 5	14-0022.1	Ok - minor amount of trash present	2/28/2017	No	Extended Detention Basin	0	
NRHA CMD Facility	T99.1	Ok	7/15/2016	No	General Infiltration Practices	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
NRHA CMD Facility	T99.1	Ok - standing water but inspected immediately after rain event	5/5/2017	No	General Infiltration Practices	0	
O' Reilly Auto Parts	T278.1	Please clear/remove accumulated sediment and debris from the 3 slotted inlet grates, the perforated drainage lines, and the connecting structures.	9/15/2016	Yes	General Infiltration Practices	1	12/22/2016
O'Reilly Auto Parts	11-0015	Please repair erosion from rooftop downspouts, cut back vegetation from concrete pipe inlet, and remove plug from outfall orifice.	10/24/2016	Yes	Extended Detention Basin	1	4/19/2017
Ocean View Avenue Duplex	13-0040.1	Ok	7/5/2016	No	Detention Basin	0	
ODU University Village	S39.1	Ok	8/29/2016	No	Retention Basin	0	
Office Warehouse	05-0195.1	Ok	9/30/2016	No	Extended Detention Basin	0	
Office Warehouse Complex	02-0170.1	Ok - both basins	1/13/2017	No	Bioretention Basins	0	
Orapax Inn	08-0026.1	Ok	8/8/2016	No	Permeable Pavement 1	0	
Palace Station, LLC	06-0019.1	2 Storm Tech underground detention systems. <1" of standing water in obs. port for western Storm Tech system (SD-3), ~8" standing water in obs. port and sediment accumulated in drop inlet structures upstream and downstream of northern Storm Tech system (SD-10). Northern Storm Tech system needs maintenance.	10/26/2016	Yes	Manufactured BMP Systems	1	4/13/2017
Palmetto St Drainage Improvement	11-0071.1	Hansen maintenance schedule lists the detention basin is to be maintained monthly. Last maintenance event completed on 5/9/2016 per Hansen. Please remove trash from detention basin and clear accumulated sediment from inlet pipes.	9/22/2016	No	Detention Basin	0	
Park Crescent Apartments	11-0012.1	Please maintain the Contech Stormfilter (8' x 11' Peak Diversion Model) in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	9/28/2016	Yes	Manufactured BMP Systems	1	3/24/2017
Park Crescent Apartments	11-0012.2	Underground Detention System B (Structure #B12). Ok.	9/28/2016	No	Manufactured BMP Systems	0	
Park Crescent Apartments	11-0012.3	CDS Unit #1 (Structure #A15). Please maintain the Contech CDS unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance log.	9/28/2016	Yes	Manufactured BMP Systems	1	3/24/2017
Park Crescent Apartments	11-0012.4	CDS Unit #2 (Structure #A27). CDS unit is filled with sediment and other debris and requires immediate service. Please maintain the CDS unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance log.	9/28/2016	Yes	Manufactured BMP Systems	1	3/24/2017
Park Crescent Apartments	11-0012.5	Underground Detention System A (Structure #A16). Ok.	9/28/2016	No	Manufactured BMP Systems	0	
Parkdale Day School	91067.032.1	Drip Line Ok. No porous concrete (not installed, assume this was Okayed because there is a letter in the file from the design engineer stating they were not going to install the porous concrete, but remove the basketball court instead).	8/4/2016	No	General Infiltration Practices	0	
Parking Lot	T792.1	Infiltration trench/swale - Ok, dry, very minor amount of leaf litter present.	5/8/2017	No	General Infiltration Practices	0	
Parking Lot Addition	04-0115.1	Some leaf litter present - Ok.	11/21/2016	No	Grassed Swale	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Parking Lot Addition	04-0115.3	Excessive leaf litter and debris present in curb inlet structure immediately upgradient of underground BMP. Please clean out the upgradient stormwater structures, and maintain the BMP in accordance with the manufacturer's specifications and provide copies of the maintenance records.	11/21/2016	Yes	Manufactured BMP Systems	1	1/6/2017
Parking Lot Addition	04-0115.2	Excessive leaf litter and debris present in curb inlet structure immediately upgradient of underground BMP. Please clean out the upgradient stormwater structures, and maintain the BMP in accordance with the manufacturer's specifications and provide copies of the maintenance records.	11/21/2016	Yes	Manufactured BMP Systems	1	1/6/2017
Parktowne Apartments	05-0188.1	Ok	11/8/2016	No	Grassed Swale	0	
Parktowne Apartments	05-0188.2	Ok	11/8/2016	No	Grassed Swale	0	
Parktowne Apartments	05-0188.3	Received record for 6/22/2016 Filterra maintenance event by email on 10/19/2016 - Ok	11/8/2016	No	Manufactured BMP Systems	0	
Parktowne Apartments	05-0188.4	Received record for 6/22/2016 Filterra maintenance event by email on 10/19/2016 - Ok	11/8/2016	No	Manufactured BMP Systems	0	
Parktowne Apartments	05-0188.5	Ok	11/8/2016	No	Grassed Swale	0	
Parktowne Apartments	05-0188.6	Received record for 6/22/2016 Filterra maintenance event by email on 10/19/2016 - Ok	11/8/2016	No	Manufactured BMP Systems	0	
Parktowne Clubhouse	14-0008.1	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	10/18/2016	Yes	Manufactured BMP Systems	1	12/1/2016
Partrea Apartments	13-0026.1	Stormtech U/G Detention Chamber System	8/15/2016	No	Manufactured BMP Systems	0	
Partrea Site Improvements	15-0021.1	Pervious Pavers - Ok to release CO and bond	5/16/2017	No	Permeable Pavement 1	0	
Pepsi Bottling Group	03-0087.1	Please clear debris from outlet control structure.	1/13/2017	Yes	Retention Basin	1	2/14/2017
Picadily Mews	02-0193.1	Ok	10/7/2016	No	Detention Basin	0	
Picadily Mews	02-0193.2	Ok	10/7/2016	No	Grassed Swale	0	
Pizzeria Uno	T70.1	Please clear accumulated debris and sediment from the inlets and remove trash from the retention basin.	3/10/2017	Yes	Retention Basin	2	6/30/2017
Plume Ln. Parking Garage	S35.1	Ok. ~2 inches of sediment in bottom of structures. Last serviced (vactored) on 12/15/2015 and next service scheduled for 11/2016.	9/16/2016	No	Manufactured BMP Systems	0	
Police Training Center Track	S46.1	Ok	2/23/2017	No	Grassed Swale	0	
Police Training Center Track	S46.2	Ok - cleared vegetation away from one of the inlets, also some of the woody vegetation had been cut back along the banks of the detention basin since the last inspection on 5/26/2016.	2/23/2017	No	Extended Detention Basin	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Pope Avenue Street Improvements	S34.1	Curb inlet basin with trash baffles and infiltration trench. 2-3" of sediment in curb inlet side of baffled basin. Inlet and outlet of infiltration trench are ok. BMP not currently scheduled for regular maintenance. Will try to schedule for yearly cleaning/vactoring out of curb inlet baffled basin.	9/16/2016	No	Manufactured BMP Systems	0	
Pretty Lake Condos	13-0089.1	Ok.	11/8/2016	No	Extended Detention Basin	0	
Pretty Lake Terrace - Infrastructure Only	03-0129.1	Minor amounts of sediment & debris in the 2 northern paved flumes, but otherwise OK.	11/21/2016	No	Grassed Swale	0	
Pretty Lake Townhouses	03-0303.1	Ok, 2603-2607 Pretty Lake built, but not 2609-2615. Will need to reshape swale along back of 2609-2615 when built to allow for proper drainage to reach BMP.	12/20/2016	No	Extended Detention Basin	0	
Pretty Lake Village	03-0292.1	Please remove accumulated sediment and debris from the underground infiltration pipes.	12/16/2016	Yes	General Infiltration Practices	1	
Promenade Pointe	10-0061.1	Please maintain the Filterra units in accordance with the manufacturer's specifications, and please provide copies of the maintenance logs.	9/2/2016	Yes	Manufactured BMP Systems	1	1/25/2017
Promenade Pointe	10-0061.2	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	9/2/2016	Yes	Manufactured BMP Systems	1	1/25/2017
Public Storage	04-0030.1	Western dry pond. Ok	10/5/2016	No	Extended Detention Basin	0	
Public Storage	04-0030.2	Eastern dry pond. Ok.	10/5/2016	No	Extended Detention Basin	0	
Pump Station 34 Replacement	S54.1	Ok	8/15/2016	No	Grassed Swale	0	
Pump Station 34 Replacement	S54.1	Grass Swale - Scheduled for monthly grass cutting and trash removal - ok regarding these maintenance concerns. However, the grass swale is barely distinguishable, may need to be regraded. However, some of the piping for the pump station runs under the swale according to the plans.	6/26/2017	No	Grassed Swale	0	
Quarles Petroleum, Inc.	01-0009.1	Please remove trash within and around the extended detention basin.	1/20/2017	Yes	Extended Detention Basin	1	3/23/2017
Quarles Petroleum, Inc.	01-0009.2	Ok - previous letters in file from Eric Hiltner with Quarles Petroleum stating they inspect the OWS on a frequent basis, and service it as needed.	1/20/2017	No	Manufactured BMP Systems	0	
Quick Range	03-0017.1	Ok	1/5/2017	No	Grassed Swale	0	
Rally's	03-0047.1	Please remove accumulated sediment and debris from curb-cut inlets, and remove dead vegetation, trash, and debris from infiltration basin to help maintain infiltration capacity of BMP.	10/5/2016	Yes	General Infiltration Practices	1	1/27/2017
Residental Dwellings	05-0137.1	Ok	11/14/2016	No	Bioretention Basins	0	
Retail / Offices	08-0009.2	Ok.	10/19/2016	No	General Infiltration Practices	0	
Retail / Offices	08-0009.3	Ok.	10/19/2016	No	General Infiltration Practices	0	
Retail / Offices	08-0009.1	Ok.	10/19/2016	No	General Infiltration Practices	0	
River House Apartments	07-0073.1	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/24/2017	Yes	Manufactured BMP Systems	1	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
River House Apartments	07-0073.2	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/24/2017	Yes	Manufactured BMP Systems	1	
River Oaks Office Addition	03-163.1	Ok - bottom valley of swale is paved, but with relatively short gravel infiltration area at southeastern corner of property.	3/6/2017	No	Grassed Swale	0	
Riverpark Condominiums	02-0075	Ok.	9/15/2016	No	General Infiltration Practices	0	
Riverpoint Condos	05-0176.1	U/G Infiltration Trench - Ok, minor amount of debris accumulation in yard basins but perforated pipes are clear.	6/7/2017	No	General Infiltration Practices	0	
Riverside Commerce Center I	T719.1	Ok	3/6/2017	No	Retention Basin	0	
Riverside Corporate Center Parcel	03-160.1	Ok	1/11/2017	No	Retention Basin	0	
RiverStar Homes Bioretention	S69	Please clear debris between riprap at bioretention inlet at end of Luxembourg Ave.	9/19/2016	Yes	Bioretention Basins	1	
Ronald McDonald House	01-0031.1	Please clear accumulated sediment from inlet pipe to allow for drainage from roof drains to enter the bioretention BMP.	6/9/2017	Yes	Bioretention Basins	1	7/25/2017
Roper Home Parking Lot	15-0008.1	Final inspection for CO - Ok but waiting for recorded Declaration of Covenants	2/22/2017	No	Permeable Pavement 2	0	
RSG Roofing Supply	03-0033.1	Please remove trash within and around the extended detention basin, and remove the trees around the outlet structure.	1/5/2017	Yes	Extended Detention Basin	1	3/31/2017
Ruby Tuesday	05-0093.1	Please maintain the Stormfilter BMP per the manufacturer's specifications, and provide a copy of the maintenance record.	11/14/2016	Yes	Manufactured BMP Systems	1	
Ruggoso Dunes	03-0138.1	Pervious Pavers - Ok	11/18/2016	No	General Infiltration Practices	0	
Safe Place Mini Storage	T333.1	Detention Basin - Ok	3/8/2017	No	General Infiltration Practices	0	
Saint Pauls COGIC	02-0007.2	Please clear accumulated sediment and debris from grate inlets in parking lots and replace missing grates, please repair cracked drain lines going from the grates to the U/G infiltration trenches, and please clear accumulated debris (leaf litter) in the underground (U/G) infiltration pipes.	12/8/2016	Yes	General Infiltration Practices	2	5/26/2017
Saint Pauls COGIC	02-0007.3	Please clear accumulated sediment and debris from grate inlets in parking lots and replace missing grates, please repair cracked drain lines going from the grates to the U/G infiltration trenches, and please clear accumulated debris (leaf litter) in the underground (U/G) infiltration pipes.	12/8/2016	Yes	General Infiltration Practices	2	5/26/2017
Saint Pauls COGIC	02-0007.1	Please clear accumulated sediment and debris from grate inlets in parking lots and replace missing grates, please repair cracked drain lines going from the grates to the U/G infiltration trenches, and please clear accumulated debris (leaf litter) in the underground (U/G) infiltration pipes.	12/8/2016	Yes	General Infiltration Practices	2	5/26/2017
Saint Pius Church Addition	04-0135.1	Ok	12/13/2016	No	Grassed Swale	0	
Salvation Army Hope Village	07-0066.1	Please clear debris and excessive vegetation around inlets and remove excessive dog feces around the retention basin.	2/3/2017	Yes	General Infiltration Practices	1	4/13/2017

