Hampton Roads Disabilities Board

Annual Report

HRDB's yearly goal is to continue being the connector between the disabled community and local government, the business community, the faith community, and the general public by raising awareness and exchanging information. In 2021 the board sponsored a training session titled **Developing a Disability During a Pandemic?** Subject matter experts such as Virginia Beach Police Department Crisis Intervention Team (CIT), Prime Plus, Social Security Administration, and SSI/SSDI Outreach, Access, and Recovery (SOAR) provided information to the disabled community and others working to provide quality support and services to persons with disabilities. In 2022 HRDP will sponsor one training session and two lunch-n-learn sessions to continue raising resource awareness and exchanging information.
