

Norfolk Police Department

Business Watch

You can be a part of something BIG!

Business Watch works in the same way as Neighborhood Watch. It is tailored to meet the needs of the business community. This is achieved through partnerships with various business, professional groups and the police department.

Business Watch can keep businesses within a geographical area aware of important crime trends and related information.

This free program allows you to have communications with other businesses in your area, and with the Police Department. If a crime occurred at a business down the road from you, how would you know, and if the Police Department has crime related information, who would let you know? This is your chance to become part of this program which connects participants through email, phone, and personal visits.

If you would like to be added to the email Business Watch list, please call Officer Hughes at 664-6931 or Officer Tolson at 664-6936 and provide your name, business name/address, phone number and email address.

In addition to being added to the email list you will be invited to periodic training meetings that the Police Department conducts to help keep businesses safer.