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Sam's Club	14-0049.1	Please maintain the Stormceptor in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	8/15/2016	Yes	Manufactured BMP Systems	2	8/10/2017
Sam's Club	15-0029.1	Please maintain the Oil-Water Separator in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	8/15/2016	Yes	Other SWMF	2	8/10/2017
Sandollar Duplex	06-0104.1	2 infiltration basins - Ok. Grass grown over stone top and concrete swales to direct drainage to front BMP indistinguishable (not installed).	4/3/2017	No	General Infiltration Practices	0	
Savannah Suites	04-0111.1	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/13/2017	Yes	Manufactured BMP Systems	3	6/30/2017
Savannah Suites	04-0111.2	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/13/2017	Yes	Manufactured BMP Systems	3	6/30/2017
Savannah Suites	04-0111.3	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/13/2017	Yes	Manufactured BMP Systems	3	6/30/2017
Savannah Suites	04-0111.4	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/13/2017	Yes	Manufactured BMP Systems	3	6/30/2017
Savannah Suites	04-0111.5	Please clear accumulated sediment and debris from the inlet and outlet flared-end pipes within the detention basin.	2/13/2017	Yes	Detention Basin	3	6/30/2017
Seaward Marine Services	02-0101.1	Clear sediment accumulated at the end of the inlet pipe within the detention basin, Stabilize erosion along curb cut inlets, Ccear debris from drop inlet spillway structure, and remove the minor amount of trash present.	10/5/2016	Yes	Detention Basin	1	12/1/2016
Senior Housing Development	02-0158.1	Please remove trash from the retention basin. Also, monitor the amount of sediment accumulation in the eastern end of the retention basin. The retention basin may need to be dredged out soon.	6/6/2017	No	Retention Basin	0	
Sentara Medical Group	02-0048.1	Ok - holding water, fish (coy) in BMP, found inlet	1/17/2017	No	Detention Basin	0	
Sentara Parking Garage Expansion	07-0042.1	Grass swales are not present. Please reestablish the grass swales per the approved plans.	6/2/2017	Yes	Grassed Swale	1	
Sentara Parking Garage Expansion	07-0042.2	Grass swales are not present. Please reestablish the grass swales per the approved plans.	6/2/2017	Yes	Grassed Swale	1	
Sentara Parking Garage Expansion	07-0042.3	Grass swales are not present. Please reestablish the grass swales per the approved plans.	6/2/2017	Yes	Grassed Swale	1	
Sewells Point Mini Storage	11-0016.1	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	9/23/2016	Yes	Manufactured BMP Systems	2	7/31/2017
Shamrock Gardens	06-0051.1	Infiltration basin/Swale - OK	10/26/2016	No	General Infiltration Practices	0	
Shamrock Gardens	06-0052.1	Infiltration basin/Swale - Ok.	10/26/2016	No	General Infiltration Practices	0	
Sherwood Forest Elementary	NPS10.1	Ok. Curb cuts clear.	10/14/2016	No	General Infiltration Practices	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Sherwood Forest Elementary School	NPS15.1	Please clear accumulated sediment in front of the flared-end inlet pipe.	10/14/2016	Yes	Detention Basin	1	
Shiloh Baptist Church Parking Lot	T173.1	Ok	3/21/2017	No	Detention Basin	0	
Shiloh Baptist Church Parking Lot	T173.2	Ok	3/21/2017	No	Detention Basin	0	
Shirley Avenue Parking Lot	13-0049.1	Please maintain Focal Point biofiltration systems in accordance with manufacturer's specification, and provide copies of the maintenance records.	10/19/2016	Yes	Manufactured BMP Systems	1	10/24/2016
Shirley Avenue Parking Lot	13-0049.2	Please maintain Focal Point biofiltration systems in accordance with manufacturer's specification, and provide copies of the maintenance records.	10/19/2016	Yes	Manufactured BMP Systems	1	10/24/2016
Shirley Avenue Parking Lot	13-0049.3	U/G Detention System. Inspection ports are dry and clear of debris - Ok	10/19/2016	No	Retention Basin	0	
Shorewood Cove Apartments	00-4329.1	Ok - lowest structures near overflow holding water but it had rained the day before.	1/19/2017	No	General Infiltration Practices	0	
Shorewood Shores Phase I	S41.1	Maintenance scheduled for January & August. Last serviced on 2/28/2017. Remove accumulated debris and sediment from the 6 Filterra units, replace mulch, and trim the trees.	3/13/2017	No	Manufactured BMP Systems	0	
Shorewood Shores Phase II	06-0044.1	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/3/2017	Yes	Manufactured BMP Systems	1	
Shorewood Shores Phase II	06-0044.2	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/3/2017	Yes	Manufactured BMP Systems	1	
Shorewood Shores Phase II	06-0044.3	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/3/2017	Yes	Manufactured BMP Systems	1	
Shorewood Shores Phase II	06-0044.4	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/3/2017	Yes	Manufactured BMP Systems	1	
Shorewood Shores Phase II	06-0044.5	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/3/2017	Yes	Manufactured BMP Systems	1	
Shorewood Shores Phase II	06-0044.6	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	2/3/2017	Yes	Manufactured BMP Systems	1	
Signature Printing	T317.1	Parking Lot infiltration area - Ok	3/7/2017	No	General Infiltration Practices	0	
Signature Printing	T317.2	Ok - talked to site mananger, Rick Sawyer, about ongoing maintenance	3/7/2017	No	Grassed Swale	0	
Silver Lake/Duck Pond	S14.1	Ok - minor amount of trash present, last serviced on 7/7/2016 according to Hansen, scheduled for monthly trash removal and to check inlets & outlets, and biannual trimming of trees and shrubs.	2/16/2017	No	Retention Basin	0	
Single Family Condominium	07-0062.1	Ok - No gutters or downspouts present, but infiltration trench areas drain fine according to Ms. Gonzales (owner of unit 1539-B)	2/3/2017	No	General Infiltration Practices	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Single Family Condominium	T596.1	The bioretention basin at unit 1539-B is okay, but the bioretention basin beside unit #1539-A has been filled in. Please remove the sediment that filled in the bioretention basin, install mulch along the bottom of the bioretention basin, and replant the bioretention basin as specified on the plans.	2/3/2017	Yes	Bioretention Basins	1	4/18/2017
Slover Library	11-0027.1	Contech Vortechs Model 200 unit. Ok, measured 30" between water surface and top of sediment pile. Service not yet needed according to Contech maintenance info.	9/6/2016	No	Manufactured BMP Systems	0	
Social Security Building	06-0016.1	Please remove trash from the detention basin, clear vegetation around the inlets and outlet control structure, and remove leaf litter and debris from the stone at the bottom of the paved flume inlet.	2/8/2017	Yes	General Infiltration Practices	1	3/15/2017
Solid Rock Church parking	10-0034.1	Ok. No mulch and grass growing in the infiltration trench/basin is tall, but okay.	7/15/2016	No	General Infiltration Practices	0	
Solid Rock Church parking	10-0034.2	Ok	7/15/2016	No	General Infiltration Practices	0	
Southside Aquatic Center	11-0020.1	Ok	4/4/2017	No	Detention Basin	0	
Southwind Apartments	08-0001.1	Please remove trash and debris from the retention basin and from the curb inlet structures throughout the apartment complex.	8/8/2016	Yes	Retention Basin	2	3/18/2017
Spring Hill Suites Marriott	01-0188.1	Please cut back vegetation and remove accumulated sediment and debris around the inlet and outlet control structure, cut back/remove woody vegetation within the detention basin, and remove trash.	1/19/2017	Yes	Extended Detention Basin	1	3/28/2017
St. Mary's Home for Disabled Children	01-0203.1	Ok - Some woody vegetation along banks, may need to be thinned out in near future.	1/17/2017	No	Retention Basin	0	
St. Mary's Mausoleum	07-0002.1	Ok - barely distinguishable, outfall pipe into creek present and inlet swales are fine.	5/12/2017	No	Detention Basin	0	
St. Paul's Church Parking Lot Expansion	07-0038.1	Please remove accumulated sediment and debris from the curb-cut inlet, and regrade the bioretention basin BMP to allow stormwater runoff from the parking lot to enter into the BMP	12/2/2016	Yes	Bioretention Basins	1	2/28/2017
St. Paul's Place Condo	04-0055.1	3 U/G Infiltration Systems - Ok	9/12/2016	No	General Infiltration Practices	0	
Street Improvements - Ernies Way	S47.1	Ok - all grass, vehicle rut at end of bioretention basin but no major affect in grading.	3/13/2017	No	Bioretention Basins	0	
Street Improvements - Ernies Way	S47.2	Ok - minor amount of trash removed. Scheduled for March maintenance.	3/13/2017	No	Grassed Swale	0	
Street Improvements for Asfari Homes	12-0065.2	Ok. Some standing water and minor amount of mulch washed into detention basin, but is just finished raining for 2 days and some mulch from landscaped areas washed down street into the detention basin.	9/22/2016	No	Detention Basin	0	
Street Improvements for Asfari Homes	12-0065.1	Could not find the bioretention basins. Appears that they were not installed during construction.	9/22/2016	No	Bioretention Basins	0	
Strip Mall - JANAF	T379.1	Ok - minor amount of sediment accumulated in curb cut inlets	3/7/2017	No	Detention Basin	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Subaru Showroom & Service Center	03-149.1	Please maintain the Stormtreat System in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	1/3/2017	Yes	Manufactured BMP Systems	1	1/17/2017
Subdivision Plan for Bullock Park	11-0023.1	Please stabilize the slopes along the southern end of the detention basin, and remove accumulated sediment around and within the detention basin inlet pipe.	7/27/2016	Yes	Extended Detention Basin	1	8/12/2016
Suburban Park Subdivision-Redevelopment of Wards Corner	12-0039.1	Ok	8/15/2016	No	Detention Basin	0	
Suburban Park Subdivision-Redevelopment of Wards Corner	12-0039.3	Please maintain the Filterra units in accordance with the manufacturer's specifications, and please provide copies of the maintenance logs.	8/15/2016	Yes	Manufactured BMP Systems	1	1/24/2017
Suburban Park Subdivision-Redevelopment of Wards Corner	12-0039.4	Please maintain the Filterra units in accordance with the manufacturer's specifications, and please provide copies of the maintenance logs.	8/15/2016	Yes	Manufactured BMP Systems	1	1/24/2017
Suburban Park Subdivision-Redevelopment of Wards Corner	12-0039.5	Please maintain the Filterra units in accordance with the manufacturer's specifications, and please provide copies of the maintenance logs.	8/15/2016	Yes	Manufactured BMP Systems	1	1/24/2017
Suburban Park Subdivision-Redevelopment of Wards Corner	12-0039.6	Please maintain the Filterra units in accordance with the manufacturer's specifications, and please provide copies of the maintenance logs.	8/15/2016	Yes	Manufactured BMP Systems	1	1/24/2017
Suburban Park Subdivision-Redevelopment of Wards Corner	12.0039.2	Please maintain the Filterra units in accordance with the manufacturer's specifications, and please provide copies of the maintenance logs.	8/15/2016	Yes	Manufactured BMP Systems	1	1/24/2017
Sunset Shores	03-0009.1	Please maintain the manufactured BMP (Stormceptor) in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	12/8/2016	Yes	Manufactured BMP Systems	1	5/25/2017
Tabernacle Church	T537.1	Ok	8/3/2016	No	Extended Detention Basin	0	
Taco Bell	05-0123.1	Please clear the Filterra curb inlet of accumulated sediment and debris, maintain the Filterra unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance log.	8/22/2016	Yes	Manufactured BMP Systems	1	2/13/2017
Taco Bell	05-0123.2	Please clear the Filterra curb inlet of accumulated sediment and debris, maintain the Filterra unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance log	8/22/2016	Yes	Manufactured BMP Systems	1	2/13/2017
Taco Bell	05-0123.3	Please clear the Filterra curb inlet of accumulated sediment and debris, maintain the Filterra unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance log	8/22/2016	Yes	Manufactured BMP Systems	1	2/13/2017
Tanner's Landing	05-0097.1	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	5/10/2017	Yes	Manufactured BMP Systems	1	7/27/2017
Tanner's Landing	05-0097.2	Please maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	5/10/2017	Yes	Manufactured BMP Systems	1	7/27/2017

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Target Expansion	07-0103.1	Please clear accumulated sediment and debris from the inlet, maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance reports.	3/1/2017	Yes	Manufactured BMP Systems	1	5/8/2017
Target Expansion	07-0103.2	Please clear accumulated sediment and debris from the inlet, maintain the Filterra units in accordance with the manufacturer's specifications, and provide copies of the maintenance reports.	3/1/2017	Yes	Manufactured BMP Systems	1	5/8/2017
Target Store	T286.1	Please remove trash within and around the retention basin.	3/1/2017	Yes	Retention Basin	1	5/8/2017
Teagle and Little	00-4352.1	Ok. Outfall within southern embankment according to plans. Detention basin on northern and eastern sides of building not very distinguishable.	8/23/2016	No	Detention Basin	0	
Ted Lansing Corporation	T210.1	Please clear accumulated sediment and debris from the flared-end inlet pipes within the detention basin.	3/10/2017	Yes	Detention Basin	1	5/16/2017
The Anchorage-South Hampton Roads Support Housing	T158.1	Please remove debris within the detention basin and on top of the drop inlet emergency spillway.	8/4/2016	Yes	Detention Basin	1	8/15/2016
The Ballentine Expansion	14.0074.1	Ok, minimal to no sediment or debris present in Contech CDS unit. Therefore no maintenance is needed at this time according to the manufacturer's maintenance manual.	8/8/2016	No	Manufactured BMP Systems	0	
The Banks at Berkley	14-0072.1	Ok to release CO and bond. Missing cover for inspection report, but is being replaced per email from Wanda Ferguson - Property Manager.	5/12/2017	No	Infiltration 2	0	
The Banks at Berkley	14-0072.2	Ok - release bond and CO.	5/12/2017	No	Infiltration 2	0	
The Dump - Carolina Furniture Store Addition	DUMP.1	Addition never completed (project was dropped) and infiltration BMP never installed. Site archived on 3/31/2017.	3/31/2017	No	General Infiltration Practices	0	
The Kempsville Center	00-4341.1	Ok - Dry pond (Detention basin) under deck, met Tim Winfree onsite and we discussed maintenance of the BMP.	1/19/2017	No	Detention Basin	0	
The Market at Ghent	07-0084.1	U/G Infiltration Trench. Ok.	10/24/2016	No	General Infiltration Practices	0	
The Va Arts Festival	08-0040.1	Filterra unit. Please maintain the Filterra unit in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	9/2/2016	Yes	Manufactured BMP Systems	1	11/1/2016
The Va Arts Festival	08-0040.2	Stormtrap. Please clear sediment and debris from underground detention structure and outlet control structure.	9/2/2016	Yes	Manufactured BMP Systems	1	11/1/2016
Third Police Precinct Parking Lot Addition	S43.1	Ok	7/28/2016	No	Extended Detention Basin	0	
Third Police Precinct Parking Lot Addition	S43.1	Dry Detention Basin according to plans - Holding water. Removed root mat from overflow structure, need to clear out orifice to allow basin to drain, and dredge/regrade the basin afterward. Will me Bruce and BMP maintenance crew onsite Thursday morning (5/4) to clear out orifice and let the basin drain for a couple of weeks.	5/1/2017	No	Extended Detention Basin	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Tidewater Gymnastics Parking Lot	11-0056	Parking lot not paved yet. According to plans it is supposed to be paved by 12/2016. Swale and infiltration basin BMP on east side of parking lot ok, but no apparent swale or infiltration BMP on west side of parking lot.	3/7/2017	Yes	General Infiltration Practices	2	6/5/2017
Tidewater Park Elementary	NPS08.1	Ok	9/21/2016	No	Detention Basin	0	
Titustown Recreation Center	S37.1	Please clear accumulated sediment from in and around the flared-end inlet pipes.	8/15/2016	No	Extended Detention Basin	0	
Titustown Recreation Center	S37.1	Need to remove/cut overgorwn vegetation, including woody vegetation, clear accumulated sediment and debris at inlets, also may need to regrade bottom to detention basin.	6/26/2017	No	Extended Detention Basin	0	
Todd Marine Electrical Supply	T660.1	Ok - Met with company president, Mr. Norman Caroon and discussed ongoing BMP maintenance.	3/2/2017	No	Detention Basin	0	
Todd Marine Electrical Supply	T660.2	Ok - Met with company president, Mr. Norman Caroon and discussed ongoing BMP maintenance.	3/2/2017	No	Detention Basin	0	
Todd Marine Electrical Supply	T660.3	Ok - Met with company president, Mr. Norman Caroon and discussed ongoing BMP maintenance.	3/2/2017	No	Detention Basin	0	
Towing Operations Center	S68.1	Next scheduled maintenance event in March 2017. Please remove cut vegetation (trees) and remove the inlet protection from the drop inlet grates within the bioretention basin aside from the regular maintenance activities (trim vegetation, remove debris, clean inlets, and replace mulch)	1/11/2017	No	Bioretention Basins	0	
Townhomes	04-0132.1	Front Infiltration trench - Ok	8/22/2016	No	General Infiltration Practices	0	
Townhomes	04-0132.2	Rear infiltration trench - Ok	8/22/2016	No	General Infiltration Practices	0	
Townhomes	06-0129.1	Ok	9/28/2016	No	Detention Basin	0	
Townhomes	06-0129.2	Ok	9/28/2016	No	Detention Basin	0	
Townhouses	T291.1	Ok	8/2/2016	No	General Infiltration Practices	0	
Townhouses	06-0003.1	Ok	8/22/2016	No	Extended Detention Basin	0	
Townhouses	03-0193.1	Please clear out sediment and debris from the drop-inlet grates and underground infiltration BMP.	4/7/2017	Yes	General Infiltration Practices	1	7/6/2017
Townhouses	03-0193.2	Please clear out sediment and debris from the drop-inlet grates and underground infiltration BMP.	4/7/2017	Yes	General Infiltration Practices	1	7/6/2017
Trader Square	04-0136.1	Vortechs Model 3000 located at SW corner of building near intersection of Granby and Plume Streets. Measured depth to water (64") and depth to sediment pile (87") for a water column depth in the grit chamber of 23". Indicates service (vactored/cleaned out) will be needed soon.	9/9/2016	No	Manufactured BMP Systems	0	
Trader Square	04-0136.2	Vortechs Model 3000 by NE corner of building by City Hall Avenue and Garage Exit. Measured depth to water (53") and depth to sediment pile (86") for a water column depth in the grit chamber of 33".	9/9/2016	No	Manufactured BMP Systems	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Trail of the Tiger Exhibit	S52.1	~1 in. of sediment in outlet bay, ~2-3 in sediment in filter bay. Please maintain the Contech Stormfilter in accordance with the manufacturer's specifications, and please provide a copy of the maintenance log.	7/29/2016	Yes	Manufactured BMP Systems	1	
Trail of the Tiger Exhibit	S52.1	Stormfilter. Met with Mark Schwartz of General Services - Facility Maintenance onsite. We discussed the previous maintenance of the Stormfilter. Mr. Schwartz said their contractor pulls out the filters and cleans them as well as vactors out the filter area as part of the yearly maintenance. Mr. Schwartz said maintenance was due and that they would have it done and send me a copy of the maintenance record.	5/2/2017	No	Manufactured BMP Systems	0	
Tubbs Auto Parts	03-0081.1	Please maintain the Oil-Water Separator in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	12/8/2016	Yes	Manufactured BMP Systems	1	
U-Haul	99-4220.1	Infiltration Swale - Ok	11/21/2016	No	General Infiltration Practices	0	
Uncle Bob's Self Storage Expansion	11-0082.1	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and please provide copies of the maintenance logs.	7/22/2016	Yes	Manufactured BMP Systems	1	7/31/2017
Union Chapel A.M.E. Church	T38.1	BMP Detention Area #1 - Need to removed sediment and debris from curb-cut inlet and remove vegetation from stone. Also, appears that oil was dumped into a small area of the stone BMP. The contaminated stone and soil need to be removed and properly disposed of and new clean stone put back in its place.	5/4/2017	Yes	General Infiltration Practices	1	8/14/2017
Union Chapel A.M.E. Church	T38.2	BMP Detention Area #2 - Need to removed sediment and debris from curb-cut inlets and remove vegetation from stone within detention areas.	5/4/2017	Yes	General Infiltration Practices	1	8/14/2017
Union Chapel A.M.E. Church	T38.3	BMP Detention Area #3 - Need to removed sediment and debris from curb-cut inlets and remove vegetation from stone within detention area.	5/4/2017	Yes	General Infiltration Practices	1	8/14/2017
University Pizza Parking	02-0265.1	Ok. Grass swale there but not very distinguishable, and no check dam present.	8/23/2016	No	Grassed Swale	0	
US General Services Admin	S63.1	Scheduled for monthly maintenance. Last maintained on 2/27/2017 per Hansen. Need to repair erosion at outfall of concrete pipe connecting the 2 detention basins.	3/13/2017	No	Extended Detention Basin	0	
USAA Recreation Area	T36.1	Please clear debris from the inlet and outlet of the detention basin, and please remove fallen trees and branches within the detention basin.	8/26/2016	Yes	Extended Detention Basin	2	7/24/2017
USAA Recreation Area	T36.2	Please repair the damaged drop inlet grate.	8/26/2016	Yes	General Infiltration Practices	2	7/24/2017
VA Dermatology and Skin Cancer Center	14-0029.1	Please maintain the Filterra unit in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	1/4/2017	Yes	Manufactured BMP Systems	1	3/9/2017

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Vanguard Warehouse	03-0028.1	Ok	1/5/2017	No	Detention Basin	0	
Village Foods - Azalea Garden & Village Intersec	91067.022.1	Ok - minor amount of trash and woody vegetation within retention basin	1/20/2017	No	Retention Basin	0	
Village Point Senior Housing	00-4332.1	Please clear accumulated debris from the underground stormwater drainage lines (infiltration BMPs) and the drop inlet structures.	8/23/2016	Yes	General Infiltration Practices	1	1/27/2017
Village Point Senior Housing	00-4332.2	Please clear accumulated debris from the underground stormwater drainage lines (infiltration BMPs) and the drop inlet structures.	8/23/2016	Yes	General Infiltration Practices	1	1/27/2017
Village Point Senior Housing	00-4322.3	Please clear accumulated debris from the underground stormwater drainage lines (infiltration BMPs) and the drop inlet structures.	8/23/2016	Yes	General Infiltration Practices	1	1/27/2017
Village Point Senior Housing	00-4332.4	Please clear accumulated debris from the underground stormwater drainage lines (infiltration BMPs) and the drop inlet structures.	8/23/2016	Yes	General Infiltration Practices	1	1/27/2017
Village Point Senior Housing	00-4332.5	Please clear accumulated debris from the underground stormwater drainage lines (infiltration BMPs) and the drop inlet structures.	8/23/2016	Yes	General Infiltration Practices	1	1/27/2017
Vinings Landing Marine Center	04-0026.1	Please maintain the 3 Stormceptor units (2 model #STC-1200 and 1 model #STC-900) in accordance with the manufacturer's specifications, and provide copies of the maintenance records.	12/13/2016	Yes	Manufactured BMP Systems	1	1/20/2017
Virginia Wesleyan College - Physical Plant	92067.053.1	Ok - 2 stone check dams, some leaf litter present but ok. Talked with Maintenance Director about maintenance and drainage issues.	1/20/2017	No	Extended Detention Basin	0	
Virginia Wesleyan College - Physical Plant	92067.053.2	Ok - 2 stone check dams, some leaf litter present but ok. Talked with Maintenance Director about maintenance and drainage issues.	1/20/2017	No	Extended Detention Basin	0	
Virginia Zoological Park, Phase I	T473.1	Met with Mark Schwartz of General Services and Zoo Facilities Manager about this Sand Filter BMP. We spent some time looking at some of the stormdrains and the outfall to determine where the sand filter BMP might be located. I plan to bring Peter with the camera truck and possible a vactor truck (if needed) to help us locate the sand filter BMP, but that might be a month or 2 out since our camera is being repaired right now and the loaner camera is stuck along Hampton Blvd.	5/2/2017	No	General Intermittent Sand Filter Practices	0	
Virtexco Corporation	T145.1	Please remove invasive aquatic vegetation from the retention basin, and remove woody vegetation from the banks of the retention basin.	2/15/2017	Yes	Retention Basin	1	4/28/2017
VIT Office Building	06-0112.1	Please clear/remove vegetation in front of and immediately around the retention pond outfall (structure B1 on the plans).	8/22/2016	Yes	Retention Basin	1	10/4/2016
Vulcan Construction Materials, L.P.	06-0121.1	Detention basin in Northeast corner of facility - Ok, discussed installing a rock check dam at the inlet swale to reduce sediment load entering BMP.	5/19/2017	No	Detention Basin	0	

SWMF Inspections/Reinspections List - FY17 (Public and Private)

Site	SWMF ID	Inspection Notes	Inspection Date	Follow-up Action Required	DCR Classification	Number Of Reinspections	Last Reinspection Date
Vulcan Construction Materials, L.P.	06-0121.2	Detention basin in southeast corner of facility - Ok, discussed need for periodic dredging of the detention basin due to vegetation and high sediment load in runoff.	5/19/2017	No	Detention Basin	0	
Vulcan Construction Materials, L.P.	06-0121.3	Split retention basin along west side of facility - Need more frequent cleaning of settlement basin where the wheel-wash runoff enters the swale to drain to the first retention pond. The settlement basin (box) should be cleaned out once the sediment pile height is halfway up the box. Also, the first retention pond will need frequent dredging due to the high sediment load in the runoff entering the pond.	5/19/2017	No	Retention Basin	0	
Vulcan Construction Materials, L.P.	06-0121.4	The plan specifies a manufactured BMP (Contech Stormfilter) to be installed within structure C-2. However, based upon the 5/19/2017 inspection, and previous inspections, erosion and sediment control measures are maintained in/on structure C-2. Please install the manufactured BMP (Stormfilter) as specified in the approved plans.	5/19/2017	Yes	Manufactured BMP Systems	2	8/17/2017
Walgreens	05-0085.1	Please remove trash from the detention basin.	2/9/2017	Yes	Detention Basin	1	4/13/2017
Walgreens	01-0224.1	Please maintain the Stormceptor (Series 900 according to plans) in accordance with the manufacturers specifications, and provide a copy of the maintenance record.	4/7/2017	Yes	Manufactured BMP Systems	1	
Walmart @ Military Hwy	02-0174.1	Vortechnics last serviced on 4/5/2016 - Ok	1/17/2017	No	Manufactured BMP Systems	0	
Walmart @ Military Hwy	02-0174.2	Vortechnics last serviced on 4/5/2016 - Ok	1/17/2017	No	Manufactured BMP Systems	0	
Walmart @ Tidewater	05-0074.1	Ok	6/15/2017	No	Retention Basin	0	
Walmart @ Tidewater	05-0074.2	Please maintain the Vortechnics BMP in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	6/15/2017	Yes	Manufactured BMP Systems	1	8/10/2017
Walmart @ Tidewater	05-0074.3	Please maintain the Vortechnics BMP in accordance with the manufacturer's specifications, and provide a copy of the maintenance record.	6/15/2017	Yes	Manufactured BMP Systems	1	8/10/2017
Walter H. Taylor Elementary School	NPS07.1	Ok, but I don't think detention basin A or B were originally constructed properly. No curb inlets and the bottom of the detention basins are a higher elevation than the adjacent parking lot. Detention basin C is okay.	8/29/2016	No	General Infiltration Practices	0	
Walter H. Taylor Elementary School	NPS07.2	Ok, but I don't think detention basin A or B were originally constructed properly. No curb inlets and the bottom of the detention basins are a higher elevation than the adjacent parking lot. Detention basin C is okay.	8/29/2016	No	General Infiltration Practices	0

THE CITY OF NORFOLK

HIGH PRIORITY MUNICIPAL YARD STUDY

June Whitehurst,

Environmental Programs Manager

May 1, 2017

Introduction:

The City of Norfolk (City) is mandated by federal and state law, as well as the City's Municipal Separate Storm Sewer System (MS4), Virginia Pollutant Discharge Elimination System (VPDES) Permit, VA0088650 (effective July 1, 2016), to monitor and control pollutants in storm water discharges from City storm water conveyances. As outlined in Part I.B.2.i of the MS4 permit, the City is required to identify all City-owned high priority municipal facilities that have a high potential of discharging pollutants.

High priority municipal facilities are defined as those municipal yards that are owned and operated by the City which includes composting facilities, equipment storage and maintenance facilities, materials storage yards, pesticide storage facilities, public works yards, recycling facilities, salt storage facilities, solid waste handling and transfer facilities, and vehicle storage maintenance yards. A comprehensive analysis was conducted in Spring 2017 by the Department of Public Works, Division of Environmental Storm Water Management staff, to identify City-owned high-priority facilities that may require a separate VPDES industrial stormwater permit and/or a storm water pollution prevention plan (SWPPP). The analysis completed utilized a GIS table-top exercise, field verification, and Storm Water environmental staff professional knowledge of City operations. The initial list will be better refined throughout the 5-year permit term as comprehensive site evaluations are conducted and SWPPPs are developed.

High Priority Municipal Facility Analysis:

Facility parcel information was obtained from a layer within the City's GIS to locate all City-owned properties. The table-top analysis utilized the 2016 aerial photography to visually inspect each City-owned parcel. Specific parcel categories were excluded from the analysis, including vacant lots, office buildings, parking lots, streets, and sidewalks. During this exercise, a list of parcels that required additional field verification based on the nature of their business was compiled.

Initial field assessments of city facilities included public works yards, utilities yards, parks & forestry yards, facility maintenance, fleet maintenance, public schools, libraries, community centers, police stations, and fire stations. During the field assessment, the areas were inspected for the presence of equipment and/or material storage, outdoor stockpiles, bulk waste containers, above ground chemical storage tanks, and any other obvious pollution sources from standard operations. Table 1 outlines the facilities inspected, date inspected, and initial assessment as to whether it meets the requirements for the development of a SWPPP.

Table 1: City-owned Parcel Assessment for SWPPP Development

Site Name	Site Address	Date Assessed	High Priority SWPPP Requirement (Yes/No)
Facilities Management	2840 Dana Street	9/21/2016	Yes
Fleet Maintenance	1188 Lance Road	9/21/2016	Yes

Conclusion:

Through this process, the following nine facilities have been identified to meet the high priority municipal facility definition. VDPES Industrial permits and SWPPPS have previously been obtained for two of the facilities as outlined in Table 2. The additional seven facilities will be assessed for separate VDPES industrial permit coverage and SWPPPs developed outlined in Table 3.

Table 2: VDPES Industrial Permits Obtained with Corresponding SWPPPs:

Site Name	Site Address	VDPES Permit #	FINAL SWPPP Date
Public Works Combined Ops	2233 McKann Avenue	VAR051796	11/2008
Public Works Waste Management	1176 Pineridge Road	VAR052006	8/2010

Table 3: Municipal Facilities Requiring Further Assessment and SWPPPs:

Site Name	Site Address	FINAL SWPPP Date	Comments
Facilities Management	2840 Dana Street	6/2017	None
Fleet Maintenance	1188 Lance Road	6/2017	None
Parks and Urban Forestry	2839 Dana Street	6/2017	None
School Transportation Services	5555 Raby Road	6/2017	None
Utilities - Wastewater Combined Operations	1316 Ballentine Road	6/2017	None
Utilities Water Treatment - 37th Street	3719 Parker Avenue	6/2017	None
Utilities Water Treatment - Moores Bridges	6040 Water Works Road	6/2017	None

Golf Course Facilities

Dear Golf Course Owner/Manager:

Golf courses have been identified as a high-risk facility that has the potential to unintentionally contribute high levels of nutrients and other pollutants to the City's storm water system. If you have not already done so, we encourage your golf course to consider implementing an integrated management practice (IMP) plan and techniques to reduce runoff of fertilizer, pesticides, and other pollutants to the City's storm water system.

Virginia state law, §10.1-104.5, *Nutrient management plans required for golf courses; penalty*, requires all land operated as a golf courses to develop and implement a nutrient management plan on or before July 1, 2017. The Virginia Department of Conservation and Recreation (DCR) has a listing of participating landscape vendors and sample plans on their website that may assist with the development of your nutrient management plan. Visit DCR's website at http://www.dcr.virginia.gov/soil-and-water/wqagree#water-quality-compaies for more information.

The Virginia Golf Course Superintendent Association of America (VGCSS) has also developed a detailed best management practice manual in cooperation with representatives of Virginia Tech, Virginia governmental agencies, allied associations of the Virginia Golf Council, and private sector partners. You will find the information contained within this manual to be useful in understanding the use of best management practices for water quality protection and environmental pollution prevention. Please review the manual at the VGCSAA's website at http://vgcsa.org/-best-management-practices for additional information.

If you have specific questions regarding this letter, please feel free to contact me, Monday through Friday 7:00am-3:30pm at 757-823-4019. Thank you for your assistance in this matter.

Sincerely,

Casey Magruder

Mobile Car Wash Application

Name of Business: _____

Owner Name: _____

Mailing Address: _____

_____

Phone Number: _____

I have read and understand Sec. 41.1-4, Pollution of the Stormwater system, of the Norfolk City Code. I also understand that a violation of this section of code is a Class I Misdemeanor. In addition, I have received and agree to read the storm water information packet.

If ANY of the information on this form changes, a new application must be submitted within 10 days of the change.

_____ _____
Owner Sign Date

_____ _____
Witness Sign Date

Please feel free to contact this division at, (757) 823-4000, between 7am and 3:30pm, Monday through Friday, if you have any questions.

NORFOLK

Department of Public Works, Field Engineering & Environmental Management

Mobile Car Wash and Automotive Detailing Facilities

Dear Owner:

As a licensed business owner, it is your responsibility to read and understand the City Codes that may affect your business practices. We want to provide you with some educational material to ensure you avoid possible violations related with pollution of the storm water system.

While performing operations associated with mobile car washing or automotive detailing, please ensure that all rinse water is maintained on site, either through collection and discharge into a sanitary sewer system or infiltration into the ground. Functioning as a commercial entity, you are not authorized to discharge rinse water to the stormwater system; there are no exemptions. Absolutely nothing associated with vehicle washing may be discharged into the street or storm water system. This includes "clean" rinse water not containing detergents, and materials that are considered "Bio-Degradable" and "Environmentally Friendly."

Provided is a copy of the City code, Chapter 41.1, *Storm Water Management*, for your review. Section 41.1-4(c) of the code states that it is unlawful to discharge commercial rinse water into the City's storm water system, including streets, ditches, etc. unless permitted to do so by the Department of Environmental Quality. A violation of this code is a class 1 misdemeanor with a maximum penalty of $2500/day and/or up to 1 year in jail.

Also provided is a brochure, *Remember You Are Not Just Washing a Car...*, that provides additional detail. If you have specific questions regarding this letter or requirements associated with your business, please feel free to contact the Environmental Management staff Monday through Friday 7:00am-3:30pm at 757-823-4000. Thank you for your assistance in this matter.

Sincerely,

Casey Magruder
Environmental Program Administrator

Together We Do Beautiful Things!

FY 17 focused on litter removal and achieved a 28% increase in pounds collected from the previous year! Volunteer time for FY17 was valued at $578,263 and with a 16% increase in number of volunteers over FY16, we understand the need and appreciate the efforts given by our committed volunteers. The KNB team reached over 1,400 students by presenting at 19 schools, hosted 30 events at the Ernie Morgan Center and attended 21 community outreach events in FY 17.

Looking forward to FY 18, KNB will continue to encourage residents to participate in the Adopt-A-Spot program, youth outreach programs as well as community clean-ups, recycling events and planting days, while inspiring Norfolk's residents to be resilient and show pride by keeping Norfolk beautiful.

Keep Norfolk Beautiful introduces a new logo. Symbolizing our deep community roots and our growing branches, we are proud of the brand identity this meaningful logo brings to the City of Norfolk.

Our slogan of "I Keep Norfolk Beautiful" remains embedded in the work we do every day to make Norfolk a place where people want to live, work, and play!

Keep Norfolk Beautiful

139,232.50 Pounds of Litter Collected

28% Increase From FY16

10 Beautification Events with 191 Volunteers

During FY17, Keep Norfolk Beautiful (KNB) lead Norfolk's citizens toward environmental stewardship through education outreach, interactive programs and community service. Through collaboration with City departments, local non-profits and countless other organizations, KNB is proud of the positive impact its volunteer-run programs have on our community. This bureau's robust programming aims to reduce and prevent litter, encourage recycling and waste reduction and beautify our City by planting native trees, shrubs, flowers and bushes.

Communication Outline
Public Works Operations, Stormwater

MISSION: To improve water quality and reduce flooding city-wide

GOAL: To engage and reach every resident within the City to promote positive behaviors and actions that improve water quality and flooding. This will be achieved through educational programming, interactive outreach and teamwork.

IMPLEMENTATION PROCESS: Seasonal campaigns with a focused messaging approach will be put into place for spring 2014. Each seasonal campaign will touch on a different TMDL message and be designed with multiple sensory appeal. In addition, stormwater will continue to coordinate with any Hampton Roads Planning District Commission campaigns through the HR Green initiative. Stormwater will continue to work with all City groups to combine Norfolk's environmental messages to provide a cohesive public outreach effort.

SUMMER 2016:

DON'T BLOW IT: Anything blown into the curb line has the potential to end up in our storm drains. This matter causes blockages and impact water quality due to the pollutants that it carries. Residents are asked to properly dispose of this waste and to keep their curl line clear.
Focus will be on grass clippings
Media sources: Community meetings/events, brochures, website, Festivals, Bay Star Homes, Social Media Postings, Sweeper Wraps

HURRICANE PREP/EOC/FLOODING: Flood Awareness plays an active role in Norfolk's Well Managed Government initiatives. Making room for and living with water are essential to Norfolk's future. It is important to know what to expect and work towards proactive solutions that will ensure our long-term success. Outreach will include messages about what to do in preparation, what to do during an actual event, along with reminders not to drive through water.
Media sources: Community meetings/events, website, Bay Star Homes, HRUBS insert

KEEP IT CLEAN-PUMP…DON'T DUMP: Boaters should use pump-out stations at local marinas instead of dumping waste over board. Though permitted by law, treated waste is still high in pollutants, and the treatment process does not reduce bacteria to a level that is safe for shellfish consumption.
Media sources: Community meetings/events, brochures, Festivals, Bay Star Homes, Boater Forums, Summer HRSD Pump-out programs

BAY STAR HOMES: This program is homeowner based and asks residents to make small behavioral changes to their lifestyle and homes in order to decrease their impact on the environment while improving water quality. Bay Stars is city-wide and regional
Media Sources: Community meetings, Mailings to specific neighborhoods, Festivals, Websites, EARNN

SCOOP THE POOP: Pick up your pet waste, even in dog parks. Pet waste increases bacteria and nutrient levels in waterways, leading to algae blooms, fish kills, fishing bans and beach closures.
Media Sources: Bags-on-board holders, Tipcards, Summer camps, Festivals, Bay Star Homes, Pet waste station grants, Community meetings, Providing scoop the poop giveaways to the SPCA and Animal Cares Center

HOUSEHOLD HAZARDOUS WASTE/ELECTRONICS RECYCLING: Disposing of hazardous material inappropriately does affect water quality. Norfolk encourages residents to take these materials to HHW collection centers versus disposing of this with your regular trash or via a storm drain.
Media sources: HRUBS insert, Community meetings/events, Bay Star Homes, website

RETAIN YOUR RAIN: Resiliency focused outreach and workshops designed to encourage Norfolk's residents to take actions on their property to reduce flooding. This is being coordinated through the City Manager's Resiliency Office.
Media Sources: Community meetings/events, social media posts, website, print material-Decision Tree, Green Infrastructure video, Retain Your Rain App

FALL 2016:

TEST, DON'T GUESS ABOUT FERTILIZING: Homeowners and commercial property owners should only fertilize if needed and with quantities that are required. Coated and water-soluble slow-release fertilizers help roots develop and wash away less easily. Do not apply slow or time-released nitrogen at a rate above one pound per 1,000 square feet. Apply only what is needed.
Secondary Messaging: Soil Testing
Media Sources: Bay Star Homes, brochure, website, community meetings, festivals, sweeper wraps

DON'T BLOW IT: Anything blown into the curb line has the potential to end up in our storm drains. This matter causes blockages and impact water quality due to the pollutants that it carries. Residents are asked to properly dispose of this waste and to keep their curl line clear.
FOCUS WILL BE ON LEAVES
Media sources: Community meetings/events, brochures, website, Bay Star Homes, sweeper wraps, HRUBS insert

STREET SWEEPING PROGRAM: The Street Sweeping equipment used by the City is meant to collect small debris and litter that decrease water quality. It is the responsibility of citizens and property owners to collect their yard waste and properly dispose of it – the City's Street Sweeping program is not liable for large debris pile pickups.
Fall Message: Leaves in storm drains and residents responsibility, Proper yard waste disposal
Media sources: Community meetings, brochures, website, Bay Star Homes, spotlights/news articles, social media postings, sweeper wraps

STORM DRAIN AWARENESS- ONLY RAIN DOWN THE STORM DRAIN: This slogan encompasses the stormwater message. Anything other than clean rainwater that enters the storm drain is a pollutant as well as a violation of a State-issued, EPA mandated permit. Pollutants that enter storm drains flow directly to our water bodies causing water quality problems.
Media sources: Compass ads, community meetings/events, brochures, website, in-school field trip

programming, City ordinance/codes, Storm Drain Medallion Marking Grants, EARNN Program, HRUBS inserts, Festivals

BAY STAR HOMES: This program is homeowner based and asks residents to make small behavioral changes to their lifestyle and homes in order to decrease their impact on the environment while improving water quality. Bay Stars is city-wide and regional
Media Sources: Community meetings, Mailings to specific neighborhoods, Festivals, Websites, EARNN, HRUBS insert

HOUSEHOLD HAZARDOUS WASTE/ELECTRONICS RECYCLING: Disposing of hazardous material inappropriately does affect water quality. Norfolk encourages residents to take these materials to HHW collection centers versus disposing of this with your regular trash or via a storm drain.
Media sources: HRUBS insert, Community meetings/events, Bay Star Homes, In-school field trips, website, America Recycles Day

RETAIN YOUR RAIN: Resiliency focused outreach and workshops designed to encourage Norfolk's residents to take actions on their property to reduce flooding. This is being coordinated through the City Manager's Resiliency Office.
Media Sources: Community meetings/events, social media posts, website, print material-Decision Tree, Green Infrastructure video, Retain Your Rain App

Winter 2017:

Don't Feed Wild Ducks and Geese – Feeding wildlife discourages natural migration patterns and increases nutrient and bacteria pollution due to their waste.
Media sources: Community meetings, brochures, website, Bay Star Homes programming

STREET SWEEPING PROGRAM: The Street Sweeping equipment used by the City is meant to collect small debris and litter that decrease water quality. It is the responsibility of citizens and property owners to collect their yard waste and properly dispose of it – the City's Street Sweeping program is not liable for large debris pile pickups.
Winter Message: Holiday Schedules, Leaves/debris in curb line reminder
Media sources: Community meetings, brochures, website, Bay Star Homes, Sweeper wraps, spotlights/news articles, Social Media Postings

Optional-As Needed Winter Storm Awareness/Snow and Ice – Winter storm awareness is important to everyone. As needed, we will actively remind residents of their responsibility to clear their sidewalks and the protocol for Public Works snow removal. This will include the message of not following the plows too closely and to give us room to prep/clear the roadways.
Media sources: Community meetings, press releases, Facebook reminders

BAY STAR HOMES: This program is homeowner based and asks residents to make small behavioral changes to their lifestyle and homes in order to decrease their impact on the environment while improving water quality. Bay Stars is city-wide and regional
Media Sources: Community meetings, mailings to specific neighborhoods, festivals, Websites, EARNN

RETAIN YOUR RAIN: Resiliency focused outreach and workshops designed to encourage Norfolk's residents to take actions on their property to reduce flooding. This is being coordinated through the City Manager's Resiliency Office.
Media Sources: Community meetings/events, social media posts, website, print material-Decision Tree, Green Infrastructure video, Retain Your Rain App

SPRING 2017:

TEST, DON'T GUESS ABOUT FERTILIZING: Homeowners and commercial property owners should only fertilize if needed and with quantities that are required. Coated and water-soluble slow-release fertilizers help roots develop and wash away less easily. Do not apply slow or time-released nitrogen at a rate above one pound per 1,000 square feet. Apply only what is needed.
Secondary Messaging: Soil Testing, Plant More Plants
NEW OUTREACH MESSAGE FOR PERMIT: Golf Courses and fertilizer/lawn maintenance. Regional flyers to be developed in FY17 to address a new section in our SW permit.
Media Sources: HRUBS inserts, Bay Star Homes, EcoFest/RiverFest, brochure, website, community meetings, HRPDC spring stormwater campaign, Coastal Virginia Living Guide.

SCOOP THE POOP: Pick up your pet waste, even in dog parks. Pet waste increases bacteria and nutrient levels in waterways, leading to algae blooms, fish kills, fishing bans and beach closures.
Media Sources: Bags-on-board holders, Tipcards, In-school field trips, festivals, Bay Star Homes, Pet waste station grants, Community meetings, In-school field trips, Providing scoop the poop giveaways to the SPCA and Animal Cares Center

BAY STAR HOMES: This program is homeowner based and asks residents to make small behavioral changes to their lifestyle and homes in order to decrease their impact on the environment while improving water quality. Bay Stars is city-wide and regional
NEW Outreach FY17: Bay Star Businesses: Promote practices that will help with TMDL. Use with Industrial Permit. In development: launch in spring 2017
Media Sources: Community meetings, Mailings to specific neighborhoods, Festivals, Website, EARNN

DON'T BLOW IT: Anything blown into the curb line has the potential to end up in our storm drains. This matter causes blockages and impact water quality due to the pollutants that it carries. Residents are asked to properly dispose of this waste and to keep their curl line clear.
Media sources: Community meetings/events, brochures, website, Festivals, Bay Star Homes, workshops, spotlights/news articles, City ordinance/code, In-school field trips
This message will focus on grass clipping for late spring and into summer

Know Where Your Car Wash Runoff Goes – Though commercial and mobile car washes are required to have permits in order to discharge soapy liquids, residents are not. We encourage residents to utilize car wash facilities or wash their vehicle on their lawn in order to minimize soapy runoff.
Media sources: Community meetings/events, Tipcard, In-school field trips, City ordinance/codes, Commercial/mobile car wash permit/license

ABSTRACT
This report provides a summary of the sixth year of the askHRgreen.org public outreach and education initiative. The report contains five major sections. The first section provides background about askHRgreen.org and an overview of overall campaign results for fiscal year 2016-2017. The second through fifth sections provide an overview of the individual initiatives and results from each of the four askHRgreen.org subcommittees: Recycling & Beautification, Stormwater Education, Water Awareness, and Fats, Oils & Grease Education.

ACKNOWLEDGEMENTS
This report was prepared by the Hampton Roads Planning District Commission (HRPDC) staff in cooperation with the member localities. Preparation of this report was included in the HRPDC Unified Planning Work Program for Fiscal Year 2016-2017, approved by the Commission on May 18, 2017.

Fiscal Year 2016-2017 At a Glance

About askHRgreen.org...

askHRgreen.org was developed to help Hampton Roads residents find their inner green with just the click of a mouse. For years, the HRPDC facilitated a variety of environmental education efforts to assist localities in notifying residents and meeting regulatory requirements. Developing consistent regional messaging affords localities an economy of scale that they could not otherwise achieve. Coupled with various emerging issues beginning to overlap, like sanitary sewer overflows and stormwater pollution, we knew it was time to develop an umbrella brand to tie all of the messages together. askHRgreen.org began with offering just the green basics, but people craved more information. Once you show someone an easy, green alternative, they get hooked and want to add something else. Now we make the connections for people by illustrating not just what they can do, but why they should care and how their actions impact the larger environment. askHRgreen.org is powered by the 17 localities of Hampton Roads, HRSD, and the Hampton Roads Planning District Commission.

You can "like" askHRgreen.org on Facebook at Facebook.com/askHRgreen, tweet and retweet at Twitter.com/HRgreen, "tune in" at YouTube.com/HRgreenVA, follow on Instagram at Instagram.com/askHRgreen and read and comment on the blog, askHRgreen.org/blog.

2016-2017 Campaign Schedule and Results

Nine environmentally-themed media campaigns and a Search Engine Marketing campaign ran for a combined total of 52 weeks of exposure in FY17. There were also regularly scheduled newsletters, blog posts, social media postings and ongoing public relations strategy and support, including a partnership with Coastal Virginia Magazine and the "Write as Rain" outdoor campaign.

2017 BY THE NUMBERS

58,113 visitors to askHRgreen.org

16.9 million opportunities

AS OF JUNE 30, 2017

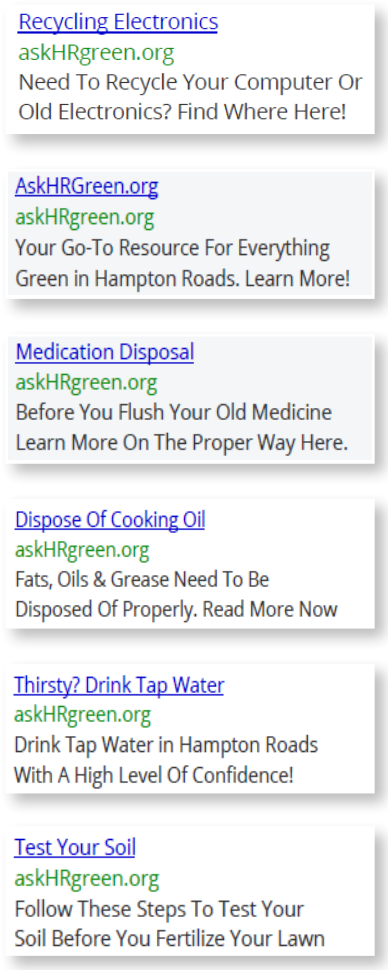

SEARCH ENGINE MARKETING July 1, 2016 - June 30, 2017

Online Search

In FY17, askHRgreen.org continued Search Engine Optimization (SEO) tactics and Search Engine Marketing (SEM) campaigns to increase traffic to and improve the website.

SEO improves the askHRgreen.org website's organic (unpaid) search rankings. Optimization tactics included editing/adding keyword-rich content to the site, identifying and eliminating any barriers to search engine indexers, and promoting the site to increase the number of inbound links from other sources.

The askHRgreen.org SEM program utilizes Google AdWords and Bing Ads pay-per-click advertising to increase traffic to the askHRgreen.org website. By bidding on select keywords and phrases, search ads direct search traffic to relevant content on the askHRgreen.org site. In total, the active SEM campaigns garnered 107,920 impressions and 4,226 clicks to the askHRgreen.org website in FY17. To view the full SEM report for FY17, please see Appendix A.

Organic Search Results

	2012-13	2013-14	2014-15	2015-16	**2016-17**
Clicks	8,513	14,842	20,637	21,274	**23,858**

Total	**107,920**	**4,226**	**3.92%**	**$2.89**	**1.56**

Coastal Virginia Magazine Partnership

For a second year, askHRgreen.org partnered with Coastal Virginia (CoVA) Magazine to develop articles and infographics specific to the campaign's messaging – and of interest to the magazine's readers. askHRgreen.org team leaders and committee members worked closely with the CoVA staff to select article topics, provide sources for the writers, and review the finished copy. The special askHRgreen.org editorial features appeared in each edition of Coastal Virginia Magazine from April 2016 to February 2017 and covered a variety of topics including green gardening practices, drinking water awareness, smart water use, Bay Star Homes, the askHRgreen.org mini grant program, recycling beyond the bin, green art, sustainable food and engaging infographics and puzzlers. Once all the content had been featured in the main magazine, it was compiled into Green Magazine and printed as a unique public outreach tool.

Social Media

Social media continues to be a key strategy for reaching the public. Facebook, Twitter, Instagram and YouTube were all used to promote askHRgreen.org messages in FY17. Social media was also used to promote various locality events, respond to citizen inquiries, share blog articles, and promote important programs and initiatives like the Bay Star Homes workshops, America Recycles Day, the Great American Cleanup, Imagine a Day Without Water and the Write as Rain campaign. Instagram was a new addition for askHRgreen.org in FY17. The Write as Rain campaign proved to be the perfect project to use for the launch of an Instagram account since the sidewalk messages provided visually interesting pictures to share with followers. Through the "Let's Talk Green" blog, which is written by askHRgreen.org team members and guest bloggers, 57 green living articles were published throughout the year covering topics ranging from cloth diapers to the environmental impact of bottled water.

e-Newsletter

The askHRgreen.org e-newsletter is shared via email to media contacts and an ever-growing list of citizens whose email addresses have been collected at events and through online promotions. In FY17, a total of five e-newsletters covering seasonal "green" tips, events, and askHRgreen.org campaign updates were sent out. By the end of FY17, the askHRgreen.org subscriber list reached more than 7,200 subscribers and continues to grow.

askHRgreen.org E-Newsletter Statistics	
Subscribers	7,268
Total Emails Sent	35,808
Total Opens	5,200
Open Rate	17.1%
Total Clicks	556
CTR (Click Through Rate)	1.6%

Online Toolkit

The askHRgreen.org Online Media Toolkit continues to be especially useful to committee members, civic leagues, community groups, homeowners associations, schools, clubs, businesses—and any organization or individual with an interest in improving neighborhoods and communities. Ideal for both online and print reproduction, the toolkit items are professionally designed and carry the signature askHRgreen.org graphic look. The materials are organized so it is easy for users to browse and select the topic they seek in the medium of their choice. In addition to logos, ads, rack cards, brochures, tip cards, and posters, there are feature articles, publications, infographics, radio ads, videos, and stickers available.

Events

Each year, askHRgreen.org participates in numerous regional events as part of the campaign's education and outreach efforts. These events take place throughout the year and range from small workplace eco fairs to large countywide festivals and almost everything in between. Committee members volunteer to staff either the askHRgreen.org mobile education trailer or a table display at these events and hand out educational materials and promotional items to those in attendance. In FY17, team members represented askHRgreen.org at 29 community events with an estimated attendance of over 90,000 people.

2016-2017 Regional Events			Estimated Attendance
9/10	Newport News Go Green Expo	Newport News	Unavailable
9/15-9/18	Isle of Wight County Fair	IOW	38,000

5/10	VBPU Public Service Week & DWW Celebration	Virginia Beach	335
5/18	VB Public Works Employee Event	Virginia Beach	685
5/25	Sensible Seafood Festival	Virginia Beach	500
6/6	CMA-CGM Fair	Norfolk	600
6/8	NASA Langley Safety & Health Expo	Hampton	400
6/17	MOCA Family Fest Day	Virginia Beach	Unavailable
6/24	Olden Days	Smithfield	10,000
6/24	Noland Trail Celebration	Newport News	500

Grant Programs

Environmental Education Mini Grants

The askHRgreen.org Environmental Education Mini Grant Program provides grants of up to $500.00 for environmentally-themed projects. All Hampton Roads school teachers (K-12), youth leaders or organizations working with youth are eligible to apply. Eligible projects must relate to one or more of the askHRgreen.org program focal areas. In FY17, a total of $6,335.00 was awarded through 13 mini grants reaching more than 5,000 students in 10 localities across Hampton Roads.

Pet Waste Station Grants

Since 2013, the askHRgreen.org Pet Waste Station Grant Program has given citizens the opportunity to receive a free pet waste station to install and maintain in their neighborhoods. The program is geared toward neighborhood associations, community groups, and property managers who are managing communities with a pet waste problem. The pet waste stations come ready to install and include a post, sign, bag dispenser, waste can, hardware, 400 dog waste bags, and 50 can liners. The property manager or community group is responsible for installing the station, emptying the trash regularly, and replacing the bags as needed. The neighborhood is also tasked with promoting to residents the purpose of the stations and the impact pet waste has on local water quality. Since the launch of the program, 258 pet waste stations have been installed across the region. Of those, 27 were awarded and installed during FY17.

Fiscal Year 2016-2017 Results

2016-2017 Environmental Education Mini Grants

Project	# Students	School/Organization	City/County	Grant $
Art in the Park	25	Western Branch Middle School	Chesapeake	$ 500.00
Students refurbished four park benches and completed murals on each of them as a beautification project.				
Cradock Community Care Project	120	Cradock Middle School	Portsmouth	$ 500.00
Cradock students identified areas with litter and participated in a community clean-up project.				
KinderGarden	100	Strawbridge Elementary School	Virginia Beach	$ 500.00
This project established a community garden on school grounds with a sensory path and various learning stations. Students sponge painted pavers with letters and numbers; planted and cared for native plants; and observed plant growth.				
Lafayette High School Beautification Project	1000	Lafayette High School	James City County	$ 500.00
Students, teachers, and parents participated in a beautification project around Lafayette High School to plant native plants, drought-tolerant plants, and repurposed plants, as well as add a recycling can and trash can in the student drop-off area.				
Learning/Vertical Palette Garden*	550*	Newtown Elementary School	Virginia Beach	$ 500.00*
Students used recycled palettes to create gardens with plants of their choice and provided water and maintenance.				
Lower School Children's Learning Garden	128	Walsingham Academy	Williamsburg	$ 500.00
This project engaged older and younger students to create a pollinator garden bed. After, the garden was used to teach students about plant growth and for other class activities such as reading time and journaling.				
Native Habitat – Pollinators, Pathways, and Prevention	650	Spratley Gifted Center	Hampton	$ 500.00
Students planted a successful vegetable garden and provided the school with a salad lunch and pesto. The project also featured native plants, sunflowers, and a pond. The garden is used to teach students about wildlife, as well as during reading time and instruction outside the classroom.				
Reading to Save the Earth	494	Oakland Elementary School	Suffolk	$ 500.00
Grant funds were used to purchase 31 library books related to Earth Day, recycling, and water conservation. The books are available for checkout to students, parents, and teachers.				
Recycling Plastic in the Classroom	500	Ghent School	Norfolk	$ 475.00
This project established a plastic recycling incentives program at Ghent School, which awarded prizes to individual students, classes, and grade levels for those who recycled the most each month. After six months, a total of 748 pounds of plastic were collected.				
Red Mill Community Garden	110	Red Mill Elementary School	Virginia Beach	$ 500.00
Students identified the Community Learning Garden as overgrown and underutilized & took steps to plant and clean in the garden. They also decorated with old bowling balls painted to look like insects. Since, they have used the garden for weekly outdoor lessons, plant growth observations, and searching/hunting around the garden.				
School Learning Garden	425	Booker T. Washington Middle School	Newport News	$ 500.00
This project will establish a learning garden/outdoor classroom for students. The teacher has requested an extension until after school begins in Fall 2017 to complete the project.				
To Our Schoolyard Watershed and Beyond!	400	Gloucester County Public Schools	Gloucester	$ 500.00
4th grade students from each of the five Gloucester County elementary schools visited Beaverdam Park for an outdoor field experience to learn about the Chesapeake Bay Watershed.				
Willoughby's Flower Garden	204	Willoughby Elementary School	Norfolk	$ 500.00
Students planted more than 200 flowers in on school grounds and maintained plants afterwards.				
Wolfgang Goes Green	400	Saint Patrick Catholic School	Norfolk	$ 360.00
This project will fund twelve 30-gallon recycling bins to be placed throughout the school to increase recycling awareness and to educate students about recycling. It is part of a larger initiative to become Project Learning Tree Green School-certified. Project will be completed in Fall 2017.				
	5,106			**$ 6,335.00**

Recycling & Beautification Subcommittee awarded $5,085 • Water Awareness Subcommittee awarded $1,250

*Awarded in FY16, completed in FY17

Public Relations

FY17 was another busy year for askHRgreen.org in the media. A total of seven news releases and media advisories were issued through the program covering seasonal topics, news, events, and promotions which were picked up by a variety of media outlets. We also had several guest columns in various publications and team members participated in a number of informative interviews throughout the year. The total value of this publicity for FY17 was over $170,000.

"Write as Rain" Campaign

In April 2017, askHRgreen.org took its message to the streets of Hampton Roads with the "Write as Rain" campaign. The motivational campaign placed hidden good-to-know "green" messages on more than 60 sidewalks, streetscapes and thoroughfares across the region that became visible when wet. The goal of the campaign was to inspire people to think about our local environment in new ways.

The messages carried the hashtag #askhrgreen along with such sayings as: Only Rain Down the Storm Drain; No Wipes in Our Pipes; Your Morning Coffee Starts with Tap Water; and No Such Thing as a Little Litter. A map of participating locations was made available at www.askHRgreen.org/rainyday so residents could easily find the hidden messages throughout the region.

News of this innovative campaign spread across the region through various media outlets with a prominent feature in The Virginian-Pilot, on local news stations (WTKR-TV and WAVY-TV), and in several local newspapers. The "Write as Rain" campaign had a $6,600 budget and a public relations exposure value of over $60,000.

Environmental Action Awards

In FY17, askHRgreen.org recognized two local schools and educators for their commitment to environmental stewardship and leadership. Ms. Wendy VanHosen, assistant principal at John Yeates Middle School in Suffolk, and Ms. Amber LaMonte, teacher at York High School in Yorktown, each received the Environmental Action Award from askHRgreen.org on Thursday, February 16, at the Hampton Roads Planning District Commission meeting in Chesapeake.

The Environmental Action Award was developed to recognize individuals who inspire youth (K-12) to have a positive impact on the environment by taking action in their schools or communities. The winning projects had previously received funding through the askHRgreen.org mini grant program and were selected as outstanding projects by a panel of askHRgreen.org committee members. John Yeates Middle School and York High School were two of 19 projects funded by askHRgreen.org in FY16 and considered for the award.

John Yeates Middle School was recognized for Ms. VanHosen's leadership of a school-wide recycling program. Not only did the project focus on the importance of recycling and reducing landfill contributions, but also on integrating diverse studies from art to science to social studies. The project itself is a sustainable initiative that will continue to impact students and the environment for years to come.

At York High School, Ms. LaMonte helped the school's green team improve availability and access to tap water and reduce plastic bottle waste by installing a water bottle filling station. The students tracked data on water usage and challenged their peers to reduce waste. Because of their efforts, the school experienced a 75 percent increase in the number of students carrying reusable water bottles.

In addition to the award, each school received a check for $100.00 to be spent to further their project or to launch a new environmental initiative.

York High School Teacher, Ms. Amber LaMonte, accepts the askHRgreen.org Environmental Action Award.

John Yeates Middle School Assistant Principal, Ms. Wendy VanHosen, accepts the askHRgreen.org Environmental Action Award.

Recycling & Beautification Subcommittee

The Recycling and Beautification Subcommittee is a coalition of local government staff members from across Hampton Roads who are working together to share ideas and pool resources for various education programs tailored towards community beautification, litter prevention, and recycling education.

Great American Cleanup

Spring is cleanup season and most localities held multiple events starting in March and wrapped up with a final cleanup push for Clean the Bay Day on Saturday, June 3rd. Keep America Beautiful's Great American Cleanup theme, Clean Your Block, encouraged people to clean up litter and take ownership of their neighborhoods and businesses. The Subcommittee supported regional Great American Cleanup events by featuring event details for each locality prominently on the website along with general promotions on social media, the Let's Talk Green blog and the askHRgreen.org e-newsletter.

America Recycles Day

Each fall the Subcommittee promotes Keep America Beautiful's America Recycles Day, a national celebration on November 15th that promotes the importance of recycling. Locally, nearly every city and county hosted a recycling and/or education event. In addition to the popular paper shredding and electronics recycling services, many localities added the option for residents to bring donations of clothing and housewares. Increasingly, localities offer electronics recycling and other specialty recycling services year-round through permanent collection facilities or events held in different locations each month/quarter, etc. Local America Recycles Day events were promoted by the Subcommittee with a news release and promotion on the website, social media, the Let's Talk Green blog and askHRgreen.org e-newsletter.

Christmas Tree Recycling

In FY17, the Subcommittee encouraged residents to take advantage of Christmas tree recycling programs across the region. Most Hampton Roads localities provide free Christmas tree pickup and disposal for residents. Some localities are able to compost or mulch the trees to reduce landfill contributions. To promote these free municipal programs, a media advisory was issued and collection schedules were featured prominently on the website, social media, the Let's Talk Green blog and the askHRgreen.org e-newsletter.

Cigarette Litter Prevention

Following the 2015-2016 award winning Cigarette Litter Prevention Program (CLPP), several Subcommittee members were interested in implementing the program in new places. This included some localities that had not previously participated in the program. Due to the high cost of procuring ash receptacles, the Subcommittee researched and applied for several grants. In June 2017, the Subcommittee learned that they had been selected as a recipient of a Keep Virginia Beautiful 30-in-30 grant. The Keep Virginia Beautiful 30-in-30 grant awards grants of $500-$1,000 for projects in these four categories: Community Beautification and Greening, Litter Prevention, Recycling, and Cigarette Litter Prevention. Additionally, the Subcommittee learned they had been selected as one of five recipients awarded a bonus grant of $2,000. The Subcommittee is planning to implement the CLPP project regionally during FY18.

Recycling Contamination

In FY17, the Subcommittee continued work on a regional strategy to improve the quality and quantity of recycled materials recovered through residential recycling. The participating localities of James City County, Suffolk and Newport News performed recycling audits during FY17. The findings of the audits were paired with demographic data from the targeted recycling routes to identify trends in curbside recycling behavior and help tailor outreach priorities. For example, the materials recycled in one

downtown Suffolk route were too contaminated to audit while materials recycled in a more suburban area of Suffolk revealed very specific types of contamination in the recycled materials including plastic bags and yard debris. Armed with this new insight, the Subcommittee will take the information gathered in the audit process and target outreach to specific routes based on specific needs.

Litter and Marine Debris

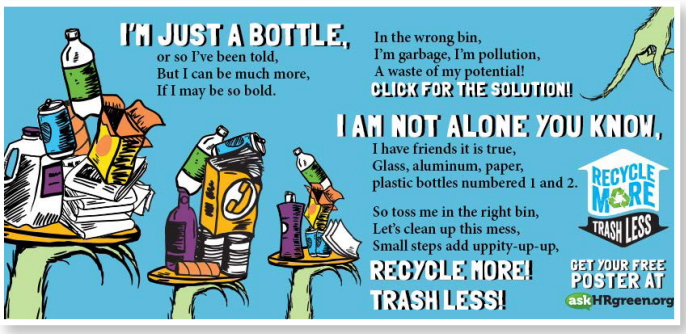

During FY17, the Subcommittee continued work on developing a region-wide litter campaign. The ongoing campaign will center around printed materials the committee members can use to promote cleanups like Adopt-a-Spot and Great American Cleanup in addition to general outreach to residents and businesses. The Subcommittee agreed to the production of a series of posters and rack cards targeting litter from youth, adults, and businesses. Additional tools and materials are scheduled for production in FY18.

Residential Recycling

The Subcommittee continued to expand the Recycle More, Trash Less campaign during FY17. The Recycle More, Trash Less media campaign includes radio and display ads as well as branded posters and rack cards. New in 2017 were the development of a Recycle More, Trash Less video and updates to the rack cards and posters. The new video was developed using the existing Dr. Seuss-inspired radio campaign and adding fun graphics to accompany the audio. Updates were needed to the posters and rack cards after TFC Recycling announced they would begin accepting cartons for recycling.

The new Recycle More, Trash Less video was used as part of a six-week online campaign that ran from February 20 to April 2 and included digital ads, targeted display, native ads, video pre-roll and Facebook. As added value for the paid media campaign, additional display ads were posted on WTKR.com.

Stormwater Education Subcommittee

The Stormwater Education Subcommittee is a cooperative partnership of the region's seventeen member cities and counties. This effort has been underway since 1997 as a formal adjunct to the required public information component of the Virginia Pollution Discharge Elimination System Permits (VPDES) for Phase I and Phase II Municipal Separate Storm Sewer Systems (MS4). Local government staff members work together to share ideas and pool resources for various education programs tailored to stormwater pollution prevention.

Leaf and Pet Waste Disposal

The Stormwater Education Subcommittee ran a two-week campaign from November 7 through November 20 reminding Hampton Roads residents that storm drains are not the proper disposal option for fallen leaves and pet waste. The campaign message also explained the role leaves play in localized flooding caused by clogged drains and the role both leaves and pet waste play in degrading local water quality. Because leaf disposal methods vary by locality, citizens are encouraged to rake, bag, mulch, or compost the leaves.

The campaign included radio ads, targeted online display ads, native content, and Facebook ads. There was also an on-air contest with Max Media included as added value. The winner of a true/false leaf disposal quiz won an askHRgreen.org gift bag, movies passes and was entered to win a $100 gift card to Taylor's Do-It Center. This also included a minimum of 25 mentions per station (100 total) and inclusion on the website contest page.

Lawn Care Practices

The Stormwater Education Subcommittee encouraged residents to "work smarter, not harder" with their spring campaign promoting residential lawn care best management practices. The campaign covered tips such as testing soil before applying fertilizer, seeding bare spots, leaving grass clippings on the lawn, replacing turf grass with flower beds, planting native plants, and more.

The two-week campaign ran from April 3 through April 16 and included radio ads, targeted display ads, digital ads

on WTKR.com, and Facebook ads. As added value for the paid media campaign, the Subcommittee also received inclusion in contests held by the station with gift cards to local home improvement stores and nurseries to the winning participants.

Pet Waste Disposal

Pet waste continued to be a high priority topic for the Stormwater Education Subcommittee. In addition to the fall paid media campaign on pet waste and leaf disposal, the Subcommittee also distributed "scoop the poop" branded materials such as dog waste bag holders and hand sanitizer to pet owners in the region. The scoop the poop message was also included in general askHRgreen.org promotions such as newsletters, blog posts, social media and multiple community events.

The Subcommittee also continued the ever popular Pet Waste Station Grant program. Since the launch of the program, 258 pet waste stations* have been awarded and installed across the region. Of those, 27 were awarded and installed during FY17.

New Pet Waste Stations in FY17

Chesapeake	5
Gloucester	2
Hampton	7
James City County	9
Newport News	4
Total	**27**

*This total may reflect additional pet waste stations issued by locality-funded programs.

Bay Star Homes

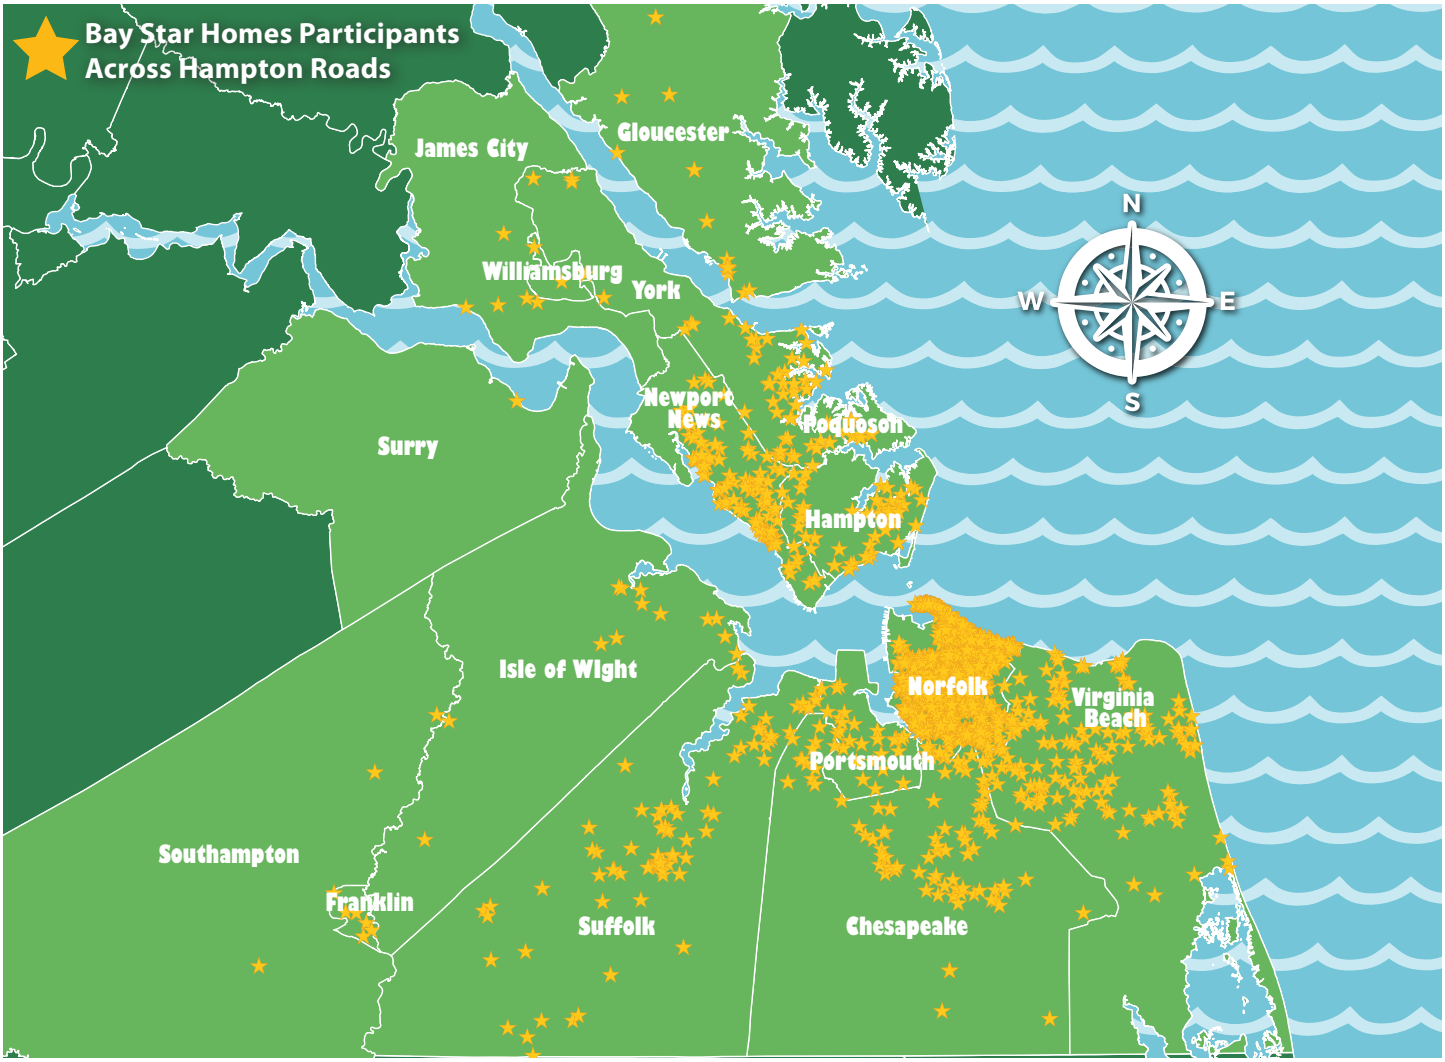

The Bay Star Homes (BSH) program continued in FY17. The program recognizes residents who pledge to avoid behaviors that are harmful to local waterways and encourages private property owners to implement voluntary stormwater management techniques such as rain barrels, rain gardens and downspout disconnects. Residents are also encouraged to begin incorporating more environmentally-friendly choices into their daily routine. Because the BSH program incorporates broad environmentally-friendly behaviors from all askHRgreen.org education programs, the program focuses not just on clean waterways, but also green living and clean communities in general.

New in 2017, the Subcommittee was able to offer three Bay Star Home workshops as part of a grant from the Chesapeake Bay Restoration Fund (CBRF) for southside and peninsula residents. Topics included soil testing, environmentally-friendly lawncare practices, techniques for tree siting and pruning, and rain barrels. The workshops helped clarify the connection between stormwater infrastructure and local waterways, including the Chesapeake Bay. The "Plant Smarter: Landscaping and Lawncare for the Peninsula" workshop was conducted in partnership with the City of Hampton and the City of Newport News on March 23, 2017 at Sandy Bottom Nature Park in Hampton. There, 36 participants learned about soil testing, environmentally-friendly methods for lawncare, and techniques for tree siting and pruning. Participants received Eastern redbud seedlings (a total of 66 seedlings were given away), askHRgreen.org informational brochures, DCR brochures on native plants and invasive species, and information on additional upcoming opportunities, including rain barrel workshops and native plant sales. In addition, rain barrel workshops were conducted in partnership with the City of Suffolk on May 20, 2017 at the Suffolk Art Gallery and on June 10, 2017 at Bennett's Creek Park in Suffolk. The workshops hosted a total of 74 participants and 37 rain barrels were given away. As a result of the workshops, the City of Suffolk was also able to create a "How-to" video to assist others in creating their own rain barrels.

As another part of the CBRF grant, Bay Star Homes was able to offer free soil testing for those who signed up during the months of July and October. Each winner received a letter congratulating them for being selected along with a soil test kit, instructions on how to collect the soil sample, and information on where to return the sample. Respondents' soil samples were tracked and sent off to the Virginia Cooperative Extension for analysis. They later received a personalized letter with their detailed soil test reports and an easy-to-read chart providing an overview of how their soil measured up. While 77 participants were contacted about the offer for free soil testing, only nine residents returned a soil sample for processing.

Storm Drain Medallion Program

With thousands of storm drains across Hampton Roads that lead directly to local waterways, the Storm Drain Medallion Program is a great way to help people remember that "only rain belongs down the drain." Volunteers from local schools, youth groups, civic groups and others work to identify storm drains without markings in their area then adhere medallions stating "No Dumping: Leads to Waterway" directly onto the storm drain. The Subcommittee promotes the program to schools, community associations, youth clubs, and volunteer groups of all ages across the region using the askHRgreen.org website and e-newsletter, social media, and more. The program is particularly popular with schools and Boy Scout and Girl Scout troops.

Approved applicants through the Storm Drain Medallion Program each receive medallions, adhesive, a lesson plan, and PowerPoint presentation about stormwater and how individual actions affect local water quality. Each locality is involved in finding areas in need of markers and documenting the new ones that are applied. This fiscal year, the Subcommittee helped place 52 new medallions in Hampton Roads. Many more medallions were also placed through locality-initiated activities and programs.

Water Awareness Subcommittee

The Water Awareness Subcommittee is an education committee comprised of local government staff members who are committed to promoting and educating citizens about aging infrastructure, the value of tap water, and the importance of being good water stewards. This cooperative effort to promote conservation and awareness of the importance of water assists localities in meeting requirements of various water supply and ground water permits.

Fixing Leaks

Each year the Subcommittee promotes Fix-a-Leak Week in partnership with the EPA WaterSense program. The annual water conservation week encourages citizens to chase down leaks in their home and make simple repairs to worn out fixtures. The Subcommittee reused the fixing leaks TV campaign produced in FY16 for a TV and online campaign. The one-week campaign ran from March 20 to 26 on WVEC, WAVY, Cox Cable, and WTKR.com.

Value of Water

The Subcommittee used the value of water TV campaign produced in FY16 for a TV and online campaign in FY17. The value of water TV campaign explains that tap water is amazingly inexpensive and a great value when considering all the ways we depend on it each day. The one-week campaign ran from May 8 to 14 on WVEC, WAVY, Cox Cable, and WTKR.com.

Infrastructure

The Subcommittee used the infrastructure TV campaign produced in FY16 for a TV and online campaign in FY17. The infrastructure TV campaign describes the water infrastructure required to provide reliable, convenient tap water services to residents in Hampton Roads and the importance of investing in the maintenance of these systems. The one-week campaign ran from May 22 to 28 on WVEC, WAVY, Cox Cable, and WTKR.com.

Imagine A Day Without Water

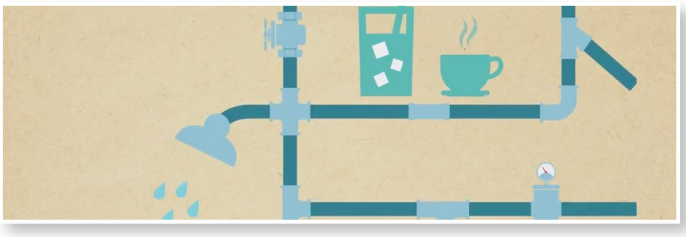

The Subcommittee joined with municipal water authorities across the U.S. to promote "Imagine a Day Without Water." On September 15, 2016, the U.S. Water Alliance, through its Value of Water Campaign, raised awareness about the importance of water and the often invisible challenges to water infrastructure. The purpose of the campaign was to get citizens thinking about how much their daily routine would change if they did not have readily available tap water. It explained a day without water is also a day

Fats, Oils & Grease Education Subcommittee

The Fats, Oils, and Grease (FOG) Education Subcommittee is a coalition of local government staff members and HRSD working together to share ideas and pool resources for various education programs tailored to preventing sanitary sewer overflows and backups caused by improper disposal of fats, oils, and grease. This cooperative effort has been underway since 2007 when 13 of the region's localities and HRSD entered into the Regional Special Order by Consent with the Virginia Department of Environmental Quality.

Holiday FOG

Each holiday season, the Subcommittee encourages Hampton Roads residents to practice kitchen BMPs for keeping fats, oils and grease out of drains. With the increase in holiday cooking this is an important time of year to promote the FOG message. The holiday-themed promotion ran from November 19 to November 25 and advised the public to keep fats, oils and grease out of the drain. It also discouraged garbage disposal use. The one-week campaign included 60-second radio ads, Facebook ads, targeted display ads, and native content ads.

As added value for the paid campaign, 92.9 The Wave and Eagle 97 recorded a video about keeping grease out of the drain and directing people to visit askHRgreen.org. Other added value included sponsorship of the Greatest Hits Weekend and Best of Dick Lamb and the Morning Wave show on 92.9 The Wave.

What Not to Flush

The Committee reused the "It came from beneath the streets" campaign previously used for movie theater ads for a one-week TV and online media campaign. Themed after a classic horror movie, the campaign alludes to the potential for sanitary sewer overflows to occur when the public uses the toilet as a trash can. Wipes, cotton balls/swabs and other personal hygiene can all play a role in clogging sanitary sewer lines and damaging wastewater machinery. The one-week campaign ran for the week leading up to the Super Bowl, January 30 to February 5, on local stations WVEC, WAY, Cox Cable, and WTKR.com.

Down the Drain

The Subcommittee reused the Down the Drain TV ad produced in FY16 for a TV and online media campaign in FY17. The campaign message includes two focus areas: proper disposal of FOG and what not to flush. The ad tells residents to keep FOG, food scraps, and personal hygiene products like wipes out of the drains and demonstrates how blockages can contribute to sanitary sewer overflows. The one-week campaign ran from February 13 to 19 on local stations WVEC, WAY, Cox Cable, and WTKR.com.

Fats, Oils and Grease Regional Training Program

In FY17, the FOG Education Subcommittee continued to utilize the regional website, www.HRFOG.com, for training and certification. Through the website, grease haulers and food service industry employees receive free training and certification on proper maintenance of grease control devices and the harmful effects of FOG on the region's sanitary sewer systems. The website helps locality staff manage, train and enforce the FOG ordinances present in some Hampton Roads municipalities.

The Subcommittee continued work on improving compliance with the regional FOG program. In FY17, the Subcommittee hosted a Regional Grease Hauler Forum that took the form of a lunch and learn workshop and roundtable. Grease haulers were offered lunch and an updated HRFOG certification for attending certification refresher training followed by a roundtable discussion between grease haulers, HRSD and locality staff. Grease haulers were encouraged to ask any questions they had about complying with local FOG ordinances. About 30 employees from local grease hauler companies attended the training.

Glossary of Terms

added value
Earned but unpaid advertising value.

ad group
In Search Engine Marketing (SEM), an ad group contains one or more ads which target a shared set of keywords.

average position
A ranking system that determines where your search engine marketing ad will display on a web search results page (i.e. top of page v. bottom of page).

bounce rate
The percentage of visitors who enter the site and "bounce" (leave the site) rather than continue viewing other pages within the same site.

click through rate (CTR)
A way of measuring online advertising. The CTR of an advertisement is defined as the number of clicks on an ad divided by its impressions, expressed as a percentage.

cost-per-click (CPC)
The cost associated with a person clicking on a display ad in search engine marketing.

exposure value
The combination of advertising cost, added value, and public relations value.

frequency
The number of times an individual (among the target audience) is exposed to the message.

impressions
The number of times an advertisement or public relations placement can be seen or heard by an audience.

public relations value
The equivalent advertising cost of a public relations article, interview, internet placement, etc. times three. Because a public relations placement has a higher value with an audience than advertising, it is assigned a higher value.

reach
The number or percentage of people within the target audience who are exposed to an advertising message at least once over a specific period of time.

search engine marketing (SEM)
The process of attracting traffic to a website from search engine results pages on a pay-per-click basis.

search engine marketing (SEO)
The process of improving the quality of a website so that it appears higher in natural ("organic") search results.

unique visitors (users)
The number of people who visit a website within a specific period of time. If they visit more than one time within the period, their initial visit as well as their subsequent visits are counted as sessions. A user may have one session or multiple sessions.

Date range July 01, 2016 to June 30, 2017

Created on July 10, 2017

Search Engine Marketing (SEM): **Executive Summary**

Over the past 12 months, your campaign has continued to perform well, growing clicks, Click Through Rate and Ad Position while maintaining Search Impression Share. The majority of clicks come from the Recycling at Home/Residential Recycling, Medication Disposal and Electronics Recycling ad groups, along with your Branded ad group.

During this period we have updated your ads to align with promotions on your website and in your newsletters. We have also spent time reviewing bids to ensure you are paying the most efficient price for each click, as well as reviewing search terms to ensure your ads are showing to the most relevant audience.

Traffic to your website was up 10% over the past 12 months compared to this same period the previous year, with a significant increase in Goal Completions. Top Traffic Channels included Organic Search, Other (appears to be local media campaigns) and Direct, with Paid Search driving 80% New Sessions with a double digit conversion rate. You also saw a 60% increase in mobile traffic, with mobile going from 30% of your site traffic to 44%. This increase in mobile has caused some declines in your Behavior metrics since users have trouble navigating to more pages and staying on site for a long period of time when on a mobile device. Your new mobile friendly website will help dramatically with this.

CITY OF NORFOLK PUBLIC WORKS

Fee Reduction Program

ways you can reduce your stormwater fee

This Policy supersedes and repeals all prior policies or regulations on this subject.

Why Norfolk has a Stormwater Fee...

The City of Norfolk is mandated under the Municipal Separate Storm Sewer System (MS4), Phase I Virginia Pollutant Discharge Elimination System (VPDES) permit to reduce pollutants from storm water runoff. In the absence of federal and state funding, revenue for the environmental storm water management program is derived primarily from storm water fees outlined in Chapter 41.1 of the City Code and §15.2-2114 of the Virginia Code. The City currently assesses all property owners a fee based on a 2,000 square foot equivalent residential unit (ERU). This fee is utilized to cover the cost of services for the collection, treatment and discharge of storm water runoff. This fee structure is comparable to the fees charged by other Hampton Roads Phase I municipalities, including Newport News, Hampton, Chesapeake, Portsmouth and Virginia Beach.

Fee Reductions = Pollution Reductions

The City of Norfolk's Environmental Storm Water Fee Reduction policy is designed to encourage commercial, industrial, and residential property owners to take measures which can reduce the impact their properties have on the quality of our waterways by reducing the amount of pollutants entering the storm water system. It is important to note that the storm water fee reduction program is intended to provide incentives for pollution reduction efforts.

In order to receive the reduction from the storm water utility, the property owner must submit an application including required supporting documentation to the Director of Public Works or his designee for review and approval.

How It Works....

Fee charges under the Environmental Storm Water Management Program may be reduced under the following circumstances:

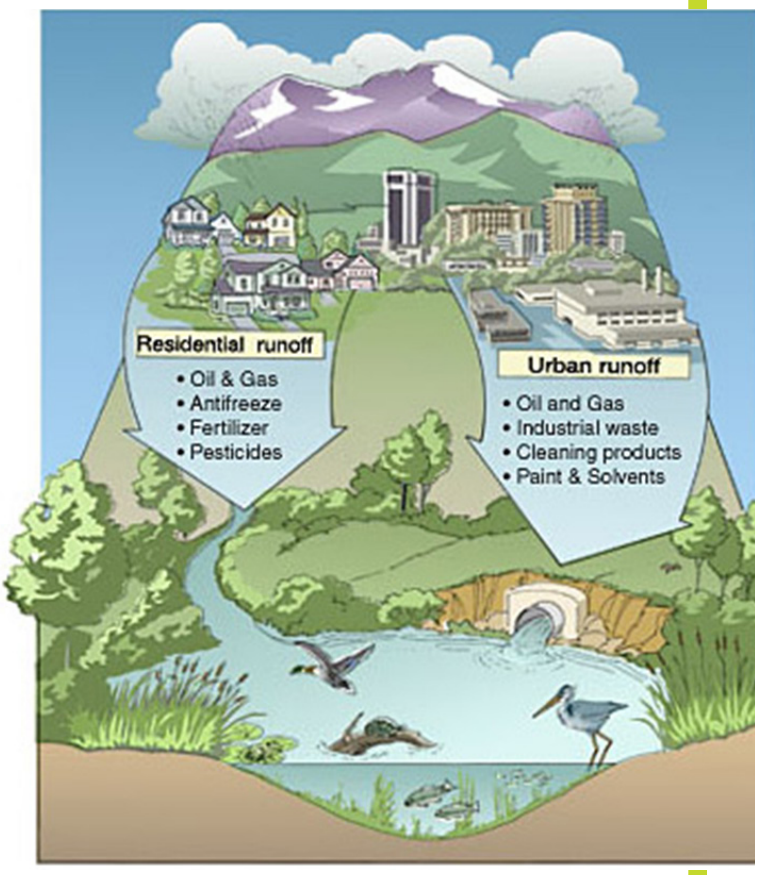

- Installation of **Residential** (one but no more than four residential/dwelling units) storm water management facilities
- Installation of **Non-residential** (property not meeting the residential criteria, including, but not limitied to, industrial, commerical, recreational, cultural, multi-family-5 units or more) storm water management facilities

See City code 41.1-1 for complete definitions

Fee reduction criteria are routinely reviewed by City staff to ensure compliance with the reduction program. If the City determines the site characteristics surrounding the reduction are no longer valid, the discount shall be eliminated from the account. Because the reduction is designed to reduce pollutants entering the storm water system, the fee discount may be eliminated if the property owner is found to violate City Code 41.1-4, Pollution of the Storm Water System.

If a property owner desires to modify their request, a new application must be completed and submitted.

The maximum reduction any one entity may receive through this reduction program **is a 60%** reduction in their total storm water utility fee. When comparing total land use of impervious area within Norfolk, 40% is publicly owned and is of benefit to all property owners within Norfolk. Therefore everyone must contribute to the maintenance of the system.

What is a SWMF?

Storm Water Management Facilities (SWMF) are facilities which have been shown to be effective in helping to remove pollutants from storm water runoff. As an incentive for SWMF construction, storm water fee reductions may be given for construction and maintenance of SWMFs as outlined in the current Norfolk Design & Construction Manual. These SWMFs, when properly constructed and maintained, have been shown to reduce runoff pollution from the site.

Residential Fee Reduction Program

The City is providing a discount to residential property owners who install storm water management facilities (SWMF) voluntarily on their property to aid in storm water (sw) runoff and/or pollutant removal. The discount will be based on the type of SWMF installed on the residential property and the area treated. **Once your SWMF has been approved and installed, homeowners are required to complete an annual inspection report on June 1st each year thereafter for continued fee reduction consideration.**

In order to qualify for a storm water fee reduction, the SWMF design and related calculations must be developed and reviewed by the City's Storm Water Engineer or his designee. The design of the SWMF shall meet the minimum drainage requirements as outlined in Table 1 and comply with the Norfolk Design & Construction Manual, Virginia Storm Water BMP Clearing House Manual, Virginia Tech Rain Garden Guide, or other City approved design specifications. Multiple SWMFs may be installed per property to stack load reductions; however, the stacked SWMFs may not treat the same drainage area. The maximum credit per site is 60%.

Residential SWMF Construction

The SWMF must be installed as outlined in the plan. Consultation with a qualified contractor is recommended, but not required. Property owners are required to follow all local, State, and Federal laws and acquire all required land disturbing, construction, and environmental permits. Site plan review may be required.

Right to Inspection

The City may inspect the SWMF at any time during the year. If the on-site stormwater storage is no longer functioning or has not been maintained, the City reserves the right to cancel the credit for up to three years.

At A Glance:

Example:
Property owner installs
1 rain garden and 2 rain barrels

20% credit rain garden
+ 10% credit rain barrel
+ 10% credit rain barrel
= 40% fee reduction

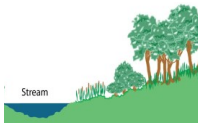

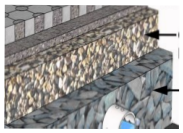

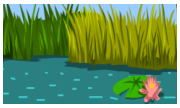

Multiple SWMFs may be installed per property to stack load reductions, but they may not treat the same drainage area.

Residential SWMF Inspections

The SWMF inspector will perform inspections throughout the installation process to ensure compliance with the approved plan requirements. Any supporting documents providing proof that the SWMF was installed and functioning as designed must be provided to the City prior to any rate reduction. The property must be fully stabilized to avoid sediment runoff prior to the reduction being approved.

The owner must complete an annual inspection of the SWMF. Inspections should include a photo of the SWMF and a written summary of any discrepancies with the SWMF and corrective actions taken. The inspection should be submitted to the Division no later than June 1 of each year and will be retained by the Division. Failure to submit the annual inspection will void the rate reduction starting on July 1.

Table 1: Residential SWMF Options

SWMF Types	Visual	% Credit	Min Drainage Area (sf)	Other Required Documentation
Rain Barrels		10	300	Barrel Volume | Roof Area Treated (sf)
Grass Swale		10	500	Drainage Area Treated | Swale length and average depth
Buffer Area		10	N/A	Planting Plan | Drainage Area | Buffer Length & Width
Nutrient Management Plan		10	100% of the site	Approved Plan
Cistern		10	300	Rain Cistern Volume | Roof Area Treated (sf) | Water Use
Bioswale		20	500	Planting Plan | Drainage Area Treated | Swale length and average depth
Rain Garden		20	500	Planting Plan | Drainage area treated | Surface area and average depth
Permeable Pavement with Underdrain		20	300	Drainage area treated | Surface area of pavement
Rooftop Disconnect with Soil Amendments		20	300	Length & Width of flow path | Amendment Depth
Green Roof		50	800	Green Roof Surface area | Planting Plan
Living Shoreline		50	N/A	Planting Plan | Applicable Permits | Length and Width of shoreline project

Residential SWMF Definitions

Rain Barrels/Cisterns: A tank used to catch rainwater running off roofs from a downspout.

Nutrient Management Plan: Program designed to manage the amount, source, placement, form and timing of the application of nutrients and soil amendments

Vegetated Filters: Bioswale, Grass Swale, Buffer Area. These are areas of dense turf, meadow grasses, trees or other vegetation with a minimum slope to absorb runoff from roof downspouts.

Rain Garden: Rain gardens are landscaped areas slightly below ground level that capture and filter stormwater runoff from a roof or other impervious (paved) surface.

Permeable Pavement: Pervious pavement may include concrete blocks, grid pavers, or pervious concrete or asphalt with a stone reservoir underneath. The reservoir temporarily stores surface runoff before seeping it into the soil below. Gravel is not considered pervious pavement.

Rooftop/Downspout Disconnect: This is the process of separating roof downspouts from the storm system and redirecting roof runoff onto pervious surfaces where soil amendments have been applied, most commonly a lawn.

Green Roof: Living roof is a roof of a building that is partially or completely covered with vegetation and a growing medium, planted over a waterproof membrane.

Living Shoreline: A shoreline protection option that allows for natural coastal processes to remain through the strategic placement of plants, stone, sand fill, and other structural and organic materials.

Non-Residential Property Fee Reduction Program

As an incentive for SWMF construction, fee reductions will be allowed for construction of approved SWMF's which reduce runoff pollution from the site. In order for a non-residential property to qualify for a storm water fee reduction, the SWMF design and related calculations must be developed and certified by a professional engineer or surveyor licensed to practice in the Commonwealth of Virginia. Pollutant loadings and SWMF effectiveness must be computed in accordance with the methods outlined in the Norfolk Design & Construction Manual.

The percent fee reduction will be computed to the nearest percent using the following formula:

% Fee Reduction
=
(% SWMF Efficiency Rating)
(Area served by SWMF in acres/
Total Site Area)

Multiple SWMFs may be installed for each property to stack load reductions; however, the stacked SWMF may not treat the same drainage area.

Up to 60% maximum credit per site

Non-Residential SWMF Construction

When constructing SWMFs, site plan review requirements and criteria must be followed. The design will be reviewed and approved through the site plan review process. If the formal process is not required (due to size limitations), the requirements and criteria still apply and the Division's Storm Water Engineer or his/her designee must review the proposed site plan prior to installation. A Declaration of Covenants must be signed by the property owner and filed with the Clerk of the Court prior to approval from the Division (copy of the Declaration will be kept on file at the Division).

A pre-construction meeting shall be arranged with the City's SWMF inspector at a minimum 48-hours prior to construction. The SWMF must be installed as outlined in the plan. Any modifications must be made by the engineer of record and the site plan adjusted as such, with approval from the Division. All sediment control measures must be installed prior to any land disturbing activity. All land disturbing permits and General Construction and Environmental Permits must be obtained where necessary.

Non-Residential SWMF Inspections

The SWMF inspector will perform inspections throughout the installation process to ensure compliance with site plan requirements. Any as-built or certifications providing proof that the SWMF was installed and functioning as designed must be provided to the City prior to any rate reduction. The property must be fully stabilized to avoid sediment runoff prior to the reduction being approved.

The owner must complete annual inspections of the SWMF. Inspections must be completed by a certified inspector and documented along with all discrepancies noted and corrective actions taken. These annual reports will be submitted to the Division no later than June 1 of each year. The inspection forms will be retained by the Division for the specific SWMF installed. Failure to submit the annual inspection reports will void the rate reduction starting on July 1.

The following items must be completed and submitted with your application to the Division to receive the reduction.

- Completed application for the Storm Water Fee Reduction/Waiver
- Proof of ownership of the facility
- Storm water system maintenance schedule
- Site Plan and Water Quality Calculations

Right to Inspection

The City may inspect the SWMF at any time during the year. If the on-site stormwater storage is no longer functioning or has not been maintained, the City reserves the right to cancel the credit for up to three years.

Residential and Non-Residential Application Checklist

- ☑ Applicant Name:
  Name of individual property owner
- ☑ Property Address:
  List address number and street name
  Include city and zip code.
- ☑ Mailing address include if different from property address.
- ☑ Parcel ID number:
  Each piece of land has its own parcel ID number. This information can be found on the City's website under Norfolk Air
- ☑ Phone number:
  The primary contact for the applicant
- ☑ Email address:
  The primary contact for the applicant
- ☑ Credits applying for:
  Select the credit for which the applicant is applying. If you are doing a residential project, check the first box. The other options relate to commercial properties and apartment complexes.
- ☑ SWFM type applying for
  Check ALL that apply
- ☑ Attach ALL SWMF plans.
- ☑ Checked and complied with all applicable City codes
- ☑ Applicant signature/date

Questions? Call 823-4010 or send a letter to SW Fee Reduction Program, Attn., Storm Water Engineer, 2233 McKann Ave, Norfolk VA 23509

Maintenance Requirements

Storm Water Management Facilities (SWMFs) installed on a property must be maintained to ensure continued function.

Restrictions on Credits

Transfer of credit:
The property credit applies only to the applicant. Credits do not transfer if home ownership changes. A new application must be submitted for new account holders to receive the credit.

The SWMF must meet all applicable City of Norfolk building, planning and zoning code requirements.

Right to Inspection

The City may inspect the SWMF at any time during the year. If the on-site stormwater storage is no longer functioning or has not been maintained, the City reserves the right to cancel the credit for up to three years.

Fee reductions associated with SWMF installation on residential and non-residential properties will become effective starting the first day of the following month after approval from the Director of Public Works or his designee. Retroactive rates reductions will not be considered. Rate reductions will be reviewed by the Director of Public Works or his designee annually during the month of June to ensure continued compliance with the rate reduction requirements. Failure to submit annual inspection reports for the previous year by June 1 may void the storm water rate reduction starting on July 1 and would require reapplication.

VDOT MS4 Coordination Meeting
May 9, 2017 @ 10:30am
2233 McKann Avenue, Norfolk, VA 23509

VDOT Representatives
Chris Swanson, P.E. – State MS4/Stormwater Management Engineer
Tracey Harmon – TMDL Program Planner
Scott Crafton – MS4 Program Manager
Michelle E. Fults, GISP – MS4 Data Analyst
Jennifer Dail – MS4 Program Coordinator
Andrew Scott – District Hydraulic Engineer

Norfolk Representatives
June Whitehurst – Environmental Programs Manager
Justin Shafer – Environmental Engineer
Kyle Quick – Environmental Specialist II

Meeting Minutes

- Interconnectivity / Mapping – City of Norfolk provided to VDOT the GIS overlay of the MS4 system along with VDOT exclusions. The City explained that any land owned by VDOT in the City's parcel information was assumed to be included in the VDOT MS4 inventory; therefore the City excluded this portion from the City's MS4. VDOT agreed with this assumption and, also, included an area 5' on either side of the VDOT Right-of-way. VDOT explained that they have mapped their outfall areas per their MS4 permit requirements. VDOT will review the parcel data set to identify areas where the City system and VDOT system overlap. VDOT will also provide the VDPT BMP inventory to the City of Norfolk for opportunity for future partnerships. VOT will identify/confirm the date of the parcel data used by VDOT to develop their MS4 service areas. VDOT will also calculate the difference in service area that VDOT has determined is their MS4 and Norfolk has identified as VDOT MS4. VDOT will also geoprocess Norfolk's GIS data to identify the areas where Norfolk has identified Norfolk structures on VDOT land.
- Operations & Maintenance- There are several locations throughout the City where the City's storm water system and VDOT is interconnected. For maintenance in these areas, City Operations will coordinate with VDOT when maintenance problems or concerns are identified. The City has implemented a storm water structure maintenance program in April 2017. During this process, the City will inspect storm water structures for GIS mapping updates, dry weather monitoring, VPDES Industrial outfall inspections, and maintenance needs. If during this process, problems are identified with VDOT systems, they will be notified immediately. Installation and maintenance of structural BMPs in the ROW were discussed. If VDOT is installing a BMP that will be turned over to the City of Norfolk for future maintenance, the City Operations needs to review to ensure that the maintenance can be performed in house. City Operations does not prefer filtered MTD BMPs in the ROW due to the number of maintenance problems they cause including (1) Confined Space Requirements, (2) Major Traffic Control, (3) Priority Media purchase, and (4) Lack of staff training on long term maintenance of these devices.

- Chesapeake Bay TMDL – At this time, the City is required to complete the TMDL Action Plan by June 2018. However, the City has identified the projects that will be utilized to meet the first 5%. None of these projects impact the VDOT MS4. However, VDOT owns a small piece of land near the City's Hague Project; if the VDOT property is impacted or there is opportunity to partner with VDOT, that will be discussed during design. VDOT mentioned the potential for future partnership with the 256-64 exchange that drains military highway. The City is currently able to meet TMDL requirements for 2/3 of the City through the HRSD SWIFT program and plans to utilize this for future permit requirements pending DEQ and EPA approval. Little Creek Watershed is the primary focus of the City to address TMDL requirements.
- Other TMDL Action Plans – The City of Norfolk currently has the Bacteria TMDL for the Elizabeth River. At this time, VDOT is not identified as a source for this TMDL. The City has until June 2018 to develop this Action Plan. The City intends to do some source tracking and public outreach to address this TMDL. Future TMDL coordination, such as PBC TMDLs, will be coordinated during future meetings.
- IDDE – The City will establish criteria for notifying VDOT in case there is an illicit discharge or any other environmental concerns associated with the system interconnectivity. The procedure will be established in the City's SOP for IDDE.
- Water Quality Monitoring – The City does not currently monitor in areas where there is physical interconnectivity with VDOT. Dry Weather monitoring is completed through the City infrastructure inspection program. Any unusual IDDE concerns will be brought to VDOT's attention. The City's Street Sweeping study will be made available to VDOT upon request.

August 2017

Annual Report: In-system Wet Weather Stormwater Monitoring Program

Introduction

In order to characterize nutrient and sediment concentrations related to urban stormwater, the six Phase I MS4 localities within Hampton Roads, in partnership with the U.S. Geological Survey (USGS) and the Hampton Roads Sanitation District (HRSD), created a regional stormwater monitoring network. This network is dual-purposed, simultaneously addressing local water quality issues and fulfilling MS4 permit requirements, while providing useful data to support Chesapeake Bay Program modeling efforts. The Chesapeake Bay Program's watershed model is responsible for estimating loads of total nitrogen (TN), total phosphorus (TP), and total suspended solids (TSS) throughout the Bay watershed. However, there are no calibration stations within the Coastal Plain, and therefore no verifiable loading rates of these compounds. By providing high frequency and high quality data through the USGS quality control and quality assurance framework, the Hampton Roads region will be well-represented with accurate estimates of loading rates for future phases of the model. This report was developed to fulfill the requirements stated in the Phase I localities' MS4 permits.

Monitoring Network

The six Phase I MS4 localities (Chesapeake, Hampton, Newport News, Norfolk, Portsmouth, and Virginia Beach) participate in the Hampton Roads Regional Water Quality Monitoring Program (RWQMP). Each locality has two monitoring sites, draining land between 3 and 30 acres with no tidal water influence, that represent a range of urban land uses including high-density residential, single-family residential, and commercial/industrial (Fig. 1; Table 1). Site selection was also based on the goal of having very few, if any, best management practices (BMPs) upstream of the sampling

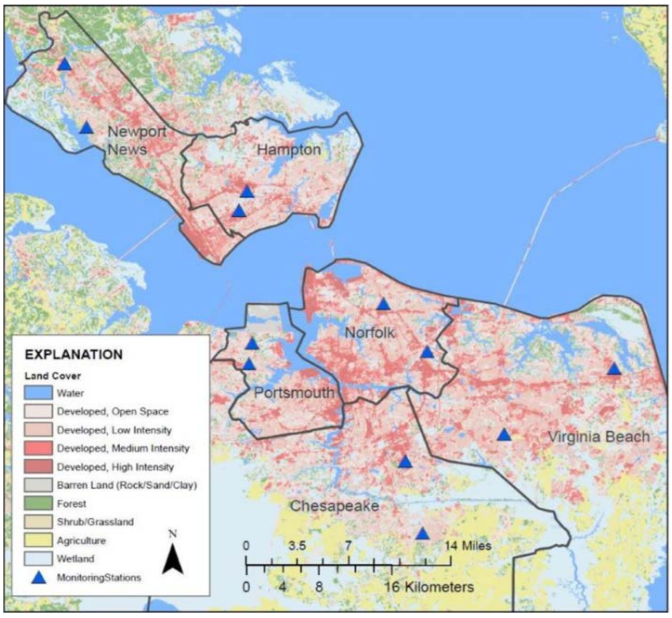

Figure 1. Locations of the 12 water quality monitoring stations, overlaid on land cover, in Hampton Roads, VA.

area. By characterizing the range in loadings that are typical of a given land-use type that do not yet have BMPs implemented, variability can be assessed within land use types, and meaningful comparisons can be developed between the three dominant land use types in the region. This should significantly enhance the understanding of how management activities can be directed efficiently.

Table 1. Locality names, station names, and land use types for all localities participating in the monitoring program.

Locality	Station Name	Land Use Type
Chesapeake	Professional Place	Commercial
Chesapeake	Ramsgate Lane	Single-family Residential
Hampton	Coliseum Drive	Commercial
Hampton	Garrett Drive	Single-family Residential
Newport News	Lakewood Park Drive	Single-family Residential
Newport News	Rivers Ridge Circle	High Density Residential
Norfolk	Sheppard Avenue	Single-family Residential
Norfolk	USAA Drive	Commercial
Portsmouth	Craneybrook Lane	High Density Residential
Portsmouth	Daisy Drive	Single-family Residential
Virginia Beach	Lindsley Drive	High Density Residential
Virginia Beach	Ludlow Drive	Single-family Residential

Operation of the monitoring network is the joint responsibility of USGS and HRSD. Data collection is supervised by the USGS Virginia Water Science Center to ensure that data quality meets the requirements established by USGS. Discrete sample collection and analysis plus system maintenance are conducted by HRSD's Central Environmental Laboratory (CEL) while data analysis, interpretation, and reporting are conducted by USGS. All 12 stations collect real-time, high frequency data including flow (stage, velocity, and discharge), turbidity, specific conductance, and water temperature. Discrete samples for nutrients and sediments are taken during storm events over a range of flows and for quarterly baseflow sampling. Nutrient concentrations consist of measurements of TN, total Kjeldahl nitrogen (TKN), organic nitrogen,

nitrate + nitrite, ammonia + ammonium, TP, and orthophosphate. Sediments are measured as TSS.

Monitoring Protocols

Each station is equipped with a continuous flow meter, a water quality sonde for continuous water quality monitoring, a refrigerated automated sampler for the collection of stormwater water quality samples, an internal data logger for recording and storing all measured values, a satellite telemetry unit to transmit data hourly, a power system supporting all components (AC power with battery backup), and a ruggedized housing that protects all equipment (Fig. 2). Continuous flow is measured at 5 minute intervals and flow meters are connected to the data logger and satellite telemetry system to provide data in near real time. Instruments are operated in accordance to manufacturer guidance, and USGS guidance (see http://water.usgs.gov/osw/pubs.html). Continuous water quality monitors measure water temperature, specific conductance, and turbidity and are operated in accordance to standard protocol (Wagner et al. 2006).

Figure 2. Ruggedized housing and components present at each stormwater monitoring station.

Discrete sampling for nutrients and sediment are triggered by the datalogger when stormflow conditions exist (as indicated by flow and water quality conditions). Samples are retained in the refrigerated sampler (≤ 6°C) until retrieved by HRSD field staff. Samples are retrieved within 24 hours of collection, transported in coolers (≤ 6°C), and delivered to the laboratory for preservation and analysis. The analytes measured have defined laboratory methods within 40 CFR Part 136 and TN is calculated as the sum of TKN and nitrate + nitrite. Detailed standard operating procedures for nutrient and sediment analysis are maintained at HRSD's CEL and available upon request.

All data collected for this monitoring program, including continuous time series data and discrete sample data, is retained in the USGS National Water Information System (NWIS) and made publicly available online via NWISweb (http://waterdata.usgs.gov/HRStormwater). Continuous data from the flow meter and water quality monitors are transmitted via GOES satellite hourly and uploaded directly into NWIS via automated processes. These data are made publicly available on NWISweb within minutes of the hourly transmission. Discrete sample data is entered into the Laboratory Information Management System (LIMS) at HRSD. These data are electronically transferred monthly to USGS for entry into NWIS, at which time they are publicly accessible via NWISweb.

Results

Monitoring station installation began in April 2015 with all stations on-line and collecting data by December 2016. Between July 1, 2016 and June 30, 2017, a total of 547 discrete sampling events were logged, inclusive of baseline and event-triggered sampling and thousands of continuous monitoring data points have been collected and evaluated. In addition, meteorological data was collected from the Norfolk International Airport and from rain gauges throughout the region. Annual precipitation in 2016 was greater than years previous (Fig. 3), thus results interpreted from this snapshot in time will have higher than normal discharges and loads.

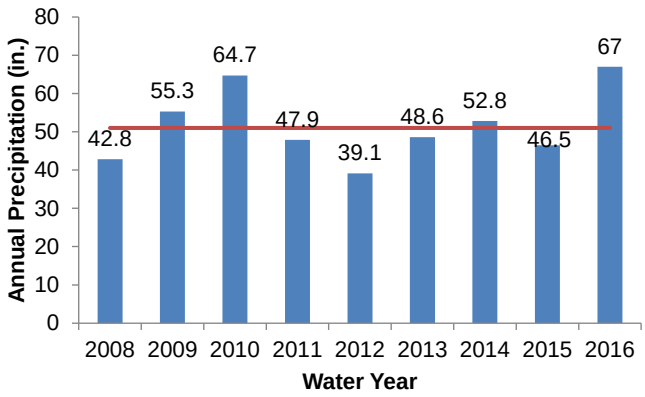

Figure 3. Total annual precipitation from Norfolk International Airport (NOAA) for water years 2008-2016 (blue bars) and the 10 year mean (red line).

Total annual discharges were highest at the commercial sites, followed by high density residential, and single family residential (Fig. 4). Commercial sites had the greatest amount of impervious surface compared to other land use types which were comprised more of turf grass and tree cover. Not unexpectedly, seasonal temperature variations were consistent between sites (Fig. 5).

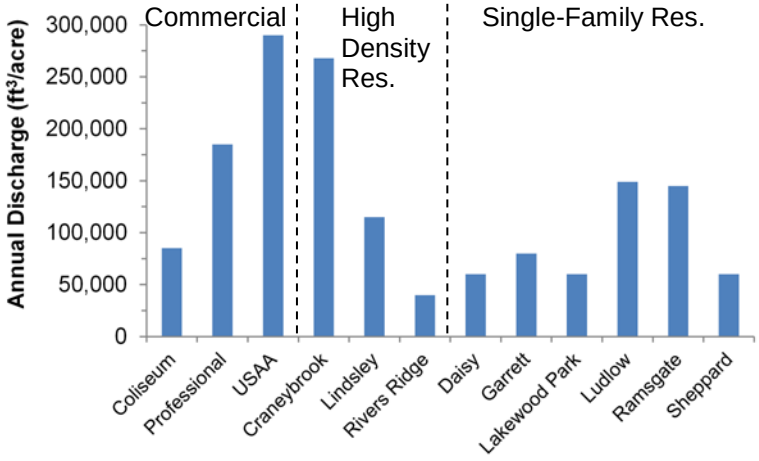

Figure 4. Total annual discharge at each site, grouped by land use.

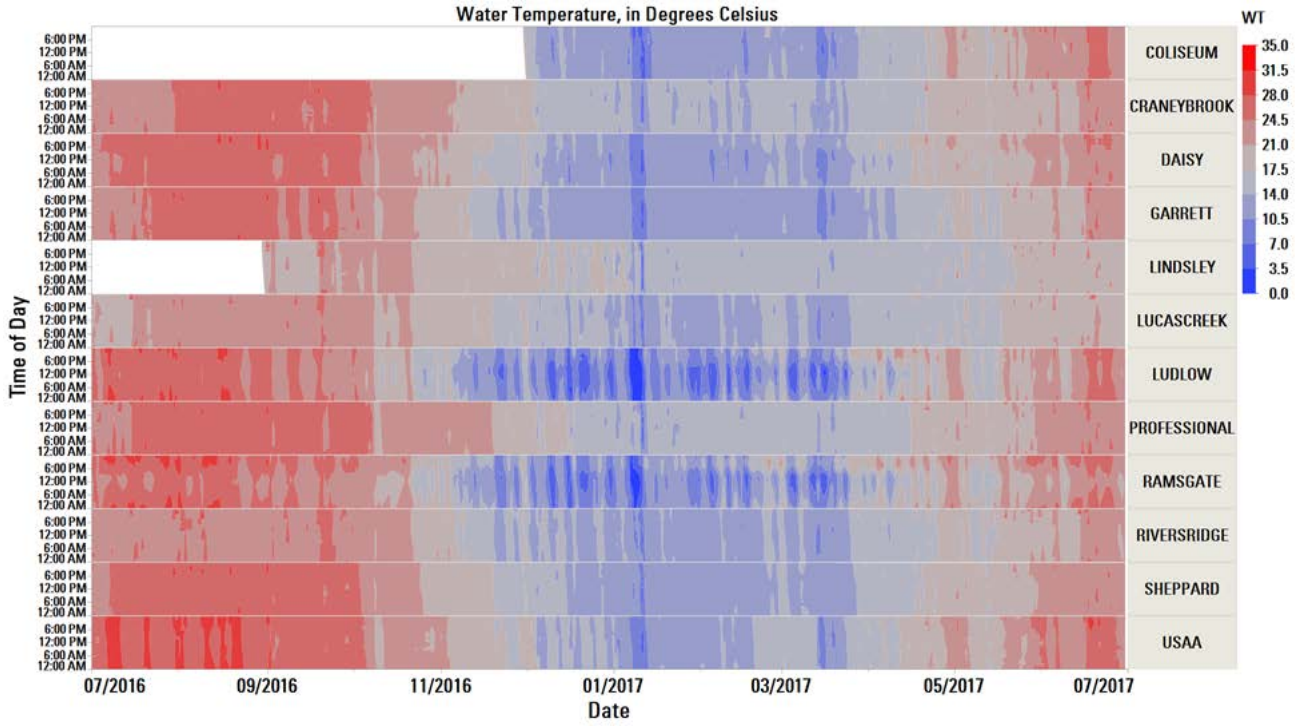

Figure 5. Daily temperature (°C) at 5 minute intervals for each site between July 1, 2016 and June 30, 2017.

TN concentrations were significantly different between land use types on average, and were greatest for single family residential land use (Fig. 6A). Nitrate + nitrite concentrations were greatest in high density and single family residential land uses compared to commercial (Fig. 6B). Organic nitrogen tracked with TN concentrations (Fig. 6C). There were no significant differences between ammonia + ammonium concentrations and land use (Fig. 6D). The bulk of the N pool was comprised of organic N (Fig. 7).

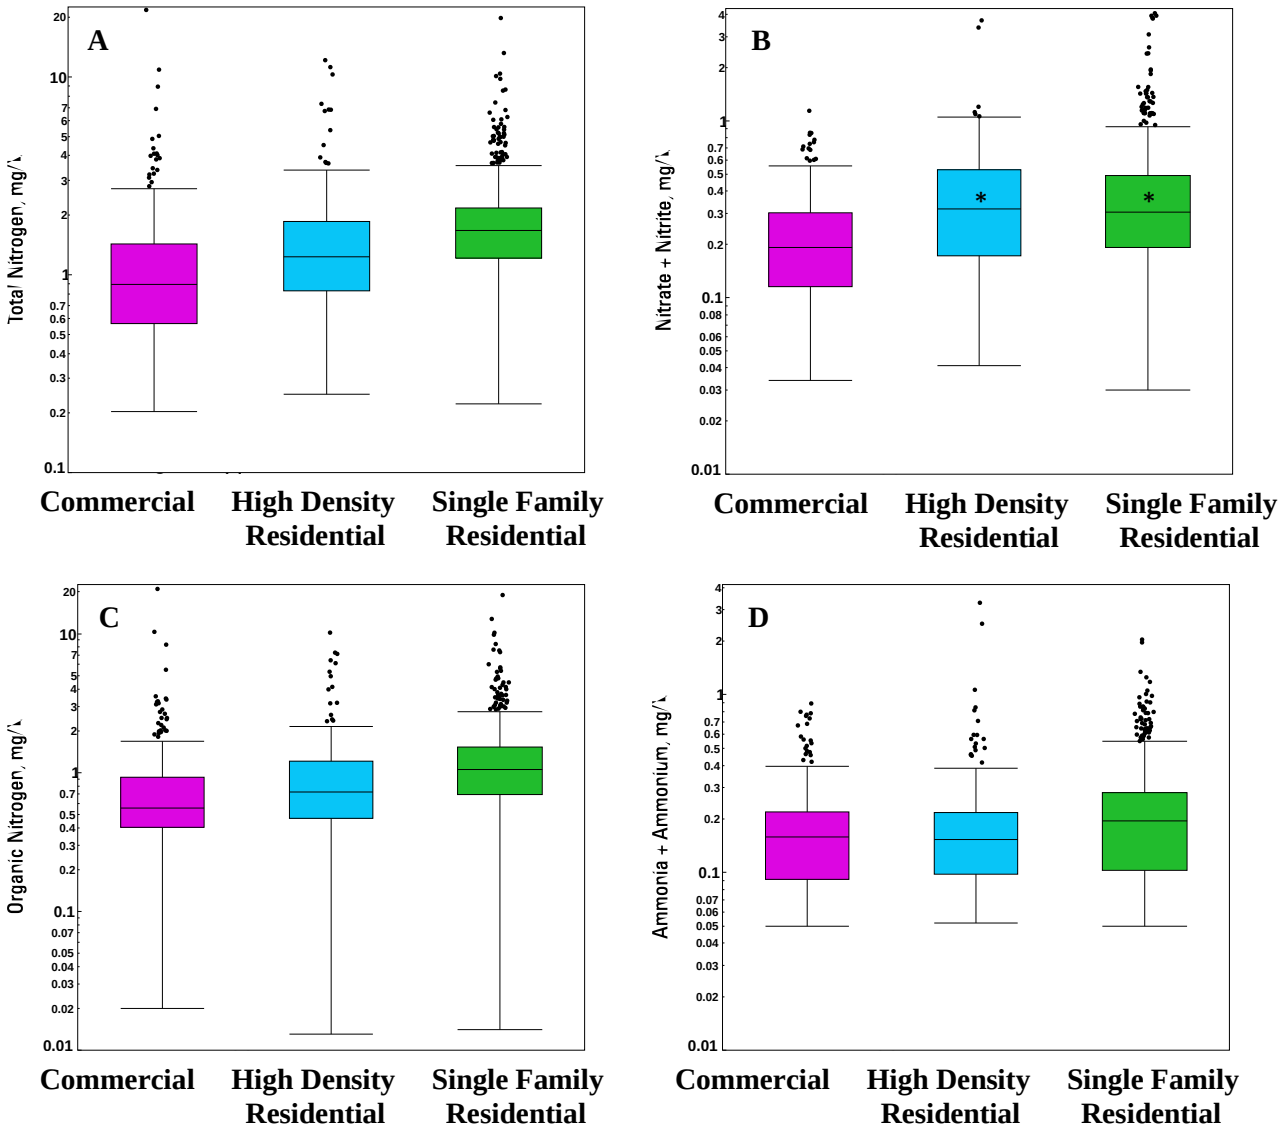

Figure 6. Box and whisker plots of concentrations (mg/L, log scale) of TN (A), nitrate + nitrite (B), organic N (C), and ammonia + ammonium (D) for the three land use types for July 1, 2016 – June 30, 2017. Outliers (black dots) denote concentrations outside error bars from higher discharge events. Median values are statistically different unless denoted with an asterisk (*).

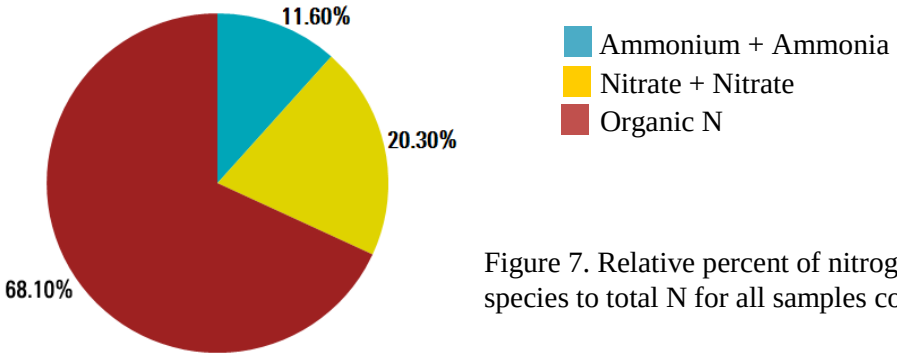

Figure 7. Relative percent of nitrogen species to total N for all samples collected.

TP and orthophosphate concentrations were also significantly greater for single family residential land uses compared to commercial and high density residential land uses (Fig. 8A & 8B). There was no significant difference in TSS concentrations among sites (Fig. 9). Outliers in all plots, denoted by black dots, are a result of higher discharge events occurring outside of the highest interquartile (> 75th percentile).

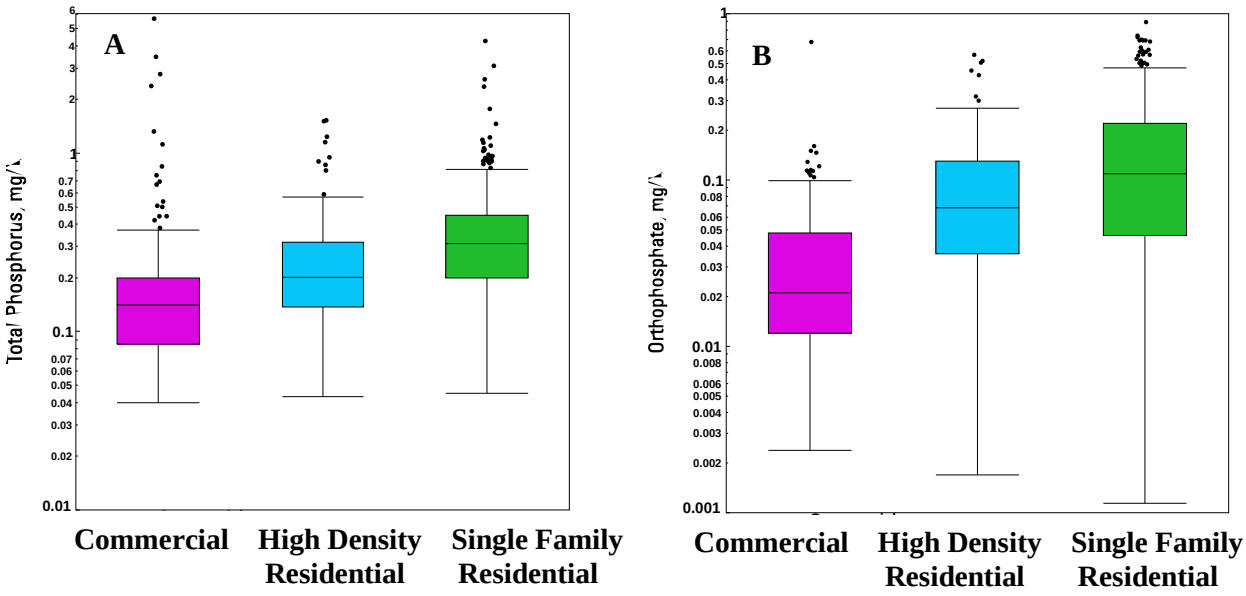

Figure 8. Box and whisker plots of concentrations (mg/L, log scale) of TP (A), and orthophosphate (B) for the three land use types for July 1, 2016 – June 30, 2017. Outliers (black dots) denote concentrations outside error bars from higher discharge events. Median values are statistically different.

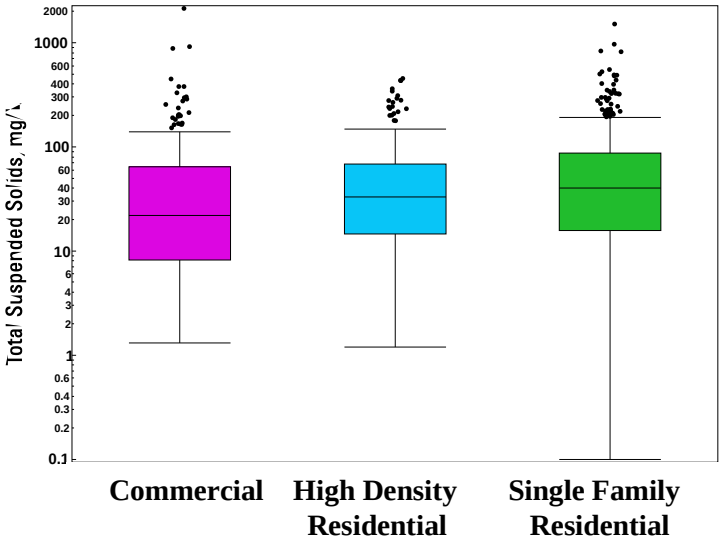

Figure 9. Box and whisker plots of TSS concentrations for the three land use types for July 1, 2016 – June 30, 2017. Outliers (black dots) denote concentrations outside error bars from higher discharge events. Median values are significantly different.

Discussion

While long term trends and loading rates cannot be established at this time, nutrient concentration variability among land use types is evident for this first year of data. Higher concentrations of nutrients from single family and high density residential land uses compared to commercial land uses suggests higher urban fertilizer usage per acre in those areas. However, other nutrient sources must be considered, as a P ban has been enacted in VA for urban fertilizer, and the bulk of TN in the samples was organic N. The presence of the high fraction of organic N is likely due to low flushing in some areas, resulting in accumulation of organic material. Conversely, TSS did not vary from site to site, and in a preliminary comparison to other monitoring programs across the state conducted by the USGS, TSS concentrations were lower in the Coastal Plain. It is important to note that there are a wide range of concentrations for all constituents at all sites, related to the flashiness of these systems in response to storm events. Additionally, higher concentrations at higher density land uses may not translate into similarly high loads, because drainage acreage and the degree of imperviousness of the land dictate the volume of water delivered to the stormwater system (Schueler, 1994, Schueler, 2009).

A variety of factors will impact the amount of nutrients or sediments in urban runoff, including antecedent rain events, rain duration and total volumes, storm frequency, time of year, and of course land use (Brezonik & Stadelmann, 2002; Sonzogni et al., 1980). Over this first

year, it was evident that several individual storms can account for a large amount of annual discharge, which could translate to high loads in a short time frame. As an example at one site, three storms accounted for nearly 50% of the total annual flow, translating to 65% of the annual sediment load. In typical stream systems, and on average in this stormwater monitoring program, 90% of the time flow is equal to or less than 1 ft^3/s. Flows greater than that only occur 10% of the time and are mostly related to larger storm events. It is the goal of this monitoring program to factor in storm variability, base flow, and land use type over an extended period of time to establish demonstrable loading rates in the Coastal Plain. This will provide valuable data to a future version of the Chesapeake Bay watershed model (Phase 7) and contribute to current calibrations of the Phase 6 model. Over the course of the next few years, localities will continue to collaborate with USGS and HRSD to collect data and evaluate loading rates over the long term.
